一般信息 General Information

工作坊时长：至少 3.5 小时 Workshop Length: 3.5 Hours Minimum

先修课程：无 Prerequisite(s): None

本课程包括现场授课与实作活动。每个章节的预计时长可依班级规模调整。Content is delivered via in-person lecture and practical activities. Time estimates for each section may vary by class size.

工作坊说明与学习目标 Workshop Description and Learning Objectives

咖啡杯测入门工作坊旨在为非杯测者（无杯测经验的咖啡专业人士及消费者）提供工具，协助他们分析并自述对于咖啡的感官感知。本工作坊专为初学者量身设计，提供友善的支持性环境，引导学员探索咖啡评估的世界。本工作坊采理论与实务并行的方式，让学员透过参与品尝与实作活动，有效学习评估咖啡感官属性的实用技巧。The Intro to Cupping Workshop provides non-cuppers (coffee professionals without cupping experience, consumers) with tools to analyze and describe their sensory perceptions of coffee. Specifically tailored to beginners, the workshop provides a welcoming and supportive environment to explore the world of coffee evaluation. Participants will learn practical techniques to assess coffee's sensory attributes through engaging tastings and hands-on activities, bridging theory with practice.

完成本工作坊后，学员将能够：After completing this workshop, learners will be able to...

- 用自己的话定义杯测一词，并列两到三个例子，说明咖啡价值链的各个专业领域如何使用杯测法。Define the term cupping in their own words and list two to three examples of how cupping is used in professional settings across the coffee value chain.
- 解释属性的概念，并说明属性如何与咖啡的感官评估产生关联。Explain the concept of attributes and how attributes relate to the sensory assessment of coffee.
- 定义并区分不同杯测评项：干香、湿香、风味、余韵、酸质、甜感、口感以及整体性。Define and differentiate among the various cupping sections: Fragrance, Aroma, Flavor, Aftertaste, Acidity, Sweetness, Mouthfeel, and Overall.
- 辨别不同咖啡样本在强度与感官风味特性上的差异。Detect differences in intensity and sensory profile among coffee samples.
- 使用 CATA 列表记录咖啡样本的感官风味特性。Use CATA boxes to document the sensory profile of coffee samples.

- 示范正确的杯测实务，包括：Demonstrate effective cupping practices, including:
 - 使用杯测匙从每个碗中取出一一致的咖啡量进行评估，Use a spoon to evaluate a consistent quantity of coffee from each bowl.
 - 在不同杯子与样本之间彻底清洗杯测匙，Rinse spoons thoroughly in between cups and samples.
 - 请等候前方杯测者完成评估其托盘上的五个样本，并移至下一个托盘后，再开始评估该托盘上的咖啡样本，Wait until the cupper in front of you completes their tray and moves on before evaluating coffees on that tray.
 - 评估同款咖啡在不同温度下的风味，Complete multiple passes to evaluate the coffees at different temperatures.
- 辨别个人偏好的咖啡感官属性，Identify personal preferences in sensory attributes in coffee.
- 使用九分制情感性量表评估咖啡样本，Use the nine-point affective scale to evaluate coffee samples.

工作坊大纲 Workshop Outline

时间 Time	章节 Section	说明 Description
20 分钟 20 Minutes	概论 Introduction	讲师引导学员自我介绍并说明课程相关事项。学员简短讨论杯测实务及其在咖啡价值链中所扮演的角色。The instructor facilitates introductions and shares course logistics. Learners briefly discuss the practice of cupping and its role in the coffee value chain. 重点主题：Key Topics: • 感官评估与属性 Sensory Assessment and Attributes • CVA 标准中的杯测定义 Cupping Definition from CVA Protocol • 说明感官风味特性 vs. 找出个人偏好的咖啡 Describe Sensory Profiles vs. Identify Preferred Coffees
20 分钟 20 Minutes	品尝 #1：干香、湿香、风味以及余韵 Tasting #1: Fragrance, Aroma, Flavor, and Aftertaste	学员在讲师引导下品尝两款咖啡样本，练习如何细分不同感知，以检视干香、湿香、风味和余韵。Through a guided tasting of two coffee samples, learners practice breaking their perception down to examine fragrance, aroma, flavor, and aftertaste. 重点主题：Key Topics: • 干香、湿香、风味以及余韵的定义 Definitions of Fragrance, Aroma, Flavor, and Aftertaste • 介绍 CATA 列表（简化版） Introduction of CATA Lists (Simplified) 活动：品尝两款冲煮咖啡样本，并使用简化版的 CATA 列表记录品评笔记。 Activity: Taste two brewed coffee samples and document notes with simplified CATA lists.
20 分钟 20 Minutes	品尝 #2：酸质、甜感与口感 Tasting #2: Acidity, Sweetness, and Mouthfeel	学员在讲师引导下品尝两款咖啡样本，练习辨别酸质、甜感与口感强度的差异。Through a guided tasting of two coffee samples, learners practice differentiating among intensities in acidity, sweetness, and mouthfeel. 主题涵盖：Topics Covered:

		- 酸质、甜感与口感的定义 Definitions of Acidity, Sweetness, and Mouthfeel - 强度量表概论 Introduction of Intensity Scales 活动：品尝两款冲煮好的咖啡样本，并判断其酸质、甜感与口感的强度为低、中或高。 Activity: Taste two brewed coffee samples and determine whether they have low-, medium-, or high-intensity acidity, sweetness, and mouthfeel.
5 分钟 5 Minutes	休息 Break	
1 小时 1 Hour	杯测 #1 Cupping #1	讲师指导学员进行基础杯测，学员使用简化版的 CATA 列表记录干香、湿香、风味以及余韵，并标记酸质、甜感以及口感的强度（低、中或高）。 The instructor guides learners through a basic cupping. Learners document fragrance, aroma, flavor, and aftertaste using a simplified CATA list and note the intensity (low, medium, or high) for acidity, sweetness, and mouthfeel. 主题涵盖：Topics Covered: 良好杯测实务 Good Cupping Practices 活动：对两款咖啡样本进行杯测，并记录描述词与强度。 Activity: Cup two coffee samples and take notes on descriptors and intensities.
5 分钟 5 Minutes	休息 Break	
1 小时 1 Hour	杯测 #2 Cupping #2	讲师介绍对质量的印象以及九分制情感性量表。接着，学员进行第二轮杯测，重点在于评估每款样本的整体印象。 The instructor introduces impression of quality and the nine-point affective scale. Then, learners move into a second cupping, focusing on evaluating their overall impression of each sample. 主题涵盖：Topics Covered: - 对质量的印象 Impression of Quality - 九分制情感性量表 Nine-Point Affective Scale - 整体性 Overall 活动：对两款咖啡样本进行杯测，并使用九分制情感性量表对每个样本进行整体性评分。学员针对每个样本给出两个整体性评分：一个反映个人偏好，另一个反映其他咖啡饮用者的偏好。 Activity: Cup two coffee samples and assign each sample an overall rating using the nine-point affective scale. Learners assign two overall ratings for each sample—one rating that reflects their own preferences and one rating that reflects the preferences of a different coffee drinker.
20 分钟 20 Minutes	结论 Conclusion	讲师以描述性表格与情感性表格作结，强调学员现已掌握专业人士用来评估咖啡的工具。讲师解答学员问题后结束工作坊。 The instructor closes by showing the Descriptive and Affective Forms and emphasizing that learners are now equipped with the tools that professionals use to evaluate coffee. The instructor addresses learner questions and concludes the workshop.

内容与活动 Content and Activities

以下是工作坊的内容与活动说明。学习目标 (列于每个章节的「学习目标」框中) 描述在完成该主题后学员应该具备的能力。The workshop content and activity descriptions are provided below. The learning objectives (listed in the "Learning Objectives" box for each section) describe what a learner should be able to do by the time they complete that section.

每个章节的备注部分将概述主要讨论要点。部分章节与活动包含具体的教学指导 (以斜体字表示)。少数为建议性质而非强制性的说明，会使用「讲师可以...」或「学员可以...」来表达。活动内容会在指定的橘色方框中说明。The notes in each section outline key talking points. Some sections and activities contain specific teaching instructions (written in *italics*). A few instructions are suggested but not required and are noted using the phrase "Instructors may..." or "Learners may..." Activities are described in designated orange boxes.

讲师可以使用咖啡杯测入门工作坊 1.0 版本 PowerPoint 的部分或全部投影片，讲师可以视需求增加及 / 或调整投影片，以完善工作坊的授课内容。The instructor may use some or all of the slides included in the Intro to Cupping Workshop V1.0 PowerPoint Slides. The instructor may add and/or adapt slides as appropriate to support their delivery of the workshop.

如果预计超过八名学员参加工作坊，建议讲师指派助教在实作活动期间，向学员提供指导与反馈。If an instructor expects more than eight learners in the workshop, the instructor is encouraged to appoint assistants who can help provide guidance and feedback to learners during the practical activities.

所有工作坊活动均包括品尝咖啡。讲师应鼓励学员使用吐杯，避免过度品尝，以管理个人咖啡因摄取量。如果某学员在工作坊期间无法再承受更多咖啡因，剩余活动的品尝部分该学员可以仅在一旁观察，以免饮用过多咖啡。All workshop activities involve tasting coffee. The instructor should encourage learners to use spittoons and avoid over-tasting to manage their caffeine intake. If at any point during the workshop a learner cannot tolerate more caffeine, that learner may observe the tasting components of the remaining activities to avoid consuming more coffee.

讲师在每个活动中应隐藏样本的外在信息 (例如：产地、处理方法)，讲师可于每个活动结束后揭露这些信息，并将其与样本的感官属性链接起来。The instructor should keep samples' extrinsic information (e.g., origin, processing method) hidden during each activity. After each activity, the instructor may reveal this information and make connections to the samples' sensory attributes as appropriate.

本文件概述讲师在工作坊期间必须涵盖的主题、目标以及活动。工作坊的时长必须至少为 3.5 个小时。如果需要，讲师可延长工作坊的时间，并补充相关主题及 / 或活动。This document outlines the mandatory topics, objectives, and activities that the instructor must cover during the workshop. The workshop must be at least 3.5 hours in duration. If they wish, the instructor may lengthen the duration of the workshop and include additional topics and/or activities.

学习目标：Learning Objectives:

- 定义『杯测』一词，并列举两到三个例子，说明咖啡价值链的各个专业领域如何应用杯测法。 Define the term cupping and list two to three examples of how cupping is used in professional settings across the coffee value chain.
- 解释『属性』的概念，并说明属性如何与咖啡的感官评估相关联。 Explain the concept of attributes and how attributes relate to the sensory assessment of coffee.

讲师自我介绍，并欢迎学员参加工作坊。说明课程安排，包括工作坊的时长、休息时间、饮水机或洗手间的位置等。 *Introduce yourself and welcome participants to the workshop. Review course logistics like the length of the workshop, when breaks will occur, where to find water or restrooms, et cetera.*

选择下列其中一道问题（或使用类似的反思问题来开场），并邀请三到四名学员回答： *Select one of the following questions (or use a similar reflection question to open the session) and invite three to four learners to respond:*

- 你报名参加此工作坊的动机为何？ What motivated you to register for this workshop?
- 你希望在本工作坊学习到的具体内容为何？ What's one specific thing you're hoping to learn during this workshop?
- 目前为止，你对杯测有什么了解或听过什么相关信息？ What have you heard or learned so far about cupping?

感官评估很重要，因为它有助于我们发现咖啡的感官属性，属性是某些咖啡的特征，香气、风味、质地.....这些都是我们可以透过感官评估方法发现的感官属性。 *Sensory assessment is important because it helps us discover coffees' sensory attributes. Attributes are characteristics of a certain coffee. Aromas, flavors, textures... all of these are sensory attributes that we can discover through sensory assessment methods.*

咖啡专业人士在许多情境下会使用感官评估做为决策工具，以决定在特定农场的何处种植咖啡、选择适合种植的咖啡品种，以及使用何种加工处理方法、烘焙曲线以及冲煮方式。

Coffee professionals use sensory assessment as a decision-making tool in a variety of situations, including where to plant coffee on a particular farm, which variety of coffee plant to grow, which processing method to apply, which roast curve to use, and which brewing method to utilize.

杯测是一种对咖啡进行感官评估的方法，过程包括品尝多杯相同咖啡样本，每杯使用独立的一组咖啡豆，分开研磨与冲煮。在今天的工作坊中，我们将介绍两种杯测方法。杯测可以用来（1）描述咖啡的感官风味特性，或（2）挑选符合个人或特定目的偏好的咖啡。 *Cupping is a method for the sensory assessment of coffee. It involves tasting several cups per coffee sample, using a different set of coffee beans for each cup. These sets of beans are ground and brewed independently. We'll cover two approaches to cupping in today's workshop. Cupping can be used to (1) describe the sensory profile of a coffee or (2) identify preferred coffees for a particular individual or purpose.*

品尝 #1 Tasting #1

学习目标：Learning Objectives:

- 定义并区别干香、湿香、风味以及余韵。 Define and differentiate among fragrance, aroma, flavor, and aftertaste.
- 辨别不同咖啡样本在感官风味特性上的差异。 Detect differences in sensory profile among coffee samples.
- 使用 **CATA** 列表记录咖啡样本的感官风味特性。 Use CATA boxes to document the sensory profile of coffee samples.

让我们先来探讨第一种杯测方法——描述性评估。在描述性杯测中，杯测者会识别并记录某款咖啡的感官属性，以建立其风味轮廓。当我们采用这种描述性方法时，重点不在于我们是否喜欢这款咖啡，也无关这款咖啡的「好」或「坏」，而是以客观且不带评论的方式，记录我们感知到的感官属性。 Let's start by exploring the first cupping approach—a descriptive approach.

During a descriptive cupping, cuppers identify and document the variety of sensory attributes that comprise a coffee's sensory profile. When we use this descriptive approach, we're not focusing on whether we like the coffee. We're not focusing on whether the coffee is "good" or "bad." Rather, we're objectively and without judgment noting the sensory attributes we perceive.

有别于一般的咖啡饮用者，杯测者能够对感官感知进行细分并加以分析。想象一下，当白光穿过棱镜时，它会被分解成单一颜色的光谱。同样地，在咖啡杯测中，我们会将整体的品饮体验拆解为许多独立的风味元素。 One skill that distinguishes cuppers from people who simply drink coffee is their ability to break their sensory perceptions down into smaller parts and analyze them. Think about the way in which white light is deconstructed into its single-color constituents when it goes through a prism—in a similar way, we are deconstructing our holistic experience of a coffee into many distinct elements.

准备进行第一项品鉴活动前，让我们先探讨几个重要的感官特征：我们的嗅觉——也就是我们感知气味的能力——极大地提升了我们对咖啡的感受（以及享受！）。

由于嗅觉在咖啡品尝中扮演如此重要的角色，咖啡专业人士会透过检视两个特征来分析咖啡的气味：To prepare for our first activity, let's explore a few characteristics we should examine when tasting coffee. Our olfactory sense—our ability to smell—greatly enhances our perception (and enjoyment!) of coffee. Because the olfactory sense plays such a powerful role in coffee tasting, coffee professionals analyze a coffee's smell by examining two characteristics:

- 第一个嗅觉相关特征是『干香』，干香是指咖啡粉在注水前所散发的气味。 The first olfactory-centered characteristic is called fragrance. Fragrance is the odor of coffee grounds before they are brewed.
- 第二个特征是『湿香』，湿香是指当热水倒入咖啡粉后所产生的香气。 The second characteristic is called aroma. Aroma describes how the coffee smells once water has been added to the coffee grounds.

我们在第一次品尝时还会探讨两个其他感官特征：The last two characteristics we'll explore in our first tasting are flavor and aftertaste.

我们对风味的感受来自两个部分：(1) 舌头感知的五种基本味觉——酸、咸、甜、苦、鲜——我们在品尝食物或饮料时所体验的主要味道；(2) 鼻后嗅觉：当咖啡液进入口腔后，鼻腔内的气味感受。余韵指的是咖啡吞咽后残留于口腔中的感官体验。 Our impression of flavor comes from (1) the main tastes we experience when tasting foods or beverages—sour, salty, sweet, bitter,

umami—as well as (2) our retronasal olfactory sense, which becomes active once the brew is in the mouth. Aftertaste is our sensory perception after the coffee has been swallowed.

我们已经讨论过这些我们即将评估的特征，接下来要讨论的是：我们该如何评估这些特征？我们可以使用哪些词汇来描述它们？我们又该使用哪些工具来记录我们的印象？We've talked about these different characteristics that we're going to evaluate. But how exactly do we evaluate them? What words can we use to describe them? And what tools do we use to document our impressions?

我们接下来要使用的工具，就是「勾选所有适用的选项」(**CATA**) 列表，咖啡专业人士会使用 **CATA** 列表来有效记录他们发现的感官属性，**CATA** 列表的内容会因复杂程度而异，我们今天将利用简化版协助大家认识 **CATA** 列表。We'll use a tool called Check All That Apply (CATA). Coffee professionals use lists of CATA boxes to efficiently document the sensory attributes they're detecting. CATA lists vary in their complexity. Today we'll be using a simplified version to help you get started.

CATA 描述词来自感官词汇表与风味轮，这是 **WCR**、**SCA** 以及加州大学戴维斯分校共同合作的成果。风味轮内圈可用于描述广泛且高层次的风味印象（例如：果香、坚果 / 可可、烘烤）。若要描述更具体的风味印象，品鉴者可以使用风味轮来辨别每个主要分类下的子分类，例如：莓果、柑橘类水果、果干）品鉴者也可以反向使用风味轮，根据具体的描述词来对应适当的高层次主要风味类别。举例来说，如果品鉴者察觉到谷物风味，他们可以使用风味轮来确定「烘烤」是最适当的高层次风味类别，用来描述这个感受。The CATA descriptors come from the Sensory Lexicon and Flavor Wheel, the results of joint work by WCR, SCA, and the University of California Davis. The inner circle of the Flavor Wheel can be used to describe broad, high-level impressions (like fruity, nutty/cocoa, or roasted). To describe more specific impressions, tasters can use the Flavor Wheel to identify subcategories (like berry, citrus fruit, or dried fruit) within each main category. Tasters can also use the Flavor Wheel to work backwards and identify high-level terms that correlate with specific descriptors. For example, if a taster detects a flavor note of cereal, they can use the Flavor Wheel to determine that "roasted" is the appropriate high-level term to use to describe this perception.

学员首次进行品尝练习时，讲师可以使用风味轮，帮助学员找到他们要辨识的风味元素——果香、坚果 / 可可、烘烤。Using the Flavor Wheel, the instructor may point out the locations of the components that learners will be looking for during their first tasting exercise—fruity, nutty/cocoa, and roasted.

活动：品尝 #1 (「勾选所有适用选项」) Activity: Tasting #1 (Check All That Apply)

这是一场由讲师引导的品尝活动，讲师将提供详细指导，说明何时及如何使用 **CATA** 列表评估干香、湿香、风味以及余韵。本次品尝将包含两款咖啡样本，请参阅工作坊**设备与用品清单**，查看建议的咖啡种类。透过这两款样本在感官风味特性上的对比，帮助学员开始辨别不同咖啡的感官属性。This is a guided tasting. The instructor provides detailed instructions on when and how to assess the fragrance, aroma, flavor, and aftertaste using CATA boxes. This tasting includes two coffee samples. See the workshop Equipment and Supply List for suggested coffees. Use the contrasting sensory profiles of the two samples to help learners start identifying differences in sensory attributes among coffees.

1. 将每款咖啡豆研磨成粉（少量即可），以供评估干香气。将研磨好的干燥咖啡粉分别放入标记为样本 **A** 与样本 **B** 的小杯中，并盖上盖子以保留干香气。每桌应有至少一杯样本 **A** 以及一杯样本 **B**。Grind a small quantity of each coffee sample for assessing fragrance. Place the dry grounds inside small cups labeled Sample A and Sample B. Place a lid on each cup to preserve the fragrance. There should be at least one cup of Sample A and one cup of Sample B at each table.

2. 使用滴滤式咖啡机冲煮这两款咖啡样本。请依照 **CVA** 标准的指引来准备样本，以进行描述性评估。将冲煮好的咖啡分配到每桌，确保学员拥有品尝所需的用品。*Prepare the two coffee samples using batch brewers. Follow guidance in the CVA Protocol for preparing samples for Descriptive Assessment. Distribute the brewed samples to each table and ensure learners have the necessary supplies to taste them.*
3. 确保每位学员都有一份「勾选所有适用选项」(**CATA**) 工作表。提醒学员，如果感受到感官特征不属于 **CATA** 列表中的分类，学员可以在 **CATA** 列表右侧空白区域自行填写描述词。*Ensure that each learner has a copy of the Check All That Apply (CATA) Worksheet. Point out that if a learner detects a descriptor that does not belong to one of the listed categories, they may write that descriptor in the space to the right of the CATA list in the relevant section.*
4. 在学员开始嗅闻与品尝之前，请强调本次活动重点在于练习描述个人的感官感知，在此阶段学员不需要担心他们的感知是否正确或与他人一致。*Before learners begin to smell and taste, emphasize that the primary goal of the activity is to practice describing one's sensory perceptions. Learners should not worry about whether their perceptions are accurate or calibrated at this level.*
5. 首先，指导学员评估每款咖啡粉的干香，并在工作表上标记相应的 **CATA** 选项。接下来，讲师可以带领学员简单讨论他们所勾选的选项，并针对如何选择描述词提供反馈与建议，或着讲师也可以要求学员两两一组讨论彼此的选择，时间 **1 到 3 分钟**。*First, instruct learners to assess the fragrance of the dry coffee grounds for each sample and mark the appropriate CATA box(es) on their worksheet. The instructor may then facilitate a brief class discussion to explore which box(es) learners checked and provide feedback and recommendations on how to select descriptors. Or, instead of a class discussion, the instructor may ask learners to find a partner and talk for 1-3 minutes in pairs about which box(es) they checked.*
6. 第二，指导学员评估咖啡样本的湿香，并在工作表上标记相应的 **CATA** 选项，简单讨论学员勾选的选项，或安排数分钟时间供学员两两一组讨论彼此的选择。*Second, instruct learners to assess the aromas of the brewed samples and mark the appropriate CATA box(es) on their worksheet. Briefly discuss the box(es) learners checked or provide a few minutes for learners to discuss which box(es) they checked with their partner.*
7. 第三，指导学员评估咖啡样本的风味及余韵，并在工作表上标记相应的 **CATA** 选项，简单讨论学员勾选的选项，或安排数分钟时间供学员两两一组讨论彼此的选择。*Third, instruct learners to assess the flavor and the aftertaste of the brewed samples and mark the appropriate CATA box(es) on their worksheet. Briefly discuss the box(es) learners checked or provide a few minutes for learners to discuss which box(es) they checked with their partner.*
8. 品尝结束后，邀请学员反思自己的体验，解答学员所有问题和疑惑后，再进入下一阶段。*After the tasting concludes, invite learners to reflect on their experience. Address questions and any areas of confusion before proceeding.*

品尝 #2 Tasting #2

学习目标：Learning Objectives:

- 定义并区分酸质、甜感与口感，Define and differentiate among acidity, sweetness, and mouthfeel.
- 辨别不同咖啡样本在强度上的差异。Detect differences in intensity among coffee samples.

让我们继续透过描述性方法探讨更多在品尝咖啡时应该检视的特征：Let's continue with our descriptive approach and explore a few more characteristics we should examine when tasting coffee:

- 酸质指的是当咖啡冲煮好后，我们如何感知它的酸味程度与该酸味的质量。Acidity refers to our perceptions of the brewed coffee's level of sourness and the qualities of that sourness.
- 甜感指的是当咖啡冲煮好后，我们如何感知它的甜味程度，不管是来自味觉、鼻后嗅觉或两者综合的结果。Sweetness refers to our perceptions of the brewed coffee's level of sweetness, which may be a taste sensation, a retronasal sensation, or a combination of both.
- 口感指的是当咖啡冲煮好后，我们如何感受它在口腔中的触感，包括黏稠度、质地以及其他触觉特征。Mouthfeel refers to the tactile feel of the brewed coffee in the mouth, encompassing its thickness, texture, and other tactile characteristics.

为了评估这些特征，我们将练习使用强度量表，强度是感官刺激的感知强弱程度。我们将在本轮品尝中使用简单的强度量表，记录咖啡的酸质、甜感与口感属于低、中或高强度。To evaluate these characteristics, we'll practice using intensity scales. Intensity is the perceived strength of a sensory stimulus. In this next tasting, we will use a simple intensity scale to note whether the coffee has a low-, medium-, or high-intensity acidity, sweetness, and mouthfeel.

活动：品尝 #2 (强度) Activity: Tasting #2 (Intensity)

由讲师引导学员品尝，讲师将提供详细指导，说明何时及如何使用强度量表评估酸质、甜感以及口感。本次品尝将包含两款咖啡样本，请参阅工作坊设备与用品清单，查看建议的咖啡种类。透过这两款样本在感官风味特性上的对比，帮助学员开始辨别不同咖啡中感官属性的差异。This is a guided tasting. The instructor provides detailed instructions on when and how to assess the acidity, sweetness, and mouthfeel using intensity scales. This tasting includes two coffee samples. See the workshop Equipment and Supply List for suggested coffees. Use the contrasting sensory profiles of the two samples to help learners start identifying differences in sensory attributes among coffees.

1. 使用滴滤式咖啡机冲煮这两款咖啡样本，请依照 CVA 标准的指引来准备样本，以进行描述性评估。将冲煮成品样本分配到每桌，并确保学员拥有品尝所需的用品。Prepare the two coffee samples using batch brewers. Follow guidance in the CVA Protocol for preparing samples for Descriptive Assessment. Distribute the brewed samples to each table and ensure learners have the necessary supplies to taste them.
2. 确保每位学员都有一份强度工作表。Ensure that each learner has a copy of the Intensity Worksheet.
3. 在学员开始嗅闻与品尝之前，请强调本次活动重点在于练习描述个人的感官感知。在此阶段学员不需要担心他们的感知是否正确或与他人一致。Before learners begin to smell and taste, emphasize that the primary goal of the activity is to practice describing one's sensory perceptions. Learners should not worry about whether their perceptions are accurate or calibrated at this level.
4. 首先，指导学员评估每款咖啡样本的酸质，并在他们的工作表上标记低、中或高强度。接下来，讲师可以带领学员简单讨论探讨他们所选择的强度，并提供反馈与建议，或着

讲师也可要求学员两两一组讨论彼此对酸质强度的评分，时间 1 到 3 分钟。First, instruct learners to assess the acidity of the brewed samples and mark either low, medium, or high intensity on their worksheet. The instructor may then facilitate a brief class discussion to explore the intensities that learners selected and provide feedback and recommendations. Or, instead of a class discussion, the instructor may ask learners to find a partner and talk for 1-3 minutes in pairs about their intensity ratings for acidity.

5. 第二，指导学员评估每款咖啡样本的甜感，并在他们的工作表上标记低、中或高强度。

简单讨论学员的强度评分，或安排数分钟时间供学员两两一组讨论彼此的强度评分。

Second, instruct learners to assess the sweetness of the brewed samples and mark either low, medium, or high intensity on their worksheet. Briefly discuss the intensity ratings learners selected or provide a few minutes for learners to discuss their intensity ratings with their partner.

6. 第三，指导学员评估每款咖啡样本的口感，并在他们的工作表上标记低、中或高强度。

简单讨论学员的强度评分，或安排数分钟时间供学员两两一组讨论彼此的强度评分。

Third, instruct learners to assess the mouthfeel of the brewed samples and mark either low, medium, or high intensity on their worksheet. Briefly discuss the intensity ratings learners selected or provide a few minutes for learners to discuss their intensity ratings with their partner.

7. 品尝结束后，邀请学员反思自己的体验。在讨论过程中可以提醒学员，尽管本次工作坊重点是识别酸质、甜感与口感的强度，但这些特征也可以用定性术语来描述。举例来说，咖啡的口感可以是「粗糙」或「滑顺」。同样地，尽管本次工作坊着重于识别干香、湿香、风味以及余韵的描述词，但这些特征也可透过强度加以表示。After the tasting concludes, invite learners to reflect on their experience. During the discussion, mention that although this workshop focuses on identifying intensities for acidity, sweetness, and mouthfeel, these characteristics can be described in qualitative terms too. For example, a coffee's mouthfeel could be "rough" or "smooth." In a similar manner, although this workshop focuses on identifying descriptors for fragrance, aroma, flavor, and aftertaste, these characteristics can be described in terms of intensity as well.

8. 解答学员所有问题和疑惑后，再进入下一阶段。Address questions and any areas of confusion before proceeding.

杯测 #1 Cupping #1

学习目标：Learning Objectives:

- 定义并区分各种杯测评项。Define and differentiate among the various cupping sections.
- 辨别不同咖啡样本在强度与感官风味特性上的差异。Detect differences in intensity and sensory profile among coffee samples.
- 使用 CATA 列表记录咖啡样本的感官风味特性。Use CATA boxes to document the sensory profile of coffee samples.
- 示范正确的杯测实务。Demonstrate effective cupping practices.

既然我们已经练习过如何细分感官感知并记录感官属性，现在就让我们将这种描述性方法应用到第一轮杯测。Now that we've practiced deconstructing our sensory perceptions and documenting sensory attributes, let's apply this descriptive approach in our first cupping.

与学员讨论良好的杯测实务。包括 (1) 使用杯测匙从每个碗中取出一一致的咖啡量进行评估，(2) 在不同杯子与样本之间彻底清洗杯测匙，(3) 待前一位杯测者评估他们托盘上的样本完毕并进行下一阶段后，再开使评估托盘上的咖啡，以及 (4) 评估同款咖啡在不同温度下的风味。Discuss good cupping practices with learners. Include (1) using a spoon to evaluate a consistent

quantity of coffee from each bowl, (2) rinsing spoons thoroughly in between cups and samples, (3) waiting until the cupper in front of you completes their tray and moves on before evaluating that tray, and (4) completing multiple passes to evaluate the coffees at different temperatures.

活动：杯测 #1 (描述性杯测) Activity: Cupping #1 (Descriptive Cupping)

由讲师引导学员品尝，讲师将提供详细指导，说明何时及如何评估每个杯测评项。本次杯测将包含两款咖啡样本，请参阅工作坊**设备与用品清单**，查看建议的咖啡种类。This is a guided cupping. The instructor provides detailed instructions on when and how to assess each cupping section. This cupping includes two coffee samples. See the workshop Equipment and Supply List for suggested coffees.

1. 每款咖啡样本均准备五杯并置于托盘上。确保每桌至少有一组样本 **A** 以及一组样本 **B**。
Prepare a five-cup tray of each sample. Ensure that there is at least one tray of Sample A and one tray of Sample B at each table.
2. 确保每位学员都有一份**描述性杯测工作表**。
Ensure that each learner has a copy of the Descriptive Cupping Worksheet.
3. 将咖啡豆研磨成粉，*Grind the coffees.*
 - 讲师可以说明每杯样本必须分开研磨的重要性。*The instructor may explain why grinding each cup separately is important.*
 - 如果时间允许，讲师也可邀请学员协助研磨咖啡豆，以参与杯测准备过程。*If time permits, the instructor may invite learners to help grind the coffee for the cupping.*
4. 指导学员评估研磨后咖啡粉的干香，并在工作表干香气的评项勾选适当的 **CATA** 选项。
Instruct learners to assess the fragrance of the dry coffee grounds and mark the appropriate CATA box(es) for fragrance on their worksheet.
5. 冲煮咖啡样本，并指导学员在冲煮过程中评估湿香气。指导学员如何及何时对每杯进行破渣。指导学员在其工作表上为湿香勾选适当的 **CATA** 选项。
Brew the samples and instruct learners to assess the aroma as the coffee brews. Provide guidance on how and when to break the crust of each cup. Instruct learners to mark the appropriate CATA boxes for aroma on their worksheet.
 - 如果时间允许，讲师可邀请学员协助注水。*If time permits, the instructor may invite learners to help pour the water.*
 - 讲师可以说明进行杯测时适当的水温以及冲煮时间。*The instructor may mention the appropriate water temperature and brew time to use when cupping.*
6. 指导学员如何捞除咖啡杯表面的浮渣及油脂。邀请学员参与捞渣，并针对他们的操作结果提供反馈。
Provide guidance to learners on how to skim the grounds and oils from the surfaces of the cups. Invite learners to participate in skimming and provide feedback as they practice.
7. 指导学员如何使用杯测匙品尝咖啡。强调正确冲洗杯测匙的重要性。指导学员品尝每款样本并标记 (1) 风味与余韵的 **CATA** 选项，以及 (2) 酸质、甜感与口感为低、中或高强度。强调随着咖啡冷却，属性的强度可能会有所变化。学员应选择最能描述咖啡整体性的 **CATA** 选项或强度，并考虑不同温度的变化。
Provide guidance to learners on how to use a spoon to taste the coffees. Emphasize proper rinsing. Instruct learners to taste each sample and mark (1) the appropriate CATA boxes for flavor and aftertaste and (2) either low, medium, or high intensity for acidity, sweetness, and mouthfeel. Emphasize that attributes may vary in their intensity as the coffee cools. Learners should select the box(es) or intensities that best describe the coffee overall across temperatures.
 - 讲师可根据需要调整流程，以避免咖啡与杯测者的嘴部直接接触。*The instructor may choose to modify the protocol to avoid direct contact of the brew with each cupper's mouth.*

8. 杯测结束后，邀请学员反思自己的体验。解答学员所有问题和疑惑后，再进入下一阶段。° After the cupping concludes, invite learners to reflect on their experience. Address questions and any areas of confusion before proceeding.

请注意：没有任何杯测经验的学员可能会觉得这项活动具有挑战性。如果学员在活动过程中感到吃力，可以先放下工作表，专注于练习杯测方式。° Note: Learners without any cupping experience may find this activity challenging. If a learner feels overwhelmed at any point during the activity, that learner may put down their worksheet and focus solely on practicing cupping mechanics.

杯测 #2 Cupping #2

学习目标：Learning Objectives:

- 定义整体性。° Define overall.
- 示范正确的杯测实务。° Demonstrate effective cupping practices.
- 辨别个人偏好的咖啡感官属性。° Identify personal preferences in sensory attributes in coffee.
- 使用九分制情感性量表评估咖啡样本。° Use the nine-point affective scale to evaluate coffee samples.

我们目前已藉由描述性方法来描述不同咖啡的感官风味特性。然而这种描述性方法并不是杯测的唯一方法，因为有时候咖啡专业人士进行杯测是为了挑选自己偏好的咖啡。° So far, we've been using a descriptive approach and describing the sensory profiles of different coffees. But this descriptive approach isn't the only approach we can use when cupping—sometimes coffee professionals cup to identify preferred coffees.

这可能是找出个人最喜爱的咖啡，也可能是找出你认为适合某个人的咖啡。举例来说，假设您正在为朋友选购咖啡，你偏好果香调性咖啡，而你的朋友偏好深焙、带有坚果风味的咖啡。在这种情况下，你会为朋友选择哪种咖啡呢？毋庸置疑，深焙、带有坚果风味的咖啡才合适他！° This could mean identifying coffees that you personally prefer. This could alternatively mean identifying coffees that you think someone else would prefer. For example, imagine you're buying coffee for a friend. You prefer fruity coffees, but your friend prefers dark-roasted, nutty coffees. Do you purchase a fruity coffee, or a dark-roasted, nutty coffee for this friend? Of course, the darker roast with nutty flavors would be a better fit!

杯测者明白，每个人对感官属性的价值判断不尽相同。出色的杯测师不仅可以找到符合自己偏好的咖啡.....也能挑选出符合其他人偏好的咖啡。一款咖啡的「好」与「坏」，终究带有主观色彩，取决于个人「对质量的印象」。° Cuppers recognize that different individuals value different sensory attributes. Effective cuppers can identify coffees that fit their own preferences... or, coffees that would be a good fit for other individuals with different preferences. Whether a coffee is "good" or "bad" is ultimately subjective—it depends on one's "impression of quality."

对质量的印象是杯测者对于咖啡质量程度的主观判断，主要探讨下列问题：「我有多喜欢这杯咖啡？」或者，如果我们在杯测时考虑的是他人的偏好，那么我们要回答的问题就是：

「这款咖啡的感官风味特性是否符合这个人的偏好？」° Impression of quality is a cupper's subjective

judgment about a coffee's quality level. It all about exploring the following questions: "How much do I like this coffee?" Or, if we're cupping with someone else's preferences in mind, it answers the question, "How well does this sensory profile match the preferences of this other person?"

这种方法会使用另一套工具，也就是九分制情感性量表，这套量表源自于感官与消费者科学中常用的喜好度九分量表。九分量表的使用方式，通常以 5 分为基准，再依您对咖啡质量的印象向左或向右调整评分。这是基于特定目的或应用情境下，您对这款咖啡品质的判断。 This approach uses a different tool—the nine-point affective scale. This is based on the nine-point hedonic scale used in sensory and consumer science. To use the nine-point scale, start at 5 and then either swing left or right depending on your impression of quality—your judgment about the coffee's quality level with a specific purpose or application in mind.

在第二轮杯测中，我们将使用九分量表来表达我们对咖啡整体质量的印象。『整体性』指的是我们在考虑所有先前的杯测评项后，对这款咖啡的综合感受。请考虑各种不同的感官属性，以及它们如何相互协调（或不协调），是否符合特定个人或应用的需求。尽管我们仍在分析相同的感官特征（干香、湿香、风味等），这项评估是主观的，因为个人偏好的不同影响了我们对质量的印象。 During our second cupping, we'll use the nine-point scale to indicate our impression of quality for a coffee overall. Overall describes our holistic perception of the coffee, taking all prior cupping sections into account. Consider all the different sensory attributes and how well (or not) they harmonize to meet the needs of a particular person or application. Although we're still examining the same sensory characteristics (fragrance, aroma, flavor, et cetera), this exercise is subjective because individual preferences (and, therefore, impressions of quality) vary.

活动：杯测 #2（偏好性杯测） Activity: Cupping #2 (Cupping for Preference)

由讲师引导学员进行杯测，重点在于使用九分制情感性量表。讲师将在活动过程中，针对良好杯测实务提供建议与反馈。本次杯测将包含两款咖啡样本，请参阅工作坊**设备与用品清单**，查看建议的咖啡种类。 This is a guided cupping that emphasizes the use of the nine-point affective scale. The instructor provides reminders and feedback on good cupping practices during the activity. This cupping includes two coffee samples. See the workshop Equipment and Supply List for suggested coffees.

1. 每款咖啡样本均准备五杯并置于托盘上，确保每桌至少有一组样本 **A** 以及一组样本 **B**。 Prepare a five-cup tray of each sample. Ensure that there is at least one tray of Sample A and one tray of Sample B at each table.
2. 确保每位学员都有一份**偏好性杯测工作表**。 Ensure that each learner has a copy of the Cupping for Preference Worksheet.
3. 请学员反思自己对咖啡的偏好，并在工作表上写下自己喜欢的几个感官属性（例如：可
可风味、果香、高强度酸质）。 Ask learners to reflect on their own coffee preferences and write down a few sensory attributes they enjoy in coffee (e.g., cocoa notes, fruity notes, high-intensity acidity) on their worksheet.
4. 接下来，请学员想象一位**咖啡偏好与自己不同的咖啡饮用者**。当每位学员确定了「另一位咖啡饮用者」后，请学员在工作表上写下这位咖啡饮用者会喜欢的几个感官属性（例如：烘烤风味、低强度酸质）。 Next, ask learners to visualize a coffee drinker who has coffee preferences that differ from their own. Once each learner has identified their "other coffee drinker," ask learners to write down a few sensory attributes that this coffee drinker enjoys (e.g., roasted notes, low-intensity acidity) on their worksheet.

- 请学员想象一位拥有不同偏好的咖啡饮用者时，讲师可以鼓励学员考虑生活周遭的人（例如：家庭成员、朋友或同事）。*When asking learners to visualize a coffee drinker with different preferences, the instructor may encourage learners to consider someone in their life (e.g., a family member, friend, or colleague).*
- 讲师也可以提供一两位虚构人物，并针对这些人物的冲煮与品尝偏好提供基本信息。学员可以从这些虚构人物之中选择一人做为他们的「另一位咖啡饮用者」。
(虚构人物可以在**咖啡杯测入门工作坊 PowerPoint 投影片**的杂项章节中找到。讲师也可在投影片中自定义人物信息，但应避免细节过多造成学员负担)。
The instructor may alternatively suggest one or two personas (fictional characters) and describe basic information about these personas' brewing and tasting preferences. Learners may select one of these personas as their "other coffee drinker." (Example personas can be found in the miscellaneous section of the Intro to Cupping Workshop PowerPoint Slides. The instructor may customize the persona information on the slides but should avoid overloading learners with too many details.)
- 5. 说明学员将为每款样本的整体性进行评分。学员将为每款样本评分两次，第一次根据他们自己的偏好，第二次则是根据他们想象或选择的其他咖啡饮用者偏好。*Explain that learners will select overall ratings for each sample. Learners will rate each sample twice—once based on their personal preferences and once based on the preferences of the other coffee drinker they visualized or selected.*
- 6. 将咖啡豆研磨成粉，研磨完成后，请学员在冲煮咖啡样品前，先评估咖啡粉的干香。
Grind the coffees. Once grinding is complete, invite learners to assess the fragrance of the dry coffee grounds before brewing the samples.
 - 如果时间允许，讲师也可邀请学员协助研磨用于杯测的咖啡豆。*If time permits, the instructor may invite learners to help grind the coffee for the cupping.*
- 7. 冲煮咖啡样本，指导学员评估咖啡的湿香气。指导学员何时进行破渣。*Brew the samples and instruct learners to assess the aroma as the coffee brews. Provide guidance to learners on when to break the crust of each cup.*
 - 如果时间允许，讲师可邀请学员协助注水。*If time permits, the instructor may invite learners to help pour the water.*
- 8. 邀请学员协助捞渣。*Invite learners to help skim the cups.*
- 9. 指导学员品尝每款样本，并反思风味、余韵、酸质、甜感以及口感。在不同温度下品尝每个咖啡样品，指导学员使用工作表上的九分量表，**针对每款样本的整体性进行评分**。学员应针对每款样本提供两个整体性评分，一个反映个人偏好，另一个则反映他们所想象或选定的咖啡饮用者的偏好。*Instruct learners to taste each sample and reflect on the flavor, aftertaste, acidity, sweetness, and mouthfeel. After tasting each sample at multiple temperatures, instruct learners to provide overall ratings for each sample using the nine-point scales on their worksheet. For each sample, learners should provide one overall rating that reflects their own preferences and one overall rating that reflects the preferences of the other coffee drinker they visualized or selected.*
 - 讲师可以调整流程，以避免咖啡与杯测者的嘴部直接接触。*The instructor may choose to modify the protocol to avoid direct contact of the brew with each cupper's mouth.*
- 10. 杯测结束后，邀请学员反思自己的体验。在讨论过程中，请强调（1）学员所给出的评分反应了他们对咖啡质量的印象，以及（2）在进行偏好杯测时，了解目标受众相当重要。*After the cupping concludes, invite learners to reflect on their experience. During the discussion, emphasize that (1) the ratings learners selected are indicators of their impressions of quality about the coffees and (2) when cupping for preference, knowing who the coffee is for is very important.*
- 11. 解答学员所有问题和疑惑后，再进入下一阶段。*Address questions and any areas of confusion before proceeding.*

结论 Conclusion

进行反思练习及 / 或复习本次工作坊探讨的重点。向学员展示描述性及情感性评估表，并强调本次工作坊使用的评估工具，正是目前咖啡专业人士进行咖啡感官评估所使用的工具。如果学员希望进一步提升杯测技能，讲师可以推荐相关资源。 *Conduct a reflection exercise and/or recap key points that have been explored during the workshop. Show learners the Descriptive and Affective Forms and highlight that the tools learners used during the workshop reflect the tools being used right now by coffee professionals to conduct coffee sensory assessment. The instructor may recommend resources that learners can explore if they wish to continue developing their cupping skills.*

恭喜各位成功展开杯测师之旅！ **Congratulations on beginning your journey as a cupper!**
