1. 一般信息 General Information

课程长度：最少 4 小时，建议 6 小时以上。 Course Length: Minimum 4 Hours, 6+ Hours Recommended

先修课程：无。 Prerequisite(s): None

本课程可采用面授、在线或结合面授与在线的方式进行。如果讲师选择以在线方式进行授课，则必须（1）使用支持实时授课的视频会议平台或工具，以及（2）与学员协调，确保在进行活动时获得适当的材料与指导。详见附录 A：远距教学指南以获得更多建议。 This course can be delivered in person, online, or using a combination of in-person and online delivery. If the trainer chooses to deliver the course online, they must (1) utilize a video conferencing platform or tool that allows for live instruction, and (2) coordinate with learners to ensure they have the appropriate supplies and guidance for conducting activities. See Appendix A: Guidelines for Distance Learning for additional recommendations.

笔试总题数：20 题（每题一分） Total Number of Questions on Written Exam: 20 (Each question is worth one point.)

笔试时间总长：22 分钟 Total Time Allowed for Written Exam: 22 Minutes

及格分数（笔试）：80% Passing Score (Written Exam): 80%

应试者必须通过笔试，始可获颁课程证书。 Candidates must pass the written exam to receive the course certificate.

讲师文件 Trainer Documents

- 咖啡导论 AST 课程指南 3.0 版 Introduction to Coffee AST Guidebook Version 3.0
- SCA 咖啡系统地图 SCA Coffee Systems Map
- 咖啡价值评估系统：了解精品咖啡协会的咖啡价值评估 A System to Assess Coffee Value: Understanding the Specialty Coffee Association's Coffee Value Assessment

所有文件（课程教材）均可至使用者入口网站下载（My AST Portal > My AST Downloads > Course Materials）。 All documents are available in the user portal (My AST Portal > My AST Downloads > Course Materials).

2. 课程说明与更新 Course Description and Updates

咖啡导论课程为新进咖啡专业人士与消费者提供精品咖啡价值链的概论，并介绍历史、种植、处理、烘焙、感官评估以及冲煮准备的核心概念。学员将通过多样化的品鉴练习，深入了解价值链中各项决策如何影响最终的咖啡风味。 Introduction to Coffee provides new coffee professionals and consumers with a general overview of the specialty coffee value chain and introduces key concepts in history, cultivation, processing, roasting, sensory assessment, and preparation. Participants will engage in a variety of tasting exercises to deepen their understanding of how decisions made along the value chain impact the final cup.

课程大纲更新与上一版本的区别：Curriculum Updates from Previous Version:

上一版本的课程指南为 2.0 版。本课程指南版本为 3.0 版。 The previous guidebook version is now referred to as Version 2.0. This guidebook version is referred to as Version 3.0.

3.0 版课程内容调整以反映精品咖啡产业的最新发展，包括咖啡价值评估。有关阿拉比卡与罗布斯塔咖啡、感官评估，以及冲煮的章节在新版也有所优化。新版本的格式设计提升了可读性，并新增了参考材料，有助于讲师设计教材。此外，考题也经过重新编写，使内容更加清晰易懂。 In Version 3.0, the content has been adjusted to reflect recent developments in the specialty coffee industry, including Coffee Value Assessment. Sections on arabica and robusta, sensory assessment, and brewing have been refined. New formatting has been applied to increase readability, references have been added to help trainers develop their teaching materials, and exam questions have been rewritten to improve clarity.

3. 笔试题目分布（按主题） Written Exam Question Distribution by Topic

有关笔试试题的重要信息详如下表。 The table below outlines key information regarding the written exam questions.

所有笔试试题的设计旨在评估学员对特定学习目标的掌握程度。题目一律按主题分类，并组成所谓的「题库」，学员受测内容将从这些题库中随机选出。 All written exam questions were developed to assess learners' mastery of specific learning objectives. The questions have been grouped by topic. All questions within a topic are considered a topic "pool." From this pool, a certain number of questions will be randomly selected and presented to the learner.

题库：每个主题的试题数量。 Question Pool: This is the number of questions per topic.

实际呈现的考题数量：每个主题实际列入施测内容（随机选出）的试题数量。该数量由课程建立者决定，目的是确保各章节和主题所占的比例获适当分配。 Questions Presented: This is the number of questions a learner will receive per topic during the exam, selected randomly from that topic's pool. This number was determined by the author(s) to ensure that each course section and topic is weighted appropriately.

章节比重：每个章节名称右侧，列有该章节在整份测验中大约的占比。 Section Weighting: Next to each section title is the approximate percentage of the total exam represented by the questions in that section.

部分主题 / 目标不会列入笔试中，由于这些信息对学员仍有帮助，因此讲师仍应讲授相关内容。 There are some topics/objectives that are not tested during the written exam. The trainer should still address these topics/objectives because the information is useful for learners.

考试章节及主题 Exam Sections & Topics	题库数 Question Pool	考题数 Questions Presented
1.01 章节 精品咖啡概论 15% 1.01 Section INTRODUCTION TO SPECIALTY COFFEE 15%		
主题 1：咖啡体验 1 Topic: Coffee Experiences	未列入施测内容 Not Tested	
主题 2：咖啡价值链中的主要活动与参与者 2 Topic: Key Activities and Actors in the Coffee Value Chain	3	1
主题 3：精品咖啡 3 Topic: Specialty Coffee	6	2
1.02 章节 咖啡的起源 25% 1.02 Section COFFEE'S ORIGINS 25%		
主题 1：咖啡历史 1 Topic: History of Coffee	3	1
主题 2：咖啡种植区域 2 Topic: Coffee-Growing Regions	6	2
主题 3：季节性、种植以及采收 3 Topic: Seasonality, Farming, and Harvesting	3	1
主题 4：物种与品种 4 Topic: Species and Varieties	3	1
1.03 章节 加工处理 5% 1.03 Section PROCESSING 5%		
主题 1：处理及处理法 1 Topic: Processing and Processing Methods	3	1
1.04 章节 出口与进口 5% 1.04 Section EXPORTING & IMPORTING 5%

1.07 章节 水质、冲煮及维护 25% 1.07 Section WATER, BREWING, & MAINTENANCE 25%		
主题 1：水质 1 Topic: Water	3	1
主题 2：冲煮方法 2 Topic: Brewing Methods	3	1
主题 3：冲煮关键原则 3 Topic: Key Brewing Principles	6	2
主题 4：维护与清洁 4 Topic: Maintenance and Cleaning	3	1
总题数 Total Number of Questions	60	20

4. 课程大纲 Course Curriculum

课程大纲兹列如下，大纲分为章节、主题，以及学习目标。The course curriculum is outlined below. It is divided into sections, topics, and objectives.

学习目标（列于每个主题的「学习目标」框中）描述在完成该主题后**学员应该具备**之能力。The learning objectives (listed in the "Learning Objectives" box for each topic) describe what a learner should be able to do by the time they complete that topic.

批注（位于左侧栏）概述每个主题的核心讲解要点。部分主题与活动包含具体的教学说明（以**斜体字**表示）。其中少数说明是建议性质而非强制性，会使用「讲师可以...」或「学员可以...」来表示。笔试题目的解答通常可以在各个主题的学习目标及 / 或批注中找到。大多数主题均提供了问题示例，正确答案会以**粗体红字**标示。The notes (found in the lefthand column) outline key talking points for each topic. Some topics and activities contain specific teaching instructions (written in *italics*). A few instructions are suggested but not required, and are noted using the phrase "Trainers may..." or "Learners may..." The answers to written exam questions are often found in the learning objectives and/or notes for each topic. Sample questions have also been provided for most topics with correct answers marked in bold red.

大多数参考材料（位于右侧栏）可以在线公开取得，少数参考材料是印刷书籍，这些情况下，讲师可通过连结查看书籍预览或其他额外出版信息，以便找到或取得该书籍。有关更多参考材料的信息，请详见附录 B 的参考书目。Most of the references (found in the righthand column) are publicly accessible online. A few references are printed books—in these cases, the link connects trainers to book previews or additional publication data that may help them find or acquire the book. More information on each reference can be found in the Bibliography (Appendix B).

活动内容会在特定的橘色方框中说明。Activities are described in designated orange boxes.

本课程大纲列出了必修主题、目标以及活动。如有额外主题和活动有助于学员与课程内容从不同角度探讨教材，及 / 或提供如何在职业环境中应用教材的见解，我们也鼓励讲师探索更多主题和活动。This course curriculum outlines mandatory topics, objectives, and activities. Trainers are encouraged to explore additional topics and activities as they wish if the additional topics and activities help learners connect with the course material, explore the material from different perspectives, and/or provide insight into how the material shows up in professional settings.

1.01 | 章节 | 精品咖啡概论 Section | INTRODUCTION TO SPECIALTY COFFEE

3 个主题 Topics

咖啡体验 (1.01.01) Coffee Experiences (1.01.01)

学习目标 Learning Objectives:

1. 认识全球多样的咖啡冲煮技术与消费偏好。 Recognize that a wide variety of coffee preparation techniques and consumption preferences exist worldwide.

请学员回想自己的咖啡体验，并分享他们是如何第一次接触到咖啡的。比较并讨论不同经验中有哪些相似与相异点。 Ask learners to reflect on their coffee experiences and share how they were introduced to the beverage. Note similarities and differences.

全球有超过 50 个国家从事咖啡商业化生产，且咖啡是全球消费量最高的饮品之一。然而，对于什么才是「良好的」咖啡或咖啡体验，在不同文化与市场中的定义不尽相同。 Coffee is commercially produced in more than 50 countries and is one of the most highly consumed beverages worldwide. What makes a coffee or coffee experience "good" will vary by culture and market.

可通过探讨下列一个或多个主题延伸讨论： Expand the conversation by exploring one or more of the following topics:

- 强调全球咖啡产业的庞大规模与复杂性，分享相关数据（例如：全球咖啡农场的估算数量、小农的普遍性、过去几十年来全球咖啡消费量的增长等）。 Emphasize the large size and complexity of the global coffee industry. Share relevant data (e.g., the estimated number of coffee farms worldwide and the prevalence of smallholder farmers, the increase in global consumption over the past few decades, etc.)
- 提供世界各地的咖啡冲煮传统，例如：埃塞俄比亚的 jebena 与咖啡仪式、ibrik/cezve、意式咖啡机、手冲器具等。 Provide examples of coffee preparation traditions from around the world. Consider the jebena and coffee ceremony of Ethiopia, the ibrik/cezve, espresso machines, manual devices, etc.
- 讨论咖啡的地域趋势，包括不同地区的咖啡消费方式，以及多样化的咖啡产品。 Discuss regional trends in coffee, including the different ways coffee is consumed and the variety of coffee products that exist.

[International Trade Centre, "The Coffee Guide."](#) (Also available for download in French, Spanish, Portuguese, and Amharic).

[International Coffee Organization, "Coffee Report and Outlook."](#)

[Specialty Coffee Association, "An Introduction to the Korean Coffee Market | Green Coffee Summit."](#)

[Specialty Coffee Association, "An Introduction to the German Coffee Market | Green Coffee Summit."](#)

[Specialty Coffee Association, "An Introduction to the UK Coffee Market | Green Coffee Summit."](#)

咖啡价值链中的主要活动与参与者 (1.01.02) Key Activities and Actors in the Coffee Value Chain (1.01.02)

学习目标 Learning Objectives:

1. 列出并描述咖啡价值链中的六大主要活动，并将这些活动以正确顺序排列。 List and describe the six key activities in the coffee value chain, placing the activities in the correct order.
2. 认识到咖啡价值链中涉及众多参与者，包括一些未直接参与六大主要活动的参与者。 Recognize that many actors are involved in the coffee value chain, including some that are not directly involved in one of the six key activities.

主要活动：种植、处理、出口、进口、烘焙、冲煮。这六大活动通常会按顺序列出（即「从种子到杯子」模式），用以解释咖啡价值链的运作方式。 Key Activities: Farming, Processing, Exporting, Importing, Roasting, Brewing. These six activities are commonly listed sequentially (the "seed-to-cup" model) and are used to explain the coffee value chain.

这些主要活动并未涵盖所有产业参与者（例如：政府机构、非政府组织，以及主要活动范畴之外的企业）。 These key activities don't account for all industry actors (e.g., government agencies, nongovernmental organizations, businesses outside of the key activities).

讲师可以使用《咖啡系统地图》来展示咖啡产业的复杂性，以及与众多参与者之间的关系。 Trainers may use the Coffee Systems Map to demonstrate the complexity of the coffee industry and the many actors involved.

Specialty Coffee Association, "SCA Coffee Systems Map."

[Rugulo and Ionescu, "Mapping the Complex: Designing a Map of the Global Coffee Sector."](#)

例题：

下列哪些为精品咖啡价值链中的主要活动？（请选择所有适用选项）

冲煮

出口

种植

认证

Sample Question:

Which of the following are key activities in the specialty coffee value chain? (Select all that apply.)

Brewing

Exporting

Farming

Certifying

精品咖啡 (1.01.03) Specialty Coffee (1.01.03)

学习目标 Learning Objectives:

1. 定义精品咖啡一词。 Define the term specialty coffee.
2. 瞭解个人与市场偏好在判定咖啡是否属于精品咖啡的关键作用。 Recognize that individual and market preferences play a role in determining whether a coffee is specialty.
3. 以连续体的概念解释精品咖啡与商业咖啡的关系。 Explain the specialty/commodity relationship using the concept of a continuum.
4. 列出内在属性与外在属性的例子。 List examples of intrinsic and extrinsic attributes.
5. 认识到内在属性与外在属性均能提升咖啡的价值。 Recognize that both intrinsic and extrinsic attributes can add to a coffee's value.

精品咖啡是一种因其独特属性而受认可的咖啡或咖啡体验，并也因为
这些属性而在市场上有重要附加价值。 Specialty coffee is a coffee or coffee experience recognized for its distinctive attributes, and because of these attributes, has significant extra value in the marketplace.

商业咖啡与精品咖啡之间的关系应视为一个连续体，当越多独特的
正面属性被发掘，咖啡的本质就会越趋向精品化。咖啡在精品 / 商业连续体上的定位，取决于个人偏好，以及哪些属性对个人
而言最具意义。 The relationship between commodity and specialty coffee is best viewed as a continuum, with coffees becoming more specialty as more distinctive positive attributes are detected. Where a coffee falls on the specialty/commodity continuum depends on personal preference and which attributes are most meaningful to the individual.

内在属性与外在属性都能够增加咖啡的市场价值。内在属性与咖啡
的形式、外观、化学成分及感官特性相关，例如：咖啡的描述性风味特征、烘焙色泽及豆子的大小 / 等级。外在属性则与产品信息有关，如咖啡产地、生产者名称、任何认证标志、可持续发展主张、品牌等。 Both intrinsic attributes and extrinsic attributes can add to a coffee's value in the marketplace. Intrinsic attributes relate to a coffee's form and appearance, chemical makeup, and sensory properties. Examples include the coffee's descriptive profile, roast color, and bean size/grade. Extrinsic attributes relate to information about the product. Examples include the coffee's place of origin, the name of the producer, any certifications that coffee might carry, sustainability claims, brand, etc.

[Specialty Coffee Association. "Towards a Definition of Specialty Coffee: Building an Understanding Based on Attributes."](#)

[SCA. "Hacia una definición de café de especialidad: Construyendo una comprensión basada en atributos."](#)

[SCA. "스페셜티 커피 정의에 대하여 : 속성에 기반한 이해."](#)

[Specialty Coffee Association. "A System to Assess Coffee Value: Understanding the Specialty Coffee Association's Coffee Value Assessment."](#)

活动：品尝精品咖啡 Activity: Specialty Tasting

使用滴滤式咖啡机或手冲器材冲泡两款咖啡。这两款咖啡应展现出明显不同的感官属性（例如：一款咖啡可能带有坚果、可可以及烘焙风味，而另一款咖啡则带有水果与花香风味）。这两款咖啡**不应**有任何瑕疵，提供至少其中一款咖啡的一些外在信息，并将样品编码，以确保学员在活动的第一阶段无法得知咖啡的背景信息。° Brew two coffees using a batch brewer or manual device. The coffees should display noticeably different sensory attributes (e.g., one coffee may contain nutty, cocoa, and roasted flavors, while the other coffee may contain fruity and floral flavors). The coffees should not contain defects. Some extrinsic information should be available for at least one of the coffees. Code each sample so that learners don't have any background information about the coffees during the first part of the activity.

首先，请学员品尝这两款咖啡并思考下列问题：根据咖啡的描述性风味特征，哪款咖啡更像精品咖啡？哪款咖啡较不像精品咖啡？进行小组讨论，并且强调答案取决于个人偏好，若学员感知到越多独特且正面的属性，该咖啡对*他们*而言就越具备精品咖啡的特质。° First, ask learners to taste the two coffees and reflect on the following questions: Based on the coffees' descriptive profiles, which coffee is more specialty? Which coffee is less specialty? Discuss as a group and emphasize that the answer depends on preference: the more distinctive, positive attributes the learner detects, the more specialty that coffee is *to them*.

接下来，指出目前为止的活动主要聚焦在内在属性。揭示一款或两款咖啡的二到三项外在属性，并询问学员这些额外信息如何影响他们的偏好，是否有特定外在属性比其他属性更受学员重视？° Next, point out that the activity so far has focused on intrinsic attributes. Reveal two to three extrinsic attributes of one or both coffees and ask learners how this additional information might impact which coffee they prefer. Are there particular extrinsic attributes that learners value over others?

强调内在属性与外在属性都能增加咖啡的价值，而某些属性在不同的市场中可能会更受重视（或不太受重视）。° Emphasize that both intrinsic and extrinsic attributes can add to a coffee's value and that certain attributes may be celebrated more (or less) in different markets.

例题：

下列何者最适合填入以下句子？精品咖啡是一种因其 _____ 而被认可的一种咖啡或咖啡体验。

独特属性

高评分

水果风味

稀有性

Sample Question:

Which of the following best completes this sentence? Specialty coffee is a coffee or coffee experience recognized for its _____.

distinctive attributes

high score

fruity flavors

rarity

例题：

下列叙述是否正确？全球咖啡市场皆重视相同的属性。

正确

错误

Sample Question:

Is the following statement true or false? Coffee markets worldwide value the same attributes.

True

False

1.02 | 章节 | 咖啡的起源 Section | COFFEE'S ORIGINS

4 个主题 Topics

咖啡历史 (1.02.01) History of Coffee (1.02.01)

学习目标 Learning Objectives:

1. 描述阿拉比卡与罗布斯塔咖啡的起源。 Describe the origins of arabica and robusta coffee.
2. 简要描述咖啡种植如何传播到全世界。 Describe, in basic terms, how the cultivation of coffee spread around the world.
3. 认识到现今多数咖啡生产国种植咖啡的原因与殖民相关。 Recognize that the coffee plant is present in most coffee-producing countries today due to colonial relationships.

Coffea arabica (常称为阿拉比卡咖啡) 以及 *Coffea canephora* (常称为罗布斯塔咖啡) 是世界上种植最广泛的两
种咖啡，它们都源自于非洲赤道森林区域。 The two most widely
cultivated species of coffee, *Coffea arabica* (commonly referred to as arabica)
and *Coffea canephora* (commonly referred to as robusta) are both indigenous
to African equatorial forests.

证据显示，阿拉比卡咖啡约在 **35 万至 61 万** 年前，起源于现今
的埃塞俄比亚以及南苏丹一带。 Evidence suggests that arabica coffee
emerged in areas now known as Ethiopia and South Sudan 350,000–610,000
years ago.

罗布斯塔的栽培则是起源于现今的刚果民主共和国，最早的种植
转移纪录约在 **1870 年**。 The cultivation of robusta began in today's
Democratic Republic of the Congo. The first documented plant transfer and
cultivation took place around 1870.

[Pendergrast, "Uncommon Grounds: The History of Coffee and How It Transformed Our World."](#)

[Topik, "The World Coffee Market in the Eighteenth and Nineteenth Centuries, from Colonial to National Regimes."](#)

[Sedgewick, "Coffeeland: One Man's Dark Empire and the Making of Our Favorite Drug."](#) (Link to Book Preview)

[Johnson, "The Triumph: Black Brazilians in Coffee."](#) (Link to Publication Information)

[Fischer, "Making Better Coffee: How Maya Farmers and Third-Wave Tastemakers Create Value."](#) (Link to Book Preview)

更多关于阿拉比卡与罗布斯塔的详情，请参考 **1.02.04**。 *Arabica and robusta are discussed in more detail in 1.02.04.*

咖啡从非洲经由也门传播至阿拉伯半岛，再扩展至伊斯兰世界，包括波斯、埃及、土耳其与北非地区。在十六世纪，咖啡已广泛流行，并被视为一项具有高贸易价值的商品。 Coffee spread from Africa to the Arabian Peninsula via Yemen. From there, coffee spread throughout the Islamic world to Persia, Egypt, Turkey, and North Africa. It gained popularity throughout the sixteenth century and became recognized as a lucrative trade item.

咖啡在十七世纪传入欧洲，由于咖啡的商业潜力，欧洲人于十七世纪末将咖啡引入印度与印度尼西亚，并于十八世纪传入中南美洲。如今，全球有超过 50 个国家生产咖啡，而其中许多国家最初引入咖啡皆与殖民有关。 Coffee arrived in Europe in the 1600s. Motivated by the commercial potential of coffee, Europeans brought coffee to India and Indonesia in the late 1600s and to Central and South America in the 1700s. Today, coffee is produced in more than 50 countries and originally arrived in many of these places due to colonial relationships.

讲师可以通过以下相关话题延伸探讨，例如：*Trainers may expand the conversation by exploring related topics. For example:*

- 提供更多关于咖啡与殖民主义的背景信息，许多殖民国家曾奴役或剥削原住民，并在中南美洲、加勒比海地区、非洲和亚洲生产咖啡与其他奢侈作物，这些历史关系至今仍影响着咖啡产业内的权力动态。 *Provide additional context on the connections between coffee and colonialism. Many colonizing countries enslaved or exploited indigenous people to produce coffee and other luxury crops in Central and South America, the Caribbean, Africa, and Asia. These historical relationships still shape power dynamics in the coffee sector today.*
- 探讨咖啡历史中的传说故事与神话（如卡尔迪的故事）及其影响。 *Explore the role of stories and myths in coffee's history (e.g., Kaldi) and their impacts.*
- 讨论全球重大事件对咖啡产业的影响（例如：海地革命后咖啡产业的衰退为巴西和荷兰殖民者在爪哇创造了市场机会）。 *Discuss the impacts of major global events on the coffee industry (e.g., the decline of coffee in Haiti following the Haitian revolution created a market opening for Brazil and for Dutch colonists in Java).*

[Combrink, "Slave-Based Coffee in the Eighteenth Century and the Role of the Dutch in Global Commodity Chains."](#)

例题：

下列何者最适合填入以下句子？证据显示阿拉比卡咖啡的起源地即现今的_____。

埃塞俄比亚与南苏丹

哥伦比亚与委内瑞拉

巴西与玻利维亚

肯尼亚与坦桑尼亚

Sample Question:

Which of the following best completes this sentence? Evidence suggests that arabica coffee originated in areas now known as _____.

Ethiopia and South Sudan

Colombia and Venezuela

Brazil and Bolivia

Kenya and Tanzania

咖啡种植区域 (1.02.02) Coffee-Growing Regions (1.02.02)

学习目标： Learning Objectives:

1. 认识到咖啡通常生长在热带地区。 Recognize that coffee is typically produced in the tropics.
2. 认识到巴西是现今最大的咖啡生产国。 Recognize that Brazil is the largest producer of coffee today.
3. 认识到越南是现今最大的罗布斯塔咖啡生产国。 Recognize that Vietnam is the largest producer of robusta coffee today.

咖啡通常生长于北回归线与南回归线之间的地区。 Coffee is typically produced in areas located between the Tropics of Cancer and Capricorn.

目前，南美洲是全球最大的咖啡产区，巴西每年的咖啡总产量和阿拉比卡咖啡产量均位居世界第一。 Today, South America is the largest regional producer of coffee. Brazil produces more coffee (overall) and more arabica coffee per year than any other country.

亚洲、大洋洲、非洲以及中美洲每年也都生产大量咖啡，越南是目前全球最大的罗布斯塔咖啡生产国。 Asia and Oceania, Africa, and Central America also produce large quantities of coffee annually. Vietnam is currently the largest producer of robusta coffee.

[International Coffee Organization. "Coffee Report and Outlook."](#)

例题：

下列叙述是否正确？ 咖啡通常生长于北回归线与南回归线之间的地区。

正确

错误

Sample Question:

Is the following statement true or false? Coffee is typically produced in areas located between the Tropics of Cancer and Capricorn.

True

False

例题：

哪一个国家是全球最大的咖啡生产国？

巴西

越南

哥伦比亚

洪都拉斯

Sample Question:

Which country is the world's largest producer of coffee?

Brazil

Vietnam

Colombia

Honduras

季节性、种植，以及采收 (1.02.03) Seasonality, Farming, and Harvesting (1.02.03)

学习目标： Learning Objectives:

1. 认识到咖啡是一种农业商品。 Recognize that coffee is an agricultural commodity.
2. 说明咖啡是一种季节性作物。 State that coffee is a seasonal crop.
3. 列出与咖啡种植有关的主要工作。 List the primary tasks associated with coffee farming.
4. 认识到咖啡樱桃采收技术的多样性，包含人工采摘和机械化方法。 Recognize that a variety of coffee cherry harvesting techniques exist, including selective harvesting by hand and mechanized approaches.
5. 说明咖啡豆是种子，而种子位于咖啡樱桃内部。 State that coffee beans are seeds, and that these seeds are found inside coffee cherries.

咖啡种植包括种植、管理咖啡树，以及采摘咖啡樱桃。Coffee farming consists of planting and tending coffee plants, as well as harvesting coffee cherries.

Specialty Coffee Association, "SCA Coffee Systems Map."

讲师可以描述咖啡树、咖啡樱桃以及咖啡种子的特征，并尽可能提供视觉辅助教材。Trainers may describe characteristics of the coffee plant, the coffee cherry, and coffee seeds. Provide visuals when possible.

例题：

下列哪两项工作最常与咖啡种植有关联？

种植与管理咖啡树

采摘咖啡樱桃

从咖啡樱桃中去除咖啡种子的外层

晒干咖啡种子

Sample Question:

Which two of the following tasks are most often associated with coffee farming?

Planting and tending coffee plants

Harvesting coffee cherries

Removing the layers of the coffee cherry from the coffee seeds

Drying the coffee seeds

咖啡物种与品种 (1.02.04) Coffee Species and Varieties (1.02.04)

学习目标：Learning Objectives:

1. 识别两种最被广泛栽培的咖啡物种。Identify the two most widely cultivated species of coffee.
2. 认识到有其他咖啡物种的存在，这些物种同样适合栽种。Recognize that other species of coffee exist as well and can be cultivated.
3. 描述阿拉比卡咖啡与罗布斯塔咖啡在种植条件与咖啡因含量上的基本差异。Describe the basic differences between arabica and robusta in terms of growing conditions and caffeine levels.
4. 认识咖啡有许多不同品种（亚种）。Recognize that many different varieties (subspecies) of coffee exist.
5. 描述阿拉比卡咖啡与罗布斯塔咖啡在感官属性上的基本差异。Describe the basic differences between arabica and robusta in terms of sensory attributes.

阿拉比卡咖啡与罗布斯塔咖啡是最广泛种植的两大咖啡物种，还有许多其他物种同样适合栽种。Arabica and robusta are the most widely cultivated species of coffee. Other species exist and can be cultivated.

[International Trade Centre, "The Coffee Guide."](#) (Also available for download in French, Spanish, Portuguese, and Amharic).

[Holler and Kawuki, "The Roots of Robusta."](#)

阿拉比卡咖啡与罗布斯塔咖啡在种植条件、咖啡因含量、感官属性等方面各有不同。然而，由于每个物种的多样性和杂交品种的日益增加，这些差异难以全面概括。Arabica and robusta vary in terms of growing conditions, caffeine levels, sensory attributes, etc. However, it is difficult to generalize given the diversity within each species and the increasing presence of hybrids.

一般而言，罗布斯塔咖啡的咖啡因含量高于阿拉比卡咖啡，并且通常生长在较低海拔的地区，而阿拉比卡咖啡通常比罗布斯塔具有更强的酸度与甜度，罗布斯塔咖啡则通常具有浓郁的风味与顺滑的口感。Robusta typically contains higher levels of caffeine than arabica and is typically grown at a lower altitude. Arabica typically displays higher-intensity acidity and sweetness than robusta, while robusta typically displays a strong flavor and a smooth mouthfeel.

讲师可以展示阿拉比卡与罗布斯塔的生豆或熟豆样品。 Trainers may show examples of green or roasted arabica and robusta beans.

活动：物种品尝 Activity: Species Tasting

讲师可以单独进行此活动，或与活动 1.03.01 与 1.05.01 结合进行。 Trainers may present this activity separately or combined with Activities 1.03.01 and 1.05.01.

使用滴滤式咖啡机或手冲器具分别冲煮一款阿拉比卡咖啡与一款罗布塔咖啡。或者，讲师可以准备基本的杯测，并在活动开始前介绍杯测方法。 Brew one arabica coffee and one robusta coffee using a batch brewer or manual device. Alternatively, trainers may prepare a basic cupping and introduce learners to cupping practices before beginning the activity.

这两款咖啡应展现出该物种常见的感官属性。(阿拉比卡咖啡应展现中到强度的酸质、中到强度的甜度，而罗布斯塔咖啡应展现低到中度的酸质、低到中度的甜度)，咖啡不应有任何瑕疵。 The coffees should display sensory attributes commonly associated with each species. (The arabica coffee should display a medium- to high-intensity acidity and medium- to high-intensity sweetness, and the robusta coffee should display a low- to medium-intensity acidity and a low- to medium-intensity sweetness). The coffees should not contain defects.

请学员品尝这两款咖啡，并思考它们的相似与相异之处，接着进行小组讨论。 Ask learners to taste the two coffees and reflect on their similarities and differences. Discuss as a group.

例题：

下列叙述是否正确？相较于罗布斯塔咖啡，阿拉比卡咖啡通常生长于海拔较高的地区。

正确

错误

Sample Question:

Is the following statement true or false? Compared to robusta, arabica is generally grown at a higher altitude.

True

False

1.03 | 章节 | 加工处理 Section | PROCESSING

1 个主题 Topic

处理及处理法 (1.03.01) Processing and Processing Methods (1.03.01)

学习目标：Learning Objectives:

1. 简单说明咖啡处理的目的。 Explain, in basic terms, the purpose of coffee processing.
2. 认识到有多种咖啡处理法。 Recognize that a wide variety of processing methods exist.
3. 认识到处理法会影响咖啡的感官属性。 Recognize that the processing method can impact a coffee's sensory attributes.
4. 描述日晒咖啡（果实干燥）与水洗咖啡（羊皮层干燥）在感官属性上的基本差异。
Describe the basic differences between a natural process (fruit-dried) coffee and a washed process (parchment-dried) coffee in terms of sensory attributes.

咖啡处理是让咖啡种子能够稳定运输和储存的关键过程，同时对咖啡的风味特征产生显著影响。 Processing involves preparing coffee seeds for stable transportation and storage. A coffee's processing method can have a substantial impact on that coffee's flavor profile.

虽然日晒与水洗处理法较为常见，但实际上还有许多其他不同的处理法，且生产者持续创新开发新的处理方式。 While natural and washed process coffees are common, a wide variety of processing methods exist. Producers continue to innovate and develop new approaches.

讲师可以展示不同处理法的生豆样品。 Trainers may show examples of green coffee processed in different ways.

Specialty Coffee Association, "SCA Coffee Systems Map."

[Sanz-Urbe et al., "Postharvest Processing—Revealing the Green Bean."](#) (Link to Book Preview)

[Carvalho Ferreira et al., "Coffee Fermentation Process: A Review."](#)

[Zhang and De Bruyn, "The Fermentation Effect."](#)

活动：品尝不同的处理法 Activity: Processing Tasting

讲师可以单独进行此活动，或与活动 1.02.04 与 1.05.01 结合进行。Trainers may present this activity separately or combined with Activities 1.02.04 and 1.05.01.

使用滴滤式咖啡机或手冲器具分别冲煮一款日晒咖啡（果实干燥）与一款水洗咖啡（羊皮层干燥）。或者，讲师可以准备基本的杯测，并在活动开始前介绍杯测的方法。这两款咖啡应展现出该处理法典型的感官属性（日晒处理的咖啡应具有莓果及 / 或果干的香气与风味，以及较强烈的口感；而水洗处理咖啡则应具有坚果、可可、甜味及 / 或柑橘类的香气与风味，以及较低的口感强度。）咖啡**不应**有任何瑕疵。Brew one natural (fruit-dried) coffee and one washed (parchment-dried) coffee using a batch brewer or manual device. Alternatively, trainers may prepare a basic cupping and introduce learners to cupping practices before beginning the activity. The coffees should display sensory attributes commonly associated with each processing method. (The natural coffee should display berry and/or dried fruit aromas and flavors and a higher-intensity mouthfeel, while the washed coffee should display nutty, cocoa, sweet, and/or citrus aromas and flavors and a lower-intensity mouthfeel.) The coffees should not contain defects.

请学员品尝这两款咖啡，并思考它们的相似与相异之处，接着进行小组讨论。Ask learners to taste the two coffees and reflect on their similarities and differences. Discuss as a group.

例题：

下列叙述是否正确？咖啡的处理法对其最终风味特征影响甚微，或几乎没有影响。

正确

错误

Sample Question:

Is the following statement true or false? A coffee's processing method has little to no impact on that coffee's flavor profile.

True

False

1.04 | 章节 | 出口与进口 Section | EXPORTING & IMPORTING

1 个主题 Topic

出口与进口 (1.04.01) Exporting and Importing (1.04.01)

学习目标： Learning Objectives:

1. 列出与出口有关的主要工作。 List the primary tasks associated with exporting.
2. 列出与进口有关的主要工作。 List the primary tasks associated with importing.

出口是指安排咖啡从原产国出境，而进口则包括管理物流以确保咖啡顺利抵达目的地国家。无论是出口还是进口，都需要精心协调并承担一定的财务风险。 Exporting involves arranging coffee's departure from its country of origin, while importing involves managing logistics to receive coffee in its destination country. Both exporting and importing involve detailed coordination and absorbing financial risk.

Specialty Coffee Association,
"SCA Coffee Systems Map."

例题：

下列哪项工作最常与出口相关？

安排咖啡从原产国出境

准备咖啡种子，以确保稳定运输与储存
协调物流以确保咖啡到达目的地国家
采摘咖啡樱桃

Sample Question:

Which of the following tasks is most often associated with exporting?

Arranging coffee's departure from its country of origin

Preparing coffee seeds for stable transportation and storage
Coordinating logistics to receive a coffee in its destination country
Harvesting coffee cherries

1.05 | 章节 | 烘焙、储存及新鲜度 Section | ROASTING, STORAGE, & FRESHNESS

2 个主题 Topics

烘豆基础 (1.05.01) Roasting Basics (1.05.01)

学习目标 Learning Objectives:

1. 列出并描述烘焙过程的基本阶段，并且能以正确顺序排列各阶段。° List and describe the basic stages of the roasting process, placing the stages in the correct order.
2. 认识到烘焙会改变咖啡豆的颜色与大小。° Recognize that roasting causes changes in the color and size of coffee beans.
3. 认识到烘豆专业人士可以通过调整时间与温度来创造多样的烘焙风味。° Recognize that a roasting professional can adjust time and temperature to create a variety of roast profiles.
4. 描述浅焙咖啡与深焙咖啡在感官属性上的基本差异。° Describe basic differences between a lighter-roasted coffee and a darker-roasted coffee in terms of sensory attributes.

讲师可以为学员介绍烘豆基本生产步骤与使用的设备。° Trainers may introduce learners to basic production steps and equipment used to roast coffee.

[Schenker and Rothgeb, "The Roast—Creating the Beans' Signature." \(Link to Book Preview\)](#)

烘焙阶段包含：干燥、转黄、一爆、二爆和冷却。在整体烘焙过程中，咖啡豆的颜色与大小都会产生变化。° The stages of roasting include drying, yellowing, first crack, second crack, and cooling. Coffee beans change in color and size throughout the roasting process.

改变烘焙时间及 / 或温度，可使咖啡豆产生不同的感官风味属性。° Changing the roasting time and/or temperature can result in a coffee that has different sensory attributes.

活动：品尝不同的烘焙程度 Activity: Roast Level Tasting

讲师可以单独进行此活动，或与活动 1.02.04 与 1.03.01 结合进行。° Trainers may present this activity separately or combined with Activities 1.02.04 and 1.03.01.

使用滴滤式咖啡机或手冲器具分别冲煮一款浅焙咖啡与一款深焙咖啡，或者，讲师可以准备基本的杯测，并在活动开始前介绍杯测的方法。这两款咖啡应展现出该烘焙方法典型的感官属性（浅焙应该具有果香、花香及 / 或甜香与风味，深焙则应呈现烘烤与坚果的香气与风味）咖啡不应有任何瑕疵。° Brew one lighter-roasted coffee and one darker-roasted coffee using a batch brewer or manual device. Alternatively, trainers may prepare a basic cupping and introduce learners to cupping practices before beginning the activity. The coffees should display sensory attributes commonly associated with each roasting approach. (The lighter roast should display fruity, floral, and/or sweet aromas and flavors, and the darker roast should display roasted and nutty aromas and flavors). The coffees should not contain defects.

请学员品尝这两款咖啡，并思考它们的相似与相异之处，接着进行小组讨论。° Ask learners to taste the two coffees and reflect on their similarities and differences. Discuss as a group.

例题：

请选择烘焙阶段的正确顺序。

干燥 > 转黄 > 一爆 > 二爆 > 冷却

干燥 > 转黄 > 冷却 > 二爆 > 一爆

冷却 > 转黄 > 一爆 > 二爆 > 干燥

转黄 > 一爆 > 干燥 > 二爆 > 冷却

Sample Question:

Select the answer that lists the correct order of the stages of roasting.

Drying > Yellowing > First crack > Second crack > Cooling

Drying > Yellowing > Cooling > Second crack > First crack

Cooling > Yellowing > First crack > Second crack > Drying

Yellowing > First crack > Drying > Second crack > Cooling

例题：

如何烘焙咖啡才能最大化其酸度？

浅烘焙

深烘焙

高温烘焙

缓慢烘焙

Sample Question:

How would you roast a coffee to maximize its acidity?

Roast light in color

Roast dark in color

Roast at a high temperature

Roast slowly

储存及新鲜度 (1.05.02) Storage and Freshness (1.05.02)

学习目标：Learning Objectives:

1. 描述咖啡熟豆的理想储存条件。 Describe the ideal storage conditions for roasted coffee.
2. 列出对咖啡新鲜度有负面影响的因素。 List factors that have a negative impact on coffee freshness.

光线、氧气、热与湿气会降低咖啡的新鲜度，并加速咖啡走味的过程。一般而言，咖啡熟豆应存放在阴凉、黑暗处，并置于密封容器中保存。 Light, oxygen, heat, and moisture reduce coffee freshness and increase the rate of staling. Generally, roasted coffee should be stored in a cool, dark place in an airtight container.

例题：

以下哪些因素会对咖啡熟豆的质量有负面影响？（请选择所有适用选项）

光线

氧气

热

湿气

Sample Question:

Which of the following have a negative impact on the quality of your roasted coffee? (Select all that apply.)

Light

Oxygen

Heat

Moisture

1.06 | 章节 | 感官评估基础 Section | SENSORY ASSESSMENT BASICS

2 个主题 Topics

感官评估以及杯测的角色 (1.06.01) Role of Sensory Assessment and Cupping (1.06.01)

学习目标 Learning Objectives:

1. 列出五种人类感官。 List the five human senses.
2. 解释为何感官评估是有效评估咖啡不可或缺的一环。 Explain why sensory assessment is necessary to effectively evaluate coffee.
3. 列举咖啡专业人士使用风味评估做为决策工具的情境。 List situations in which coffee professionals use flavor assessment as a decision-making tool.
4. 定义杯测一词。 Define the term cupping.

人类的五种感官为：视觉、嗅觉、触觉、味觉以及听觉。 The five human senses are sight, smell, touch, taste, and hearing.

感官评估有助于咖啡专业人士辨别理想的咖啡感官属性，品尝是一种更透彻了解咖啡风味的方式。 Sensory assessment helps coffee professionals identify desirable sensory attributes in coffee. Tasting is one way to better understand a coffee's flavor.

咖啡专业人士在多种情境中使用风味评估作为决策工具，包含选择特定农场种植咖啡的位置、选择种植的咖啡品种、採用何种加工处理方法、设计烘焙曲线，以及选择冲煮方式。 Coffee professionals use flavor assessment as a decision-making tool in a variety of

[Fernández-Alduenda and Giuliano, Coffee Sensory and Cupping Handbook.](#)
(Link to Publication Information)

[Specialty Coffee Association, "A System to Assess Coffee Value: Understanding the Specialty Coffee Association's Coffee Value Assessment."](#)

situations, including where to plant coffee on a particular farm, which variety of coffee plant to grow, which processing method to apply, which roast curve to use, and which brewing method to use.

杯测是一种咖啡感官评估的方法，此方法涉及品嚐每个咖啡样品数杯，每杯使用独立的一份咖啡豆，并分别进行研磨与冲煮。杯测的目的可以是为了进行描述性评估、情感性评估，或同时结合两者进行综合评估。Cupping is a method for the sensory assessment of coffee. It involves tasting several cups per coffee sample, using a different set of coffee beans for each cup. Each cup is ground and brewed independently. The purpose of a cupping may be to do a descriptive assessment, an affective assessment, or both (combined).

例题：

下列何种情形下，咖啡专业人士会将风味评估做为决策工具？（请选择所有适用选项）

选择种植的咖啡品种

挑选一种处理方法

决定如何烘焙咖啡

改善冲煮配方

Sample Question:

In which of the following situations do coffee professionals use flavor assessment as a decision-making tool? (Select all that apply.)

Choosing a variety of coffee to grow

Selecting a processing method

Deciding how to roast a coffee

Refining a brewing recipe

味道与风味 (1.06.02) Taste and Flavor (1.06.02)

学习目标 Learning Objectives:

1. 认识到咖啡是一种复杂的产品，拥有多种不同的味道、香气以及触觉。Recognize that coffee is a complex product that has many different tastes, aromas, and tactile sensations.
2. 识别对风味感知最重要的三种人类感官。Identify the three human senses that contribute most to the perception of flavor.
3. 认识到风味感知有很大一部分来自于嗅觉。Recognize that a large part of flavor perception comes from the sense of smell.
4. 识别对咖啡风味影响最大的两种基本味道。Identify the two basic tastes that have the greatest impact on a coffee's flavor.

嗅觉、味觉，以及触觉（或「口感」）为风味感知的核心，因此在咖啡感官评估中扮演着重要的角色。Smell, taste, and touch (or

[Fernández-Alduenda and Giuliano, Coffee Sensory and Cupping Handbook.](#)

"mouth-sense") are central to the perception of flavor and therefore play an important role in the sensory assessment of coffee.

(Link to Publication Information)

酸与苦是咖啡中最强烈的两种基本味道。 Sourness and bitterness are the most intense basic tastes in coffee.

讲师可以为学员介绍精品咖啡产业的感官评估工具，例如：咖啡品鉴师的风味轮，以及咖啡价值评估的描述性与情感性表格。

Trainers may introduce learners to sensory assessment tools in the specialty coffee industry like the Coffee Taster's Flavor Wheel and the Coffee Value Assessment Descriptive and Affective Forms.

例题：

下列叙述是否正确？风味感知有很大一部分来自于嗅觉。

正确

错误

Sample Question:

Is the following statement true or false? A large part of flavor perception comes from the sense of smell.

True

False

1.07 | 章节 | 水质、冲煮及维护 Section | WATER, BREWING, & MAINTENANCE

4 个主题 Topics

水质 (1.07.01) Water (1.07.01)

学习目标：Learning Objectives:

1. 认识冲煮后的咖啡饮品主要由水组成。 Recognize that brewed coffee is comprised mostly of water.
2. 认识水质会影响咖啡饮品的感官属性，以及冲煮设备的健康状况。 Recognize that water quality will affect the sensory attributes of the brewed coffee, as well as the health of the brewing equipment.
3. 认识氯气会导致水产生令人不舒服的气味。 Recognize that chlorine can result in an unpleasant smell in water.
4. 列举用于咖啡冲煮的水质主要参数。 List key parameters for water used to brew coffee.

咖啡萃取用水应：(1) 无异味且卫生 (2) pH 值在 6 至 8 之间 (3) 不含铁、铅、氯或其他不适合或有毒的化合物。 Water for coffee extraction should (1) be odor free and hygienic, (2) have a pH of between

[Specialty Coffee Association. The SCA Water Quality Handbook.](#)
(Link to Publication Information)

6–8, and (3) be free of iron, lead, chlorine or other unsuitable or toxic compounds.

讲师可以通过展示水中化合物会如何损坏设备零件，或通过使用不同水质冲煮咖啡并与学员一起品尝比较，来展示说明水质的影响。° Trainers may demonstrate the impacts of water by showing examples of equipment components damaged by compounds in water or by brewing one coffee using different water samples and tasting the differences with learners.

例题：

SCA建议冲煮咖啡用水的水质 pH 范围是多少？

6–8

5–7

7–9

无具体建议

Sample Question:

What range of pH does the SCA recommend for water for coffee extraction?

6–8

5–7

7–9

There is no recommendation.

冲煮方式 (1.07.02) Brewing Methods (1.07.02)

学习目标：Learning Objectives:

1. 列出五种冲煮方法，并指出各自对应的设备。° List five brewing methods and identify a device that uses each.
2. 认识到不同的冲煮方法有时需要不同的参数。° Recognize that different brewing methods sometimes require different parameters.

冲煮设备使用下列一种或多种基本方法，从经过烘焙、研磨的咖啡粉中萃取化合物：A brewing device uses one or more of the following basic methods to extract compounds from roasted, ground coffee:

- 煮沸（煎煮法）Boiling (Decoction)

例如：土耳其咖啡壶 e.g., Ibrik

- 重力（滴滤法）Gravity (Drip) Filter

例如：自动滴滤式咖啡机 e.g., Automatic Batch Brewer

- 压力Pressure

例如：意式咖啡机 e.g., Espresso Machine

- 浸泡（闷煮法）Immersion (Steeping)

[Mestdagh, Glabasnia, and Giuliano, "The Brew—Extracting for Excellence."](#)
(Link to Book Preview)

例如：法式滤压壶 *e.g., French Press*

- 真空 Vacuum

例如：虹吸壶 *e.g., Siphon*

有些冲煮方法或设备可能需要特定参数（例如：特定的研磨度或冲煮时间）。Some brew methods or devices may require certain parameters (e.g., a particular grind size or brew time).

讲师可以展示或示范操作不同类型的冲煮设备。建议讲师将一个以上的冲煮活动融入课程中，以提升学员的参与感。Trainers may show examples of or demonstrate different types of brewing devices. Trainers are encouraged to incorporate one or more brewing activities into the course to increase learner engagement.

例题：

下列叙述是否正确？不同的冲煮方法或设备可能需要不同的研磨度。

正确

错误

Sample Question:

Is the following statement true or false? Different brew methods or devices may require different grind sizes.

True

False

冲煮核心原则 (1.07.03) Key Brewing Principles (1.07.03)

学习目标 Learning Objectives:

1. 说明 SCA 对滤泡式咖啡的咖啡与水量比例的建议。State the coffee-to-water ratio recommended by the SCA for filter coffee brewing.
2. 说明 SCA 对滤泡式咖啡的水温建议范围。State the temperature range for brewing filter coffee recommended by the SCA.
3. 辨别冲煮咖啡的常见过滤材料类型。Identify common types of filters that are used to brew coffee.
4. 认识到咖啡研磨后应尽快进行冲泡。Recognize that coffee should be brewed as soon as possible after grinding.
5. 定义萃取一词，并描述如何通过调整研磨度来增加或减少萃取。Define the term extraction and describe how to increase or decrease extraction using grind size.
6. 认识到过度萃取的咖啡通常带有苦味，而萃取不足的咖啡通常带有酸味。Recognize that overextracted coffees tend to taste bitter, while underextracted coffees tend to taste sour.

SCA 对滤泡式咖啡建议的水粉比为：每公升的水使用 **50 到 60** 克的咖啡粉。The SCA recommends a coffee-to-water ratio of 50–60g of coffee per liter of water for filter coffee brewing.

滤泡式咖啡的建议冲煮水温范围为 **90–96°C**，也可以使用常温水或更低温的水冲泡冷萃咖啡，则其萃取时间一般为 **8 到 24 小时**。The recommended temperature range for brewing filter coffee using hot water is 90–96°C. However, it is also possible to brew coffee with water at room temperature or colder (cold brew), with typical brewing times ranging from 8 to 24 hours.

常见的过滤材料类型包括：纸、布以及金属，冷萃咖啡也会使用塑料过滤材质。Common types of filters include paper, cloth, and metal. Plastic filters are also used for cold brew.

萃取是指用水将可溶性物质从研磨后的咖啡粉中萃取出来，研磨咖啡豆是控制萃取不可或缺的一环。Extraction refers to the act of using water to draw soluble material from ground coffee. Grinding coffee beans is necessary for a controlled extraction.

通常而言，较细的研磨度能够促进更多化合物的萃取，而较粗的研磨度则因为咖啡与水之间的接触面积较小。Generally, a finer grind size enhances the extraction of compounds, while a coarser grind size reduces the extraction due to reduced contact area between the coffee and water.

[Mestdagh, Glabasnia, and Giuliano, "The Brew—Extracting for Excellence."](#)
(Link to Book Preview)

[Liang et al., "Sensory Analysis of the Flavor Profile of Full Immersion Hot, Room Temperature, and Cold Brewed Coffee Over Time."](#)

[Córdoba et al., "Effect of Grinding, Extraction Time and Type of Coffee on the Physicochemical and Flavour Characteristics of Cold Brew Coffee."](#)

例题：

建议用于冲煮滤泡式咖啡的水温范围为多少？

90–96°C/195–205°F

85–88°C/185–190°F

100°C/212°F

85°C/185°F

Sample Question:

What water temperature is recommended for brewing hot filter coffee?

90–96°C/195–205°F

85–88°C/185–190°F

100°C/212°F

85°C/185°F

例题：

下列哪种方式能提高咖啡的萃取率？

较粗的研磨度

增加水量

增加咖啡粉量

较细的研磨度

Sample Question:

Which of the following will increase extraction?

A coarser grind size

Adding more water

Adding more coffee

A finer grind size

维护与清洁 (1.07.04) Maintenance and Cleaning (1.07.04)

学习目标 Learning Objectives:

1. 认识到定期清洁设备的重要性。Recognize the importance of cleaning equipment regularly.
2. 定义**预防性维护**一词。Define the term preventive maintenance.
3. 定义**应急性维护**一词。Define the term reactive maintenance.

例行的定期清洁有助于保持饮品的一致性，并延长咖啡设备的使用寿命。A regular cleaning routine helps drink consistency and extends the life of coffee equipment.

预防性维护是指定期且例行性的维修保养，以确保系统正常运作并减少设备意外故障的发生。Preventive maintenance refers to regular and routine service performed to maintain proper system function and reduce unexpected equipment failure.

应急性维护是指对已发生故障的设备进行非计划性维修，目的是恢复系统正常运作。Reactive maintenance refers to unplanned repair of equipment that has failed to restore proper system function.

*讲师可透过分享其自身专业经验的案例或故事，来说明清洁及 / 或预防性维护的重要性。
Trainers may give examples or anecdotes from their professional experience that demonstrate the importance of cleaning and/or preventive maintenance.*

例题：

下列叙述是否正确？定期执行例行清洁可有效维持饮品品质的一致性，并延长咖啡设备的使用寿命。

正确

错误

Sample Question:

Is the following statement true or false? A regular cleaning routine helps drink consistency and extends the life of coffee equipment.

True

False

附录 A：远距教学指南 Appendix A: Guidelines for Distance Learning

SCA 建议参加完全在线课程的学员，使用批量滴滤式咖啡机、手冲设备或单次份量产品（例如浸泡式咖啡）来准备四个品鉴活动。The SCA recommends that learners participating in a fully online course use a batch brewer, a manual device, or a set of individually portioned products (e.g., coffee that can be steeped) to prepare the four tasting activities.

当采用在线方式进行授课时，讲师应：When conducting an online course, trainers should:

- 在学员注册课程后，儘早通知学员所需设备清单，讲师可选择提供设备或请学员自行准备。Communicate the list of required equipment to learners as soon as they register for the course. Trainers may provide equipment or ask learners to procure equipment on their own.
- 为确保一致性，培训师可以向学员发送他们将在每个活动中使用的咖啡样品。（在学员注册课程时询问他们的邮寄地址，并及时邮寄物资箱，确保学员在课程开始前收到。）To ensure consistency, trainers may send the learners samples of the coffees they will use in each activity. (Ask for the learner's mailing address when they register for the course and mail the supply box in time for learners to receive the box before the course.)
 - 样品应事先研磨以方便学员使用，并确保一致性达到最佳效果。Samples should be pre-ground for the learner's convenience and to maximize consistency.
 - 样品应分别包装在有单独立编码且密封的袋中，每个包装分别对应四个活动。建议提供足量样品，以便学员在必要时能重複进行活动（以防出错）。Samples should be packaged in individually coded, sealed bags for each of the four activities. Consider providing enough of each sample so the learner can do the activity twice (in case they make a mistake).
 - 包括下列活动所需的样品：Include samples for the following activities:
 - 活动 1.01.03 Activity 1.01.03
 - 活动 1.02.04 Activity 1.02.04
 - 活动 1.03.01 Activity 1.03.01
 - 活动 1.05.01 Activity 1.05.01
- 培训师也可以要求学员自行行为活动准备咖啡。在这种情况下，培训师应为学员提供指导和建议，以确保学员选择的咖啡具备每个活动所需的适当属性。查看活动描述以获取学员需要准备的咖啡类型的详细信息。Trainers may alternatively ask learners to source coffees for the activities on their own. In this case, trainers should provide guidance and recommendations to learners to ensure that the coffees learners source contain the appropriate attributes for each activity. Review the activity descriptions for details on the types of coffees learners need to source.

- 在进行线上课程活动时，讲师应先示范如何准备样品。提供明确的指导，告知学员咖啡与水的用量、水温以及冲泡时间。When facilitating the activities during an online course, first demonstrate how to prepare the samples. Provide clear guidance on the quantities of coffee and water, the water temperature, and the brew time to use.
- 每次活动结束后，请给予学员足够的时间清洁设备并准备材料，以进行下一个活动。Once an activity is complete, allow time for learners to clean and reset their supplies before the next activity.
