1. 一般信息

General Information

课程长度：最少 16 小时 Course Length: Minimum 16 Hours

先修课程：无。本课程乃针对使用 2004 年 SCA 杯测标准的现任杯测师，包括但不限于：专业杯测师、现任或前咖啡质量鉴定师 (Q Arabica Graders)，以及每月至少使用一次 SCA 杯测系统或过去数年内频繁使用该系统者。Prerequisite(s): None. This course is for current cuppers who utilize the 2004 SCA cupping protocol, including but not limited to: Professional cuppers, Q Arabica Graders or former Q Arabica Graders, people who use the SCA cupping system at least once a month or have used it intensively at some point in the past few years.

本课程可采面授或在线方式进行。如果讲师选择以在线方式进行授课，则必须 (1) 使用支持实时授课的视频会议平台或工具，以及 (2) 与学员协调，确保他们在进行活动时获得适当材料与指导。详情请见附录 D：进行交互式在线课程。This course can be delivered in person or online. If the trainer chooses to deliver the course online, they must (1) utilize a video conferencing platform or tool that allows for live instruction, and (2) coordinate with learners to ensure they have the appropriate supplies and guidance for conducting activities. See Appendix D: Facilitating an Interactive Online Course for more details.

笔试总题数：30 题 (每题一分) Total Number of Questions on Written Exam: 30 (Each question is worth one point.)

笔试时间总长：32 分钟 Total Time Allowed for Written Exam: 32 Minutes

及格分数 (笔试)：80% Passing Score (Written Exam): 80%

学员必须通过笔试以及实作测验，始可获颁课程证书。实作测验包含香气类以及描述性评估 (包括强度量表与 CATA 表)、情感性评估以及外在评估。关于各项实作测验的补充信息，请见附录 C：讲师评分表与评分标准。Learners must pass the written exam and each practical exam component to receive the course certificate. The practical exam components include a aroma categorization component, a descriptive assessment component (including both intensity and CATA elements), an affective assessment component, and an extrinsic assessment component. For additional details on grading each practical exam component, see Appendix C: Trainer Scoresheet and Grading Criteria.

每项测验均可补考一次。实作测验的考试次数将备注在课程大纲中 (面授课程) 及课程模块说明中 (在线课程)。讲师应留存包含学员评估表副本在内的相关资料，以便必要时向学员提供反馈。Learners are offered two attempts to pass each exam component. Practical exam attempts are noted in the course agenda (for in-person courses) and in the module breakdown (for online courses). Trainers should keep records, including copies of learners' assessment forms, for a reasonable amount of time and be able to provide feedback as needed to learners.

由于杯测应用程序可为用户提供额外辅助，并防止他们犯下某些错误，因此在实作测验部分中不允许使用杯测应用程序。然而，讲师仍应鼓励学员在课程结束后使用 CVA 杯测应用程序。Because cupping applications provide additional assistance to users and prevent them from making certain mistakes, the use of cupping applications for practical exam components is not permitted. However, trainers should still encourage learners to try CVA-based cupping applications after completing the course.

Materials)。All documents are available in the user portal (My AST Portal > My AST Downloads > Course Materials)。

2. 课程说明与更新 Course Description and Updates

杯测师咖啡价值评估课程旨在针对咖啡杯测师提供专业的更新内容。在本课程中，学员将探索如何在杯测实作中使用并整合 **SCA 咖啡价值评估 (CVA)** 的各项工具。本课程包含各种实作活动，包括若干杯测、课程讲授以及分组讨论。The Coffee Value Assessment for Cuppers Course is a professional update for coffee cuppers. During the course, learners will explore how to use and integrate the SCA Coffee Value Assessment (CVA) tools into their cupping practice. The course includes a variety of hands-on activities, including several cuppings, as well as lecture and group discussions.

学员在完成杯测师 **CVA** 课程后，将能够：After completing the CVA Course for Cuppers, learners will be able to:

- 识别并使用 **CVA 感官参照物**。After completing the CVA for Cuppers Course, learners will be able to:
- 针对 **CVA** 所使用的主要感官评估工具解释其功能与背景，例如：**15 分强度量表**、**CATA 表**以及**9 分情感性量表**。Explain the function and background of key sensory assessment tools used in CVA—15-point intensity scales, CATA lists, and nine-point affective scales.
- 使用 **CVA 描述性、情感性以及外在等评估表**描述并评估咖啡。Use the CVA Descriptive, Affective, and Extrinsic Forms to describe and evaluate coffee.
- 说明并使用新的 **CVA 系统**，包括描述性、情感性以及外在评估工具。Explain and use the new CVA system, including the descriptive, affective, and extrinsic assessment tools.

旧版课程更新：Curriculum Updates from Previous Version:

旧版课程指南为 1.0 版。本课程指南为 2.0 版。The previous guidebook version is now referred to as Version 1.0. This guidebook version is referred to as Version 2.0.

在 2.0 版中，将外在评估纳入课程内容，并采用新的格式设计，以利阅读与理解。本课程现可通过一系列实时交互课程以在线方式进行授课（请参阅一般信息及附录 D）。In Version 2.0, the extrinsic assessment has been incorporated into the course. New formatting has been applied to increase readability. The course can now be delivered online through a series of live, interactive sessions (see General Information and Appendix D).

3. 笔试题目分布（按主题） Written Exam Question Distribution by Topic

有关笔试试题的重要信息详如下表。The table below outlines key information regarding the written exam questions.

所有笔试试题的设计旨在评估学员对特定学习目标的掌握程度。题目一律按主题分类，并组成所谓的「题库」。学员受测内容将从这些题库中随机选出。All written exam questions were developed to assess learners' mastery of specific learning objectives. The questions have been grouped by topic. All questions within a topic are considered a topic "pool." From this pool, a certain number of questions will be randomly selected and presented to the learner.

题库：每个主题的试题数量。Question Pool: This is the number of questions per topic.

考题：每个主题实际列入施测内容（随机选出）的试题数量。该数量由课程建立者决定，目的是确保各章节和主题所占的比例获适当分配。Questions Presented: This is the number of questions a learner will receive per topic during the exam, selected randomly from that topic's pool.

章节比重：每个章节名称右侧，列有该章节在整份测验中大约的占比。Section Weighting: Next to each section title is the approximate percentage of the total exam represented by the questions in that section.

考试章节 Exam Sections	题库 Question Pool	考题 Questions Presented
概念、理论与背景（约 26.66%）Concept, Theory, & Background (About 26.66%)	22	8
描述性评估（20%）Descriptive Assessment (20%)	16	6
描述性评估的实践应用（10%）Practical Application Descriptive Assessment (10%)	9	3
情感性评估（约 16.66%）Affective Assessment (About 16.66%)	16	5
情感性评估的实践应用（10%）Practical Application Affective Assessment (10%)	6	3
外在评估及用途（约 16.66%）Extrinsic Assessment and Use (About 16.66%)	13	5
总题数 Total Number of Questions	82	30

4. 课程大纲 Course Curriculum

课程大纲兹列如下，分为主题与目标。The course curriculum is outlined below and is divided into topics and objectives.

学习目标（列于每个主题的「学习目标」框中）描述在完成该主题后学员应该具备之能力。

The learning objectives (listed in the "Learning Objectives" box for each topic) describe what a learner should be able to do by the time they complete that topic.

少数为建议性质而非强制性的说明，会使用「讲师可以...」或「学员可以...」来表达。活动内容会在指定的橘色方框中说明，部分活动可能在主题开始或结束时进行。A few instructions are suggested but not required and are noted using the phrase "Trainers may..." or "Learners may..." Activities are described in designated orange boxes. Some activities take place at the beginning of a topic, while others take place at the conclusion of a topic.

讲师可以在课程开始前提供资源，以利学员准备。讲师可以提供 **CVA** 评估标准 (A System to Assess Coffee Value: Understanding the SCA's Coffee Value Assessment, 2024 年六月)、课程中将使用的 **CVA** 表格，以及 **SCA** 标准 **102-2024**、**103-2024** 和 **104-2024**。讲师也可以鼓励学员观看 **CVA** 理论的一系列影片，英文版 [请点此](#)，西班牙文字幕[请点此](#)、繁体中文字幕 [请点此](#)、简体中文字幕[请点此](#)，以及韩文字幕 [请点此](#)。Trainers may send resources to learners before the course begins to help them prepare. Trainers may send the CVA Protocol (A System to Assess Coffee Value: Understanding the SCA's Coffee Value Assessment—June 2024), the CVA Forms that will be used in the course, and SCA Standards 102-2024, 103-2024, and 104-2024. Trainers may also encourage learners to view the CVA Theory video series in English [here](#), with Spanish subtitles [here](#), with Traditional Chinese subtitles [here](#), with Simplified Chinese subtitles [here](#), and with Korean subtitles [here](#).

面授课程大纲 In-Person Course Agenda

以面授方式进行 **CVA** 杯测师课程时，讲师应按下列大纲进行授课：When delivering the CVA for Cuppers Course in person, trainers should present the course using the following agenda:

第 1 天 DAY 1	第 2 天 DAY 2
(1.1) 课程介绍 Introduction to the Course <i>约 30 分钟 About 30 Minutes</i>	(2.1) 复习第 1 天的描述性评估表 Review Descriptive Forms from Day 1 <i>约 30 分钟 About 30 Minutes</i>
(1.2) 介绍 CVA Introduction to CVA <i>约 1.5 小时 About 1.5 Hours</i>	(2.2) 情感性杯测 Affective Cupping <i>约 1.5 小时 About 1.5 Hours</i>
(1.3) 了解 15 分强度量表 Understanding the 15-Point Intensity Scale <i>约 45 分钟 About 45 Minutes</i>	(2.2) 外在评估 Extrinsic Assessment <i>约 1.5 小时 About 1.5 Hours</i>
(1.4) 建立并使用描述性评估的感官参照物 Creating and Using References for Descriptive Assessment <i>约 1 小时 About 1 Hour</i>	(2.4) 香气类考试 Aroma Categorization Exam <i>约 20 分钟 About 20 Minutes</i>

(1.5) CATA (勾选「所有适用选项」) 列表 CATA (Check All That Apply) Lists 约 45 分钟 About 45 Minutes	(2.5) 描述性评估 #2 Descriptive Assessment #2 约 50 分钟 About 50 Minutes
(1.6) 描述性评估 #1 Descriptive Assessment #1 约 1.5 小时 About 1.5 Hours	(2.6) 笔试 Written Exam 约 40 分钟 About 40 Minutes
(1.7) 9 分情感性量表与情感性评估 Nine-Point Affective Scales and Affective Assessment 约 1.5 小时 About 1.5 Hours	(2.7) 综合性杯测 Combined Cupping 约 1.5 小时 About 1.5 Hours
	(2.8) 香气类与外在评估考试重考 Aroma Categorization and Extrinsic Exam Retakes 约 20 分钟 About 20 Minutes

面授课程第 1 天 In-Person Course DAY 1

1.1 课程介绍 Introduction to the Course

学习目标 Learning Objectives:

无 None

进行讲师与学员介绍。接着，要求学员分享他们对于 **CVA** 的问题或担忧，包括他们听到的传闻或令他们感兴趣的特定主题。建议方法如下：Conduct trainer and learner introductions. Then, ask learners to share their questions or concerns about CVA, including rumors they've heard or specific topics that interest them. Consider the following approaches:

- 播放一张投影片，四个角落分别显示「兴奋」、「存疑」、「担忧」以及「保留」。请觉得兴奋的学员举手，接着，请感到存疑的学员举手并以此类推。如果讲师选择此方法，建议在第 2 天课程结束时重新展示这张投影片，以了解学员的感受是否有所改变。Show a slide with the four corners of the slide displaying the words "Excited", "Skeptical", "Concerned", and "Reserved". Ask learners to raise their hand if they are feeling excited. Then, ask learners to raise their hand if they are skeptical, etc. If the trainer selects this method, consider revisiting the slide at the end of Day 2 to see if learners' feelings have changed.
- 请每位学员在自我介绍后，分享一个关于 **CVA** 的问题或疑虑。将每位学员提出的问题或疑虑写在白板、大型笔记本等地方，让所有学员都能看见。在第 1 天结束时，回顾这份清单，将已解决的问题和疑虑勾选出来。在第 2 天结束时再次进行此步骤，并响应尚未解决的问题或疑虑。Ask each learner to share a question or concern about CVA after they introduce themselves. Write each question or concern on a board, large notepad, etc. so that all learners can see them. Revisit the list at the end of Day 1 to check off the questions and concerns that have been addressed. Repeat this at the end of Day 2 and respond to any questions or concerns that remain.
- 在学员自我介绍后，请学员分享他们对于 **2004 年** 杯测方法最喜欢的一点，以及最不喜欢的一点。在授课期间，寻找机会将 **CVA** 相关主题与这些学员的评论连结起来。Ask each learner to share one thing they liked and one thing they didn't like about the 2004 cupping methodology after they introduce themselves. Look for opportunities throughout the course to connect CVA topics back to these comments.

1.2 介绍 CVA Introduction to CVA

学习目标 Learning Objectives:

1. 说明 CVA 系统背后的核心概念。 Explain the core concepts behind the CVA system.

说明 CVA 的背景及其如何支持咖啡价值链中不同部分。学员可能会提出许多问题，请预留充足的时间来回答问题。重点强调以下几点：Explain the background of the CVA and how it can support different parts of the coffee value chain. Anticipate lots of questions from learners; leave plenty of time to respond to questions. Highlight the following points:

过去我们如何定义精品咖啡：自 1970 年代首次使用「精品咖啡」一词以来，咖啡界定义精品咖啡的方式便不断受到挑战。其涵义从非常具体（例如生豆分级制度与杯测分数）到广泛且理想化的都有。然而，长时间以来咖啡产业始终难以确立一个有用、可衡量且简明的定义。How We've Defined Specialty Coffee in the Past: Since the first use of the term "specialty coffee" in the 1970s, our community has been challenged with how to define it. Meanings have ranged from very specific (like the green coffee classification system and cupping scores) to the broad and aspirational. But a useful, measurable, and concise definition eluded the industry for a long time.

每当提到精品咖啡此一概念时，「质量」一字也常随之出现。这个名词似乎是我们对精品咖啡认知的核心，正因如此值得我们重视。现在就让我们深入了解质量及其含义，「质量」可指某个单一标准，也可指「某人或某物所拥有的独特特征」。When the concept of specialty coffee comes up, so does the word "quality." This term seems to be central to our conception of specialty coffee and deserves attention for that reason. Let's look a little deeper at quality and what it implies. "Quality" can mean a single standard, or it can mean "a distinctive characteristic possessed by someone or something."

[播放投影片：商业与精品咖啡金字塔] 这可能是您熟悉的一种定义精品咖啡的方式。这张图清楚显示精品咖啡与「商业咖啡」之间存在对立，由于它是金字塔形的，因此在本质上具有排他性。金字塔左侧的数值分数显示了我们如何以简略的方式来描述咖啡质量。Show Commercial and Specialty Pyramid Slide] This is one way of defining specialty that you may be familiar with. This visual presents specialty coffee as clearly in opposition to "commercial coffee." Because it's a pyramid, it is by nature exclusive. The numerical scores on the lefthand side of the pyramid show how we've come to describe coffee quality as a shorthand.

咖啡产业感官评估的历史与 2004 年系统：在咖啡贸易的早期，咖啡质量通常是依据外观或整体风味指标来决定，如「优质」。然而，在 19 世纪末期，Clarence Bickford 发明了一种以小杯子来品尝咖啡，进行评估咖啡质量的系统化方法。History of Sensory Evaluation in the Coffee Industry and the 2004 System: In the early days of the coffee trade, coffee quality was often determined by appearance or general flavor indicators like "fine". However, in the late 1800s, Clarence Bickford invented a systematic way of evaluating coffee quality by tasting it in small cups.

这种新的「杯子测试」做法，最终演变为「品鉴」，然后成为「杯测」，在接下来约 100 年中，主要限于生豆贸易商与烘豆商使用。但当然，随着时间推移，咖啡产业的格局逐渐改变。到了 1970 年代中期，将我们今天齐聚一堂的—精品咖啡运动才刚开始兴起。This new practice of "cup testing," which would eventually become "cup tasting" and then "cupping," was largely restricted to green coffee traders and roasters for the next 100 years or so. But of course, little by little, the landscape continued to shift. By the time we got to the mid-1970s, the specialty coffee movement—the thing that connects us all in the room today—was just beginning to emerge.

强调优先考虑质量与新鲜度的观念逐渐形成，并开始在新兴的精品咖啡社群中扎根。这也让杯测的观念重新引发关注，但直到至少又过了 10 年后 – 即 1984 年时 – 才由 Ted Lingle 在

《咖啡杯测师手册》(*The Coffee Cupper's Handbook*) 中将其扩展并加以制度化。Ideas of prioritizing quality and freshness, built slowly over time, were only just beginning to take hold in the new specialty coffee community. This brought renewed interest to the idea of cupping, but it would take at least another 10 years—1984—before this was expanded and codified by Ted Lingle in *The Coffee Cupper's Handbook*.

对于咖啡产业而言，这无疑是另一个范畴式的转变：《咖啡杯测师手册》整合了当时相对较新颖的科学领域全新观点，这些领域专注于理解并应用感官分析于已有百年历史的杯测实践中。该手册提出了一套系统化却又充满理想的方法：在它所提出的愿景中，描绘了一个咖啡能够获得满分 100 分，并成为顶级之作的世界。又经过大约 15 年，SCA 的杯测标准规范和系统在 1999 年逐步成形，并在约 5 年后于 2004 年确立为 SCA 杯测系统。This was another paradigm shift for our industry: *The Coffee Cupper's Handbook* integrated new ideas from the relatively new scientific field developing to understand and apply sensory analysis to the then-century-old practice of cupping. It introduced a systematized approach, but it was also aspirational: it offered a vision of a world where coffees *could* score 100 points, be the best of the best. It would take another 15 or so years to take shape as the SCA's *Cupping Protocol and System*, in 1999, which would settle about 5 years later, in 2004 into the SCA Cupping system.

这套我们现今称之为「2004 年系统」的方法，是发现并编录有价值的属性 – 尤其是感官属性 – 的有价值的方法。但事实上，情况始终不断变化，感官科学持续进步，我们的产业也不断发展与成熟。This approach, this system—which we now refer to as the 2004 system—was a valuable method for discovering and cataloguing valuable attributes, especially sensory attributes. But the thing is, things have continued to change. Sensory science has advanced. Our industry has progressed and matured.

追求更清晰的咖啡面貌：如今关于咖啡的信息 – 特别是我们想要了解的信息 – 发生了显著变化，我们已从了解这个 [播放投影片：萨尔瓦多水洗 SL28]，进展到了了解这个 [播放投影片：农场深度信息]。Need for a Higher-Resolution Picture of Coffee: The amount of information there is to know about a coffee now—that we *want* to know about a coffee—has changed significantly. We've gone from knowing this [Show El Salvador Washed SL28 Slide] to this [Show In-Depth Farm Info Slide].

目前，杯测分数仅与咖啡的感官属性相关，与其他无关。作为一个产业，我们一直在将感官属性细分为不同部分（干香气、湿香气等），对这些部分进行评分，然后再加总得出单一的最终分数。这就像是观看这幅画 [播放投影片：画作] 的复杂、层次分明且微妙的感官体验，简化为画作中使用的主要颜色 [播放投影片：画作与色彩方块]。然后，这些颜色被简化为单一颜色，这单一颜色真的能代表这幅画吗？Right now, a cupping score only relates to the sensory attributes of a coffee, and nothing else. As an industry, we have been breaking down the sensory attributes into parts (fragrance, aroma, etc.), scoring those parts, and then adding up those parts to yield a single, final score. It's like taking the complex, layered, nuanced sensory experience of viewing this painting [Show Painting Slide] and reducing it to the main colors used in the painting [Show Painting + Color Squares Slide]. Then, the colors are reduced into one, single color. Is this one color truly representative of this painting?

杯测分数是一个单一的数字，代表了精品咖啡中可能出现的各种截然不同的感官体验。当然，在「2004 年系统」之前，我们甚至连得出那单一颜色的方法都没有！不过，这个单一颜色并未能提供完整的画面。A cupping score is a single numerical representation of a huge range of wildly different sensory experiences that are possible in specialty coffee. Of course, before the 2004 system we didn't even have a way to arrive at the one, single color! But this single color fails to provide the whole picture.

2020 年时，SCA 启动了一项项目，旨在评估、发展并扩展杯测标准规范，将其转化为一套咖啡价值评估系统，这个过程是从多个角度同时进行的。In 2020, the SCA embarked on a project to evaluate, evolve, and expand the cupping protocol and form into a coffee value assessment system. This happened from many angles at the same time.

精品咖啡的属性定义：我们对精品咖啡的理解，已经从聚焦于「质量」这样的复杂、单一属性，转变为基于某个人、某个地方可能重视的所有属性进行定义，不同人和不同文化所重视的属性各有不同。Attributes Definition of Specialty Coffee: Our understanding of specialty has changed from a focus on a complex, singular attribute like "quality" to a definition based on all the possible attributes that someone, somewhere could value. Different individuals and different cultures value different attributes.

讲师可以通过回顾精品咖啡的属性定义与解释属性连续体来补充说明。Trainers may expand on this by reviewing the attributes definition of specialty coffee and explaining the attributes continuum.

杯测师调查：这还不是全部 – 我们对于杯测的理解以及我们如何与何时使用杯测，也已经发生了变化，在开始推动杯测标准规范演进之前，SCA 对专业杯测师进行了广泛的调查。这些调查证实了一些我们的猜测（例如：我们的偏好变得更加多样化），但这项调查也有助于我们理解，在咖啡产业中实施变革到底有多么复杂。Cupper Survey: And that's not all—our understanding of cupping, and how and when we use it, has also changed. Before beginning the work to evolve the cupping protocol, the SCA did a wide-ranging survey of professional cuppers. They confirmed some things we suspected (like our preferences have become more diverse) but this survey also helped us understand just how complicated implementing changes in our industry might be.

讲师可以根据 2020-2021 年的 [使用者认知研究](#) 及文献回顾补充相关见解。Trainers may provide additional insights from the 2020-2021 [user perception study](#) and literature review.

感官科学：感官科学也在发展，帮助我们理解我们正在进行哪些类型的感官测试，而且这些测试如果想要避免偏差，不应该混合进行，同时所有的喜好度或偏好性感官测试本质上都是主观的。讲师可以进一步阐述并讨论 2004 年杯测评估表如何混合了区别性、描述性和情感性评

估。Sensory Science: Sensory science has also progressed, helping us understand what kinds of sensory tests we're performing, that these tests shouldn't be combined if we want to avoid bias, and that all hedonic or preference sensory tests are inherently subjective. Trainers may expand on this and discuss the ways in which the 2004 cupping form mixed discriminative, descriptive, and affective components.

因此，SCA 新开发了一套新的评估咖啡质量与价值的方法，称之为 SCA 咖啡价值评估 (CVA)。其目标很简单：如果我们能够衡量咖啡中的各种属性，我们就能更好地评估咖啡的价值，进而理解究竟何谓「精品咖啡」。通过这样的理解，我们将能够呈现更好的咖啡，并通过一个更透明的价值发现系统帮助生产者获得更好价格。For this reason, the SCA has developed a new way of assessing coffee's quality and value. It's called the SCA Coffee Value Assessment, or CVA. The goal here is simple: if we can measure the attributes in coffee, we can better assess coffee's value, and therefore understand what "specialty" coffee actually is. Through this understanding, we will be able to make coffee better and help producers fetch better prices through a more transparent value-discovery system.

1.3 了解 15 分强度量表 Understanding the 15-Point Intensity Scale

学习目标 Learning Objectives:

1. 说明 15 分强度量表的功能与背景。 Explain the function and background of the 15-point intensity scale.

咖啡最受重视的属性之一就是感官属性，为了衡量感官属性，我们需要使用来自感官科学领域的技术。咖啡价值评估中的「杯测」部分就是一系列感官测试，我们使用这些测试来评估与咖啡饮用体验相关的感官属性，包括味道、气味、风味与口感。 Among the most valued attributes a coffee can have are its sensory attributes. To measure sensory attributes, we need to use techniques that come to us from the discipline of sensory science. The "cupping" portion of the Coffee Value Assessment is a set of sensory tests. We use these to assess the sensory attributes we associate with drinking coffee, including tastes, smells, flavors, and textures.

在感官科学中，测量感官属性的方法主要有三种，其各自以不同方式评估感官属性： In sensory science, there are three distinct kinds of sensory tests, which can measure sensory attributes in different ways:

- 第一种是「区别性」测试：简单而言，这种测试用于评估辨别两个或多个样本差异的能力。 The first is a "discriminative" test: simply, the ability to tell the difference—to discriminate—between two or more samples.
- 第二种是「描述性」测试：此方法使用标准化的词汇来描述感官体验。 The second kind of test is the "descriptive" test in which the user describes the sensory experience using a standardized vocabulary.
- 第三种是「情感性」测试：主要用于评估样本的质量或喜好度。 The third kind of test is the "affective" test, which measures quality or liking.

这是在任何精品咖啡公司杯测室经常会听到的一段话：「我品尝了三款咖啡，我最喜欢第三款，它尝起来有花香和甜味，是最棒的一款咖啡！」如您所见，这一段话就包含了三种类型的声明：品尝者能够辨别不同咖啡的区别性声明、咖啡带有花香和甜味的描述性声明，以及两个情感性声明（关于喜好及质量）。 Here is a statement that would be very familiar in the cupping room of any specialty coffee company: "I tasted three coffees. I liked the third one. It tasted floral and sweet—it was the best!" As you can see, this single statement contains all three types of claims: the discriminative claim that the taster can distinguish between coffees, the descriptive claim that the coffee was floral and sweet, and two affective claims (one about liking and the other about quality.)

由于我们的语言中涵盖了这些类别，它们也往往被包含在杯测标准规范中。在「旧版」2004 年 SCA 杯测表中 [播放 2004 年杯测表的蓝色与灰色区块]：浅灰色区块属于情感性评项，蓝色区块是描述性评项，深灰色区块则是区别性评项。在感官科学中，将这些类别混合在一起评估被认为是不好的做法，因为这些本质上是不同的咖啡评估方式。将描述性与情感性元素分开，我们能更准确、更真实地评估咖啡。 Because we include all these categories in our language, we have often included them all in our cupping protocols. See here on the "old" 2004 SCA form [Show Blue and Gray Section of 2004 Form]: the light gray sections are affective, the blue sections are descriptive, and the dark gray section is discriminative. This is considered bad practice in sensory science, since these are fundamentally different ways of evaluating coffee. By separating descriptive and affective elements of the cupping form, we can be much more accurate and truthful when evaluating a coffee.

因此，SCA 将感官分析 – 我们常称之为杯测 – 分为 SCA 咖啡价值评估中的两大评项：描述性评估和情感性评估。For this reason, the SCA split the sensory analysis—what we often call cupping—into two sections in the SCA Coffee Value Assessment: the Descriptive Assessment and the Affective Assessment.

描述性评估是一种量化的感官测试，旨在对产品所有感知到的感官属性进行描述，它被视为一项客观测试，因为它不涉及喜好或质量。例如：形容某款咖啡具有「果香」，但不对果香气好坏进行评价。描述性评估使用标准化且熟悉的词汇来识别感官属性，利用感官参照物来建立品鉴者之间的共识。也可以通过与其他训练有素的品评小组成员进行比较，评估个别品评者的表现。Descriptive assessment is a quantitative sensory test that seeks to profile a product on all its perceived sensory attributes. It is seen as an objective test because it does not relate to liking or quality. For example, a coffee can be described as "fruity" without any judgment over whether fruitiness is good or bad in a coffee. Descriptive assessment identifies sensory attributes using a standardized, familiar vocabulary. It utilizes sensory references to create a shared understanding among tasters. An individual taster's performance can be assessed against other trained panelists.

说明 15 分强度量表的功能与背景。然后，选择并进行一些与咖啡无关的活动，展示如何使用 15 分强度量表。建议从视觉活动开始，再进入与味道或口感相关的活动。Explain the function and background of the 15-point intensity scale. Then, select and facilitate several activities that don't relate to coffee to showcase the use of a 15-point intensity scale. Starting with visual activities before moving on to taste- or mouthfeel-focused activities is recommended.

每项活动结束后，带领讨论，展示如何达成共识或进行校正。所有参与者应该就每个样本的强度范围达成共识（例如：0-5 分或「低」、5-10 分或「中」、10-15 分或「高」）。At the conclusion of each activity, lead a discussion to demonstrate how to calibrate or reach consensus as a group. Everyone should agree on a general intensity range for each sample (e.g., between 0-5 or "low," between 5-10 or "medium," or between 10-15 or "high").

在大多数讨论中，打出异常分数的学员通常与其他小组成员相差一到两分（例如：某位评「高」的学员可能打出 11 分，而其他学员的「中」评分可能为 9 分）。在这些情况下，讲师应要强调这些分数仍然相当接近，显示出已达成共识或「校正」。In most discussions, learners with outlier scores are often within one to two points of other group members (e.g., a learner who is "high" may have rated the sample as 11, while other group members who are "medium" may have rated the sample as 9). In these cases, emphasize that these numbers are still fairly close together, demonstrating consensus or "calibration."

活动：颜色强度 Activity: Color Intensity

本活动使用油漆样本来帮助学员练习评估强度，讲师也可使用 PANTONE 色卡、彩纸、Agtron/SCA 色盘或类似材料替代。提供每位学员一份 15 分强度量表工作表与小便利贴，用来标记强度评分（便利贴可以方便学员在后续讨论中轻松调整自己的评分）。This activity uses paint samples to help learners practice rating intensities. Trainers may alternatively use the PANTONE Colorguide, colored paper, Agtron/SCA disks, or similar materials. Provide each learner with a 15-Point Intensity Scale Practice worksheet and small Post-It notes to mark their scales. (The Post-It notes allow learners to easily adjust their scores during consensus conversations later).

接下来，提供学员一个灰色油漆样本，请他们根据其黑色强度，按照 **1 到 15** 的量表进行评估。许多学员会注意到，工作表上的强度量表有灰色渐层，可以直接与油漆样本进行比较，以确定评分。鼓励学员使用便利贴标记他们的强度评分。Next, provide learners with a gray paint sample and ask them to rate the sample on a scale of 1–15 on its intensity of black color. Many participants will recognize that the intensity scales on their worksheets have a gray gradient, which can be compared to the paint sample directly to determine a rating. Encourage learners to indicate their intensity rating by marking an intensity scale with a Post-It note.

带领讨论，展示如何进行小组校正或达成共识。Lead a discussion to demonstrate how to calibrate or reach consensus as a group.

重复此活动，加入其他颜色样本：Repeat the activity with additional colors:

- 提供学员数个灰色油漆样本，请他们根据其白色强度进行评估，讲师也可以要求学员将这些样本从最浅到最深的顺序排列。Provide learners with several gray paint samples and ask learners to rate each sample based on its intensity of white color. Trainers may also ask learners to place the samples in order from lightest to darkest
- 提供学员一个或多个紫色油漆样本，请学员根据其蓝色强度进行评估。Provide learners with one or more purple paint samples and ask learners to rate each sample on its intensity of blue color.

活动：味道与口感强度 Activity: Taste and Mouthfeel Intensity

以水为基底，准备柠檬酸或柠檬汁溶液，准备至少两种不同强度的液体；保持每个样本的酸度在合理范围内（例如：一个低强度样本与一个中等强度样本）。标记每个样本（例如：样本 **A** 与样本 **B**）。Prepare citric acid or lemon juice solutions in a water base. Prepare at least two different intensities; maintain a realistic acidity level in each sample (e.g., one low-intensity sample and one medium-intensity example). Label each sample (e.g., Sample A and Sample B).

为每位学员准备每个样本一小杯（或请学员自行取样）。请学员使用 **15 分** 强度量表练习工作表和小便利贴来评估每个样本的酸味强度。Provide each learner with one small cup of each sample (or ask learners to serve themselves). Ask learners to rate the intensity of each sample's sourness using their 15-Point Intensity Scale Practice worksheet and small Post-It notes.

带领学员讨论，并强调每个样本的强度评分没有绝对的「对」或「错」，但其中一个样本的强度应该高于另一个。在理想情况下，即使有些学员使用较低的评分，而其他学员使用较高的评分，不同学员的样本评分之间的差距应该一致。Lead a discussion and emphasize that while there is no "right" or "wrong" intensity rating for each sample, one sample should be higher on the intensity scale than the other. Ideally, the distance between sample ratings is consistent among learners, even if some learners used lower ratings and others used higher ratings.

重复此活动，加入其他材料：Repeat the activity with additional ingredients:

- 准备两种以上不同强度的水与盐溶液，请学员为每个溶液的咸味强度评分。Prepare two or more solutions of water and salt at different intensities and ask learners to rate the intensity of each solution's saltiness.
- 准备两种「水与西红柿汁」溶液，请学员为每个样本的口感强度评分。Prepare two solutions of water and tomato juice. Ask learners to rate the mouthfeel intensity of each solution.

1.4 建立并使用描述性评估的参照物 Creating and Using References for Descriptive Assessment

学习目标：Learning Objectives:

1. 识别并使用 **CVA** 感官参照物。 Identify and utilize the CVA sensory references.

说明 **CVA** 标准规范中提供的参照物 (嗅觉分类范例) 的目的及其使用方式。强调将特定的感官感知归类为一组一致的描述词中，有助于杯测师之间更有效地沟通咖啡的描述性属性。讲师应举例说明如何将具体的感官感知归类到描述性评估表中所列的主类别及子类别。例如：一杯咖啡让人联想到巧克力饼干，可以勾选「坚果 / 可可-可可」、「甜-香草 / 香草醛」和「甜-黄糖」来表达。 Explain the purpose of the reference (olfactory category examples) list provided in the CVA Protocol and how to use it. Emphasize that being able to categorize one's specific sensory perceptions into a set of consistent descriptors helps cuppers communicate more effectively about the descriptive attributes of a coffee. The trainer should provide examples of how to categorize specific sensory perceptions into the categories and sub-categories featured on the Descriptive Form. For example, a coffee that evokes chocolate chip cookies could be communicated by checking the Nutty/Cocoa-Cocoa boxes, the Sweet-Vanilla/Vanillin and Sweet-Brown Sugar boxes.

在记录嗅闻到的干香气或湿香气时，初步印象有助于将特定的感官感知与记忆或情感链接，这样会使感官感知在之后更容易被识别。这些初步印象没有正确答案，因为每个杯测师的印象都是基于个人独特的经历、文化或母语背景。 Documenting one's initial impressions when detecting a fragrance or aroma can help connect specific sensory perceptions to memories or emotions. This makes the sensory perceptions easier to recognize later. There is no correct answer for this impression. Each cupper's impression is highly personal and may be based in their unique experiences, culture, or native language.

CVA 标准规范中列出的参照物并非标准化的范例，因此，可以使用各种不同的材料来代表描述性评估表中的每个主类别 / 子类别，该标准规范为每个类别列出了多种选择，最优先推荐的材料排在最前面，每个类别也包含经济实惠且易于当地采购的选项。 The references listed in the CVA Protocol are not standards. Therefore, a variety of different ingredients can be used to exemplify each category/subcategory on the Descriptive Form. The protocol lists different options for each category, with the most recommended ingredient listed first. Each category contains low-cost ingredient options, and many of these options can be locally sourced.

活动：感官参照物分类练习 #1 Activity: Sensory References Practice #1

关于如何准备参照物的详细说明，请见附录 **A** 与 **B**。将学员分组 (每组最多四名学员使用一套参照物)，每位学员应有一份感官参照物 (分类范例) 练习一的工作表。 See Appendix A and B for detailed instructions on setting up the references. Split the class into groups (up to four learners for each reference kit). Each learner should have a Sensory References (Category Examples) Practice Part 1 worksheet.

请学员逐一嗅闻每个参照物，并写下 **1)** 他们对每个参照物的嗅觉「印象」(以母语描述) 以及 **2)** 他们对每个参照物的主类别 (以及适用的子类别) 的猜测。 Ask learners to smell each reference one by one and write down 1.) what each reference smells like to them (their "impression" in their native language) and 2.) their guess for each reference's category (and subcategory if applicable).

当学员完成所有参照物嗅闻和猜测纪录后，让他们翻开对应的编码卡片，查看参照物的正确类别。给予额外时间让学员将正确答案记录在工作表中，并继续练习。Once learners have made a guess for all references, encourage them to flip over each coded card to reveal the references' categories. Provide extra time for learners to note the correct answers on their worksheets and continue practicing.

活动结束后，将参照物放在教室中杯测空间附近，以利学员在后续进行描述性评估时，再次嗅闻并核对所选的 **CATA** 描述词。After the activity, place the references outside but near the space that will be used for cupping later in the course. Learners can check their selection of CATA descriptors by smelling the references during the descriptive assessments.

本活动主要涉及以下参照物：This activity focuses on the following references:

- 花香 Floral
- 果香 Fruity
- 果香 – 果干 Fruity – Dry Fruit
- 果香 – 柑橘类水果 Fruity – Citrus Fruit
- 果香 – 莓果 Fruity – Berry
- 甜 – 黄糖 Sweet – Brown Sugar
- 甜 – 香草 / 香草醛 Sweet – Vanilla/Vanillin
- 香料 Spice
- 酸 / 发酵 – 酸 Sour/Fermented – Sour
- 酸 / 发酵 – 发酵 Sour/Fermented – Fermented

完成此活动后，建议稍作休息，然后继续进行感官参照物练习 **#2**。Take a break before starting Sensory References Practice #2.

活动：感官参照物分类练习 **#2** Activity: Sensory References Practice #2

关于如何准备参照物的详细说明，请见附录 **A** 与 **B**。将学员分组（每组最多四名学员使用一套参照物），每位学员应有一份感官参照物（分类范例）练习二的工作表。See Appendix A and B for detailed instructions on setting up the references. Split the class into groups (up to four learners for each reference kit). Each learner should have a Sensory References (Category Examples) Practice Part 2 worksheet.

请学员逐一嗅闻每个参照物，并写下 **1)** 他们对每个参照物的嗅觉「印象」，以及 **2)** 他们对每个参照物的主类别（以及适用的子类别）的猜测。Ask learners to smell each reference one by one and write down 1.) what each reference smells like to them (their "impression") and 2.) their guess for each reference's category (and subcategory if applicable).

当学员完成所有参照物嗅闻和猜测纪录后，让他们翻开对应的编码卡片，查看参照物的正确类别。给予额外时间让学员将正确答案记录在工作表中，并继续练习。Once learners have made a guess for all references, encourage them to flip over each coded card to reveal the references' categories. Provide extra time for learners to note the correct answers on their worksheets and continue practicing.

活动结束后，将参照物放在教室中杯测空间附近，以利学员在后续进行描述性评估时，再次嗅闻并核对所选的 **CATA** 描述词。After the activity, place the references outside but near the space that will be used for cupping later in the course. Learners can check their selection of CATA descriptors by smelling the references during the descriptive assessments.

本活动主要涉及以下参照物：This activity focuses on the following references:

- 坚果 / 可可 – 坚果 Nutty/Cocoa – Nutty
- 坚果 / 可可 – 可可 Nutty/Cocoa – Cocoa
- 绿色 / 植物 Green/Vegetative
- 其他 – 陈腐霉味 / 泥土 Other – Musty/Earthy
- 其他 – 木质 Other – Woody
- 其他 – 化学 Other – Chemical
- 烘焙 Roasted
- 烘焙 – 谷物 Roasted – Cereal
- 烘焙 – 烧焦 Roasted – Burnt
- 烘焙 – 烟草 Roasted – Tobacco

1.5 CATA (勾选「所有适用的选项」) 列表 CATA (Check All That Apply) Lists

学习目标 Learning Objectives:

1. 说明 **CATA** 列表的功能与背景。Explain the function and background of CATA lists.

描述性感官方法将风味分解为单独的组成部分，就像棱镜将白光分解成许多不同的颜色一样。描述性评估所使用的词汇，主要根据世界咖啡研究词汇与相关风味轮的词汇表，将一些最常见的描述词整合到「勾选所有适用的选项」(**CATA**) 系统中。杯测师可组成描述性小组并帮助收集描述性资料，以便用于研究及贸易用途。必要时，**CVA** 数据可以通过专门且正式的定量描述分析小组来验证。A descriptive sensory approach deconstructs flavor into its individual components, much like a prism breaks white light down into many different constituent colors. The Descriptive Assessment uses a lexicon based on the World Coffee Research lexicon and the associated flavor wheel. It puts some of the most common descriptors into a Check All That Apply (CATA) system. Cuppers can act as a descriptive panel and help collect descriptive data that can be used for both research and trade purposes. If necessary, CVA data can be validated with a dedicated, formal Quantitative Descriptive Analysis panel.

*介绍 **CATA** 列表的功能与背景，讨论适当的使用方式，以及何时/如何记录自由填写的描述词。Introduce the function and background of CATA lists. Discuss proper usage and when/how to note freely elicited descriptors.*

活动：CATA 与调味溶液 Activity: CATA with Flavored Solutions

关于如何准备调味溶液的详细说明，请见附录 B。See Appendix B for detailed instructions on setting up the flavored solutions.

本活动旨在供学员练习使用 **CATA** 列表，并帮助学员区分风味的鼻后嗅觉与味觉成分。学员将品尝风味溶液，并使用 **CATA** 列表标记每种溶液的嗅觉（鼻后嗅觉）特征。每位学员都应该拥有一份 **CATA** 表使用练习工作表。The purpose of this activity is to practice using CATA lists, which require learners to discriminate between the retronasal and taste components of flavor. Learners are given flavored solutions and mark the olfactory (retronasal) profile of each solution using CATA lists. Each learner should have a CATA List Usage Practice worksheet.

请学员品尝每个溶液，并使用工作表勾选「所有适用的选项」的描述词。应强调下列重点：

Ask learners to taste each solution and "check all that apply" using their worksheets. Emphasize the following points:

- 为了鼓励学员能更清楚区分不同样本，在这个活动中，每个样本最多只能勾选五个方框。To encourage differentiation among samples, learners should not select more than five boxes per sample during this activity.
- 目标是找出最符合他们鼻后嗅觉的样本类别。The goal is to find the closest categories that match their retronasal perception of the samples.

当学员为每个样本勾选了 **CATA** 描述词后，一起回顾揭晓每个溶液的风味。强调即使所有的溶液都带有甜味，但有些并没有甜的鼻后嗅觉特征（例如：甜味、香草 / 香草醛、或黄糖）。同样地，一杯带有酸味的咖啡也不一定会呈现出酸 / 发酵的鼻后嗅觉特征。After learners have select CATA descriptors for each sample, review the flavors in each solution. Emphasize that even though all the solutions taste sweet, some do not have sweet retronasal qualities (sweet, vanilla/vanillin, or brown sugar). Similarly, a coffee that tastes sour may not display sour/fermented retronasal qualities.

1.6 描述性评估 #1 Descriptive Assessment #1

学习目标 Learning Objectives:

1. 使用 **CVA** 描述性评估表描述并评估咖啡。Use the CVA Descriptive Form to describe and evaluate coffee.

说明如何填写描述性评估表。Explain how to fill out the Descriptive Form.

活动：描述性评估 #1 Activity: Descriptive Assessment #1

本活动旨在让学员初步练习描述性评估，并整合当天已学习到的描述性评估表的元素。准备五款不同的咖啡进行描述性评估 #1，其中一款咖啡会重复使用（请参见附录 B 的建议咖啡清单），并对每款咖啡进行编码标记。The purpose of this activity is to practice the descriptive assessment for the first time and integrate the elements of the form learned throughout the day. Use five different coffees for Descriptive Assessment #1. One of these will be repeated (see Appendix B for coffee recommendations). Code each coffee as desired.

建议使用滴滤式咖啡机或法式滤压壶来冲煮咖啡，粉水比为 **55g/L**，安排冲煮所有咖啡样本，并将冲煮好的咖啡保存在标记清楚的保温壶中。提供每位学员少量的咖啡（每款各约

100mL)，并准备好标记清楚的小型容器盛装咖啡粉样本，供学员评估干香气。为每位学员提供足够数量的描述性评估表。Preparing the coffees using either batch brew or French press is recommended. Use a ratio of 55g/L. Coordinate the brewing of all samples and keep the brewed coffee in labeled airports. Each learner will only need a small individual cup of each coffee (around 100mL). Distribute small, clearly labeled containers with coffee grounds of each sample so learners can assess the fragrance. Distribute a sufficient number of Descriptive Forms to each learner.

讲师亦可选择以杯测方式进行此活动，但建议使用冲泡咖啡，因为流程安排较为简便、且萃取一致性较高，还能展示描述性评估在非杯测情境中的其他应用。Trainers may, alternatively, conduct a cupping for this activity. However, brewed coffee is recommended for easier logistics, extraction consistency, and to demonstrate the use of the Descriptive Assessment in applications other than cupping.

品尝第一个样本，并与全班一起进行评估（示范样本不应为重复样本）鼓励学员提问。使用个人杯和一个装有咖啡粉的小型加盖容器，逐项填写描述性评估表。从评估干香气，然后是湿香气，接着是风味及余韵（包括主要味道），以此类推，直到完成整张评估表。进行校正讨论（像是之前课堂中进行的强度量表与 **CATA** 描述词的讨论），帮助全班达成共识。Taste the first sample and evaluate it as a class. (Don't use the repeated sample for demonstration!). Encourage learners to ask questions. Assess the brewed coffee together with learners using individual cups (plus one small, covered container with the grounds for fragrance) and fill out the form as a group portion by portion. Start with fragrance and discuss it, then aroma, then flavor and aftertaste (including main tastes), and so forth until the form is completed. Facilitate a calibration discussion (like the discussions conducted earlier in the class with intensity scales and CATA descriptors) to help the group reach more of a consensus.

第一个样本评估完成后，指导学员独立完成其余五个样本的评估，并观察学员使用评估表的情况，适时提供协助或支持。当学员完成活动时，收回他们的描述性评估表。活动结束后，与全班进行简短的反思讨论，总结学习要点。Once the first sample has been assessed, instruct learners to evaluate the remaining five samples independently. Observe how learners are using the forms and provide assistance or support as needed. Collect the Descriptive Forms from learners as they complete the activity. Conduct a brief, reflective discussion as a group once the activity is finished.

课程第 1 天结束后为每份评估表评分，并在第 2 天开始时发还给学员。针对每份评估表提出反馈意见（指出错误之处、提供评论及建议）。After Day 1 concludes, grade each form so that they can be returned to learners at the beginning of Day 2. Include feedback on each form (highlight any portions that are incorrect, write comments, show options, etc.)

1.7 9 分情感性量表与情感性评估 Nine-Point Affective Scales and Affective Assessment

学习目标 Learning Objectives:

1. 使用 **CVA** 情感性评估表描述并评估咖啡。 Use the CVA Affective Form to describe and evaluate coffee.

活动：Activity:

本活动旨在使用非咖啡相关的食品来练习与讨论 9 分情感性量表。认识这份情感性评估将有助于经验丰富的杯测师于评估咖啡时，不再自我设限。The purpose of this activity is to use food items (not coffee-related) to practice and discuss the nine-point affective scale. This introduction to the Affective Assessment helps experienced cuppers think outside of the constraints they place on themselves while evaluating coffees.

为每位学员分配两到三种类型的常见点心（糖果、干酪、饼干或其他食品 / 饮料类别），请学员使用 9 分情感性量表对每种点心进行评分。讲师可以指导学员简单对每种点心进行整体评分，或点出几个特征以供评分（例如：整体与酸质、整体与口感）。讲师可以通过问卷或观众反应工具来收集评分，并在每个学员完成后展示给全班。Distribute two to three types of a common snack (candy, cheese, cracker, or another food/beverage category) to each learner. Ask learners to rate each snack using the nine-point affective scale. Trainers may instruct learners to simply rate each snack overall or provide several characteristics to rate (e.g., overall and acidity, overall and mouthfeel). Trainers may use survey or audience response tools to collect the ratings and display them to the group after everyone has completed the exercise.

讨论这个活动并找出学员意见不同之处，强调几个主要重点：Discuss the activity and pinpoint areas where learners' opinions differ. Emphasize several key points:

- 所有人对食品都会有情感反应，每个人都能回答「我是否喜欢？」这个问题。All humans will have an affective response. Anyone can answer the question, "Do I like it?"
- 对质量印象意见分歧乃正常现象，关于质量印象没有绝对的「对」或「错」。Diverging impressions of quality can and will happen. There is no "right" or "wrong" answer when it comes to impression of quality.

咖啡感官属性的情感性评估是我们如何评价咖啡的一个重要部分，尤其是在精品咖啡领域。情感性评估与描述性评估有一些重要区别，理解两者之间的区别对于评估咖啡的价值至关重要。Affective assessment of coffee's sensory attributes is a big part of how we value coffee, particularly in the specialty coffee world. Affective assessment differs from descriptive assessment in some important ways, and understanding the difference between the two is a big part of appraising a coffee's value.

描述性评估回答的是「它尝起来像什么？」这个问题；情感性评估则回答不同的问题类别，例如：「我喜欢这杯咖啡吗？有多喜欢？」或「这是一杯高质量的咖啡吗？」只要是针对一种刺激或多重刺激评估其接受度、喜好、偏好或情感，都属于情感性评估。Whereas descriptive assessment answers the question "What does it taste like?" affective assessment answers a different category of questions, such as "Do I like the coffee and how much?" or "Is this coffee of high quality?" Affective assessment is any method that assesses acceptance, liking, preference, or emotions for a stimulus or stimuli.

但在咖啡杯测的情境中，这又意味着什么呢？我们可能使用描述性分析来客观评估咖啡的组成风味，但我们如何衡量对咖啡风味的情感性反应呢？What does that mean in the context of a coffee cupping? We might use descriptive analysis to objectively evaluate the constituent flavors of coffee, but how do we measure affective responses to coffee's flavors?

CVA 使用一个术语来捕捉情感性评估在咖啡杯测中的本质：对质量的印象。「对质量的印象」呈现咖啡杯测者对于咖啡感官类别的独特性与吸引力的见解，进而反映了个人偏好或是已知市场的偏好。CVA uses a term that captures the essence of affective assessment in a coffee cupping: impression of quality. The impression of quality is a coffee taster's opinion of the distinctiveness and desirability of a coffee sensory category, reflecting either their own preference or a known market preference.

「您的偏好」是指您认为质量很高的咖啡。这是基于您身为咖啡品鉴师的经验与知识，以及自身品味。至于第二个类别「已知市场偏好」，是指基于特定咖啡产业细分市场或某一消费者群体中的公认规范与偏好，“Your preference” is a coffee you think is of high quality. This is based on your own experience and knowledge as a coffee taster, and your own tastes. The second category, “a known market preference”, is based on understood norms and preferences in a particular segment of the coffee industry or among a particular segment of consumers.

这就是杯测师从描述咖啡的感官属性转为表达对咖啡质量的印象，这个过程取决于杯测师在累积经验后所得出的专业意见。重要的是，应记住此类评估就像所有情感性衡量一样，具有主观性，它可能反映的是杯测师的个人反应，或者是已知市场的偏好（换句话说，就是预测他人的情感性反应）。重要的是，我们不应期待在情感性衡量上，杯测师之间会有完全一致的结果，因为它们是基于个人或市场的偏好，而这些偏好往往因人而异。So, this is how a cupper switches from describing the coffee's sensory attributes to expressing their impressions of a coffee's quality. This process relies on a cupper's expert opinion, developed through experience. It's important to remember that this assessment, like all affective measures, is subjective. It might reflect a cupper's personal response, or a known market preference (in other words, predicting others' affective response). Importantly, one would not expect perfect alignment between cuppers on affective measurements, since they are based on individual or market preferences, which are diverse.

向学员介绍情感性评估表的组成部分，包括 9 分情感性量表、一致性与瑕疵。阐明情感性评估表上的评论应该与偏好相关，而非仅仅列出描述性特征。Introduce learners to components of the Affective Form, including the nine-point affective scale, uniformity, and defects. Clarify that comments on the Affective Form should relate to preference and should not simply list descriptive characteristics.

面授课程第 2 天 In-Person Course DAY 2

2.1 回顾第 1 天的描述性评估表 Review Descriptive Forms from Day 1

学习目标 Learning Objectives:

1. 使用 **CVA** 描述性评估表描述并评估咖啡。 Use the CVA Descriptive Form to describe and evaluate coffee.

将第 1 天的描述性评估表发还给学员，并确保每位学员了解他们是否通过了第一次测验，并针对常见问题与有待改进之处进行小组讨论。最常见的问题包括：Return the descriptive forms from Descriptive Assessment Session #1 to learners and ensure that each learner understands whether they passed this first attempt. As a group, discuss the common issues detected and common areas for improvement. The most common issues are:

- 1.) 学员忘记标注强度量表或主要味道。 Learners forget to mark an intensity scale or main tastes.
- 2.) 学员没有选择足够的 **CATA** 选项，或者对每杯咖啡选择相同的描述词。 Learners do not select enough CATA boxes or select all the same boxes for every coffee.

讨论结束后，请学员拍照留存个人的描述性评估表，然后收回所有评估表并妥善归档保存。 After the discussion, invite learners to take a photo of their form if they would like. Then, collect all the forms and keep them for your files.

2.2 情感性杯测 Affective Cupping

学习目标 Learning Objectives:

1. 使用 **CVA** 情感性评估表描述并评估咖啡。 Use the CVA Affective Form to describe and evaluate coffee.

活动：Activity:

准备杯测活动，每个样本各五杯，遵循 **CVA** 标准规范的指示来准备情感性杯测评估。

Prepare a cupping session using five cups per sample. Follow the CVA Protocol's instructions for preparing affective cuppings.

使用描述性评估 **#1** 中的五款咖啡，其中一款咖啡会重复使用（请参见附录 **B** 的建议咖啡清单），如情况允许，在其中一款样本中加入瑕疵样本（但不是重复的那款咖啡），并对每款咖啡进行编码标记。 Use the five coffees that were featured in Descriptive Assessment #1. One of these will be repeated (see Appendix B for coffee recommendations). If possible, include a defective cup in one of the samples (not the repeated coffee). Code each coffee as desired.

进行杯测时每桌最多六名参与者，在杯测室内来回观察学员如何使用评估表，并适时提出反馈意见或指导。 Conduct the cupping with no more than six participants per table. Walk around the room, observe how learners are using the form, and provide feedback or direction as needed.

杯测结束后，召集全班进行讨论。向学员提供 [分数计算器链接](#)，请学员输入他们的评分并计算每个样本的分数。选择两到三个样本，讨论学员对于该样本的质量印象，强调在情感性评估中，对于质量印象的不同看法不需要校正，正如在点心品尝活动中一样，没有绝对的

「对」或「错」。After the cupping is complete, reconvene as a group. Provide the [score calculator link](#) to learners. Learners can enter their ratings and calculate their scores for each sample. Discuss learners' impressions of quality of each attribute for two or three of the samples. Emphasize that with the Affective Assessment, differing impressions of quality do not demonstrate a need to calibrate. Just like with the snack activity, there are no "right" or "wrong" answers.

讨论学员为咖啡样本分数的看法，询问学员是否对自己的分数感到惊讶，以及如果使用 2004 年杯测系统，他们认为每款咖啡的分数会是多少。询问学员在本次活动中的感受，以及使用 2004 年杯测系统相比，完成杯测所需的时间差异。在结束活动之前，回顾情感性评估表中的一致性与瑕疵评项。Discuss the scores the learners calculated for the coffee samples. Ask if they were surprised by their scores and what they think each coffee would have scored if they had used the 2004 cupping system. Ask them how they felt during the session and how long it took them to complete the session compared to when they've used the 2004 cupping system. Before wrapping up the activity, review the uniformity and defect sections of the form.

收回评估表，批改评估表并针对每份评估表提出反馈意见（指出错误之处、提供评论及建议等）。在综合性杯测活动前，将此评估表发还给学员。Collect the forms. Grade the forms and include feedback on each form (highlight any portions that are incorrect, write comments, show options, etc.) Return these forms to learners sometime before the Combined Cupping Session.

2.3 外在评估 Extrinsic Assessment

学习目标 Learning Objectives:

1. 使用 CVA 外在评估描述并评估咖啡。Use the CVA Extrinsic Form to describe and evaluate coffee.

使用 CVA PowerPoint 简报来介绍外在评估，包括其发展、外在属性的价值及如何使用它们。分享实际情况，回想一项外在属性如何支持或改变咖啡的感知价值。Use the CVA

PowerPoint presentation to introduce the extrinsic assessment, including its development, the value of extrinsic attributes, and how to use them. Share real-life situations in which you recall an extrinsic attribute supporting or changing the perceived value of a coffee.

外在属性是来自咖啡 *相关* 信息的独特元素，任何无法直接测量或感知的咖啡特征均为外在属性。而且，如同感官属性，外在属性也能增加咖啡的价值。Extrinsic attributes are distinctive elements of the coffee that come from information *about* the coffee. Anything that cannot be directly measured or perceived about the coffee is an extrinsic attribute. And, just like sensory attributes, extrinsic attributes can add value to a coffee.

外在评估记录了根据业界常用的术语的咖啡信息性属性，外在属性的范例包括种植信息（如国家、产地、品种、生产者名称）、处理信息、贸易信息（如价格与等级）以及认证信

息，用户可以写下额外、未列出的属性。讲师可以提供其他可能需要注记的信息范例（例如：拍卖排名、用于比赛等）。The Extrinsic Assessment documents the informational attributes of a coffee based on common terms used in the industry. Examples of extrinsic attributes include farming information (e.g., country, region, variety, name of producer), processing information, trading information (e.g., price and grade), and certification information. The user can write in additional, unlisted attributes. *Trainers should provide examples of other information that could be noted (e.g., auction rankings, use in competitions).*

强调外在评估与描述性评估相似之处，都使用 **CATA** 表与笔记字段，并强调选择 **CATA** 表与增加书面批注来记录具体细节的重要性。Emphasize that the Extrinsic Assessment is similar to the Descriptive Assessment in its use of CATA boxes and notes. Emphasize the importance of selecting CATA boxes and adding written notes to document specific details.

活动：外在故事 Activity: Extrinsic Stories

从 **CVA** 杯测师课程工作表选择两则外在故事，并确保每位学员都各有一份复本，学员还需要一份外在评估练习工作表与外在评估表。Select two of the extrinsic stories provided in the CVA for Cuppers Course Worksheets packet and ensure learners have a copy of each. Learners will also need the Extrinsic Assessment Exercise worksheet and a copy of the extrinsic form.

给学员一些时间阅读故事并熟悉细节，请学员为每款咖啡填写评估。Provide some time for learners to read the stories and familiarize themselves with the details. Ask learners to fill out an assessment for each coffee.

在学员完成评估后，进行简短讨论。询问学员是否注意到一至多个特点，并询问他们认为哪些细节最有趣（例如：农场宠物、处理细节等）。请他们仅根据外在属性选择最喜欢的咖啡。After learners have completed their assessments, conduct a short discussion. Ask learners if they noted one or more specific points that interested them, and if so, which details they found most interesting (e.g., a farm pet, processing details, etc.) Ask them to select their favorite coffee based on only the extrinsic attributes.

接下来，揭示描述性评估 #1 与情感性评估杯测的咖啡信息（请参阅咖啡设定表的第一组活动），为每个故事与特定咖啡进行匹配。学员可以将此信息抄写到他们外在评估练习工作表中。请学员回顾每款咖啡的所有信息，并选择他们最喜欢的咖啡。与学员讨论以下问题：

Next, reveal coffee information from Descriptive Assessment #1 and the Assessment Cupping (see Coffee Key for First Set of Sessions). Assign each story to a particular coffee. Learners may copy this information into their Extrinsic Assessment Exercise worksheet. Ask learners to review all the information available about each coffee and select their favorite. Discuss the following questions with learners:

- 当所有咖啡信息揭示后，您最喜欢的咖啡是否改变了？为何改变或没有改变？Did your favorite coffee change once the information about all the coffees was revealed? Why or why not?
- 您个人最重视咖啡的哪些属性？What attributes do you personally value most in a coffee?

一旦学员提交了外在评估表（非工作表），请立即批改或在笔试期间批改，以确定哪些学员可能需要重考（请参阅附录 C）。Once learners submit their Extrinsic Forms (not the worksheets), grade them right away or during the written exam to determine which learners may benefit from a retake (see Appendix C).

2.4 参照物分类考试 Reference Categorization Exam

学习目标 Learning Objectives: 无 None

将两份参照物分类考试工作表中的其中一份发给每位学员。 Distribute one of the two reference categorization exam worksheets to each learner.

此工作表列出了一系列的香气，学员必须为每种香气选择最合适的主类别（如有子类别，亦须选择）。本实操测验旨在测试学员是否能够使用一致的描述词，将自己的感知准确地传达给其他杯测师，而非测试学员的感官敏锐度。 The worksheet presents learners with a list of aromas. Learners must identify the best category (and subcategory, if applicable) to describe each aroma. This practical exam component is not meant to test learners' sensory acuity, but rather their ability to communicate their perceptions to other cuppers using a consistent set of descriptors.

一旦学员提交工作表后，请立即批改或在笔试期间批改，以确定哪些学员可能需要重考（请参阅附录 C）。 Once learners submit their worksheet, grade them right away or during the written exam to determine which learners may benefit from a retake (see Appendix C).

2.5 描述性评估 #2 Descriptive Assessment #2

学习目标 Learning Objectives:

1. 使用 **CVA** 描述性评估表描述并评估咖啡。 Use the CVA Descriptive Form to describe and evaluate coffee.

活动：Activity:

使用三到四款咖啡进行描述性评估 #2，这些咖啡应该与描述性评估 #1 所使用的咖啡不同（请参见附录 B 的建议咖啡清单）根据需要对每款咖啡进行编码。 Use three to four coffees for Descriptive Assessment #2. These coffees should be different from the coffees used in Descriptive Assessment #1. (see Appendix B for coffee recommendations). Code each coffee as desired.

建议使用滴滤式咖啡机或法式滤压壶来冲煮咖啡，粉水比为 **55g/L**，安排冲煮所有咖啡样本，并将冲煮好的咖啡保存在标记清楚的保温壶中。提供每位学员少量的咖啡（每款各约 **100mL**），并准备好标记清楚的小型容器盛装咖啡粉样本，供学员评估干香气。为每位学员提供足够数量的描述性评估表。 Preparing the coffees using either batch brew or French press is recommended. Use a ratio of 55g/L. Coordinate the brewing of all samples and keep the brewed coffee in labeled airports. Each learner will only need a small individual cup of each coffee (around 100mL). Distribute small, clearly labeled containers with coffee grounds of each sample so learners can assess the fragrance. Distribute a sufficient number of Descriptive Forms to each learner.

当学员完成活动时，收回他们的描述性评估表。询问学员在提交评估表之前是否要拍照保存，因为评估表在评分后不会退还。妥善保存已评分的评估表。 Collect the Descriptive Forms from learners as they complete the activity. Invite learners to take a photo of their form if they wish before submitting it, because the forms will not be returned after grading. Keep the graded forms for your files.

2.6 笔试测验 Written Exam

学习目标 Learning Objectives: 无 None

为学员安排时间完成笔试。 Provide time for learners to complete the written exam.

2.7 综合性杯测 Combined Cupping

学习目标 Learning Objectives:

1. 使用 **CVA** 描述性与情感性评估表描述并评估咖啡。 Use the CVA Descriptive and Affective Forms to describe and evaluate coffee.

虽然存在综合评估表，但最不推荐使用，因为感官科学建议将客观与主观工作分开进行。如果咖啡专业人士使用综合评估表，则应该使用杯测方式来准备样本。对每个评项进行横向评估，以便在相同温度下同时进行描述性与情感性评估。常见的错误是，不小心将「对质量的印象」标记在描述性强度量表上。 While the Combined Form is available, it is the least recommended because sensory science advises us to separate objective and subjective tasks. If coffee professionals use the Combined Form, they should use the cupping methodology to prepare the samples. Evaluate each section horizontally to assess descriptively and affectively at the same temperature. One common mistake is accidentally marking one's impression of quality on the descriptive intensity scales.

活动： Activity:

准备杯测活动，每个样本各五杯，遵循 **CVA** 标准规范的指示来准备情感性杯测评估。 Prepare a cupping session using five cups per sample. Follow the CVA Protocol's instructions for preparing affective cuppings.

使用与描述性评估 **#2** 相同的咖啡，使用不同的编码并以不同顺序呈现咖啡，为学员提供足够数量的综合评估表，进行杯测时每桌最多六名参与者。 Use the same coffees from Descriptive Assessment #2. Use different coding and present the coffees in a different order. Provide a sufficient number of Combined Forms to learners. Conduct the cupping with no more than six participants per table.

当学员完成活动后，收回他们的综合评估表。询问学员在提交评估表之前是否要拍照保存，因为评估表在评分后不会退还。妥善保存已评分的评估表。 Collect the Combined Forms from learners as they complete the activity. Invite learners to take a photo of their form if they wish before submitting it, because the forms will not be returned after grading. Keep the graded forms for your files.

在本活动结束前，进行简短讨论。询问学员对于综合评估表的感受，以及认为在何种情况下综合评估表会对其工作有帮助。 Before concluding the activity, lead a brief discussion. Ask learners how they felt with the Combined Form and in what situations they feel it could be useful in their work.

2.8 香气类与外在评估考试重考 Aroma Categorization and Extrinsic Exam Retakes

学习目标 Learning Objectives: 无 None

进行香气类考试的重考时，向学员分发他们尚未测试过的那份香气类工作表，请学员按照第一次考试的方式完成并提交工作表。For aroma categorization retakes, distribute the version of the aroma categorization exam worksheet that learners have not yet completed. Ask learners to complete and submit the worksheet in the same fashion as Attempt #1.

进行外在评估考试的重考时，向学员分发一份新的外在评估表以及他们尚未阅读过的外在故事，请学员按照第一次考试的方式完成并提交外在评估。For extrinsic assessment retakes, distribute another copy of the Extrinsic Form and an extrinsic story that learners have not yet reviewed. Ask learners to complete and submit the Extrinsic Form in the same fashion as Attempt #1.

附录 A：CVA 嗅觉类别范例 Appendix A: CVA Olfactory Category Examples

所有参照物依理想程度到有帮助依序排列。请注意，此列表仍在开发 / 审定过程中，预计作为「活文件」持续更新。随着价值评估系统的使用，可能会逐渐增加新的参照物，以反映新描述词变得越来越重要或有价值。最新的完整类别范例列表，[电子文件请点此](#)。All references are indicated in order of most ideal to helpful. Please note this list is still in development/ratification and is expected to function as a "living document." Additional references may be added over time as the use of the value assessment system indicates new descriptors are becoming increasingly important or valuable. For the latest full list of category examples, [please see the digital version of the list here](#).

讲师应使用下列的其中一项来准备参照物，如果这些项目无法取得，讲师应创建一个与之相似的参照物。讲师如有任何关于获取或创建参照物的问题，请联系 education@sca.coffee。Trainers should use one of the items described below for each of the references. If these items are not available, trainers should create a reference using items that are as similar as possible. Trainers may reach out to education@sca.coffee with any questions related to reference procurement or setup. °

花香 FLORAL

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
茉莉绿茶 Jasmine Green Tea	取出茶包，将一个茶包或 1 茶匙的茶叶放入塑料或玻璃杯中并盖上，浸泡 5 分钟后取出茶包。Remove tea from bag, place one tea bag or 1 teaspoon in a plastic or glass cup and cover. Steep for 5 minutes and remove bag.	Bigelow 茉莉绿茶、Twinings 茉莉绿茶、Numi 茉莉绿茶、Rika 经典茉莉花茶、Pique 绿茉莉花茶 Bigelow Jasmine Green Tea, Twinings Jasmine Green Tea, Numi Jasmine Green Tea, Rika's classic Te de Jazmin, Pique Green Jasmine Tea
"Le Nez du Café" – Vial #12	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #68	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	"Scentone" T100
康乃馨精油 Carnation Oil	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Salvia 康乃馨精油、Nature's Oil 花香康乃馨精油、Young Living/DoTerra 康乃馨精油 Salvia Carnation Oil, Nature's Oil Floral Carnation Oil, Young Living/DoTerra Carnation Essential Oil
白葡萄汁 White Grape Juice	将果汁倒入塑料或玻璃杯中并盖上。Place juice in a plastic or glass cup and cover.	Welch's 白葡萄汁 Welch's White Grape Juice

果香 FRUITY

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
苹果酱 (苹果泥) Apple sauce (puree)	将纯苹果泥 / 苹果酱以 1:1 的比例稀释，放入玻璃或塑料杯中并盖上。Dilute pure apple puree/sauce on a one-to-one ratio, place in a glass or plastic cup and cover.	Gerber、Motts (请注意避免有添加香料的) Gerber, Motts, (be mindful of no spices added).
奇异果与苹果糖浆 Kiwi and apple syrups	将等量的奇异果糖浆和苹果糖浆混合，放入玻璃或塑料杯中并盖上。Blend equal parts of kiwifruit syrup and apple syrups; place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet (请注意使用纯水果糖浆，避免有焦糖或奶油风味) Monin, Torani, DaVinci Gourmet (be mindful it is plain fruit syrup, with no caramel or butter flavors)
"Le Nez du Café" – Vial #17 – 苹果 Apple	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"

Scentone T100 – Vial #32 – 苹果 Apple	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	"Scentone" T100
奇异果草莓果汁 Kiwi-strawberry juice	将果汁倒入塑料或玻璃杯中并盖上。Serve juice in a plastic or glass cup and cover.	果汁 – Juice 100%果汁 Juicy-Juice 100% 草莓 – 奇异果 Juice Strawberry-Kiwi

莓果 (果香) BERRY (Fruity)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
草莓 Strawberries	将新鲜草莓 (成熟的) 放入玻璃或塑料容器中，置于室温并盖上。Place all natural strawberries (ripe) in a glass or plastic container at room temperature and cover.	任何品牌 Any
草莓糖浆 Strawberry syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
蓝莓糖浆	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
覆盆莓糖浆 Raspberry syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
"Le Nez du Vin" – Vial #12 – 草莓 Strawberry	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Vin"
Scentone T100 – Vial # 15 – 草莓 Strawberry	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

果干 (果香) DRIED FRUIT (Fruity)

范例 Example	准备方法 How to Prepare	建议的品牌
葡萄干与西梅干 Raisins and Prunes	取 ¼ 杯葡萄干与 ¼ 杯西梅干，切碎后加入 ¾ 杯水，微波加热 2 分钟，使用筛网过滤液体，放入玻璃或塑料杯中并盖上。¼ cup dry raisins and ¼ cup dry prunes chopped. Add ¾ cup water and cook in microwave on high for 2 minutes. Filter liquid with sieve. Place in a glass or plastic cup and cover.	Sun-Maid
西梅汁 Prune Juice	将 1 份西梅汁与 2 份水混合稀释，待液体达到室温后倒入玻璃或塑料杯中并盖上。Dilute 1 part juice to 2 parts water. Bring to room temperature for serving. Place in a glass or plastic cup and cover.	Sunsweet

柑橘类水果 (果香) CITRUS FRUIT (Fruity)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
柠檬与莱姆皮 Peels of Lemon and Lime	将 0.5 克的柠檬皮与 0.5 克的莱姆皮放入塑料或玻璃杯中并盖上。Place 0.5 grams of lemon peel and 0.5 grams of lime peel in a plastic or glass cup and cover.	
"Le Nez du Café" – Vial # 15 – 柠檬	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial # 26 – 柠檬或 #28, 莱姆 Scentone T100 – Vial # 26 – Lemon OR #28, Lime	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	"Scentone" T100
柠檬糖浆 Lemon syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
莱姆糖浆 Lime syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
柑橘精油 / 柠檬精油 Citrus oils/Lemon oil	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Salvia 精油、Nature's Oil、Young Living/DoTerra 柑橘或柠檬精油 Salvia Oil, Nature's Oil, Young Living/DoTerra Citrus or Lemon Essential Oil

香草 / 香草醛 (甜) VANILLA / VANILLIN (Sweet)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
香草精 Vanilla Extract	将数滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。Place a few drops essence on a cotton ball, place in a plastic or glass cup and cover.	McCormick 或其他纯香草精 McCormick or other pure vanilla extract
香草糖浆 Vanilla syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
"Le Nez du Café" – Vial #10, 香草 Vanilla	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #77, 香草 Vanilla	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	"Scentone" T100

黄糖 (甜) BROWN SUGAR (Sweet)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
黄糖 (也称为 Muscovado 或 Turbinado) Brown Sugar (Also called Muscovado or Turbinado)	将一茶匙的黄糖放入塑料或玻璃杯中并盖上。 Place one teaspoon brown sugar in a glass or cup and cover.	C&H Light 黄糖 C&H Light Brown Sugar
"Le Nez du Café" – Vial #25 · 焦糖 Caramel	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。 One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial # 52 · 黄糖或 #51 · 焦糖 Scentone T100 – Vial #52, Brown Sugar OR #51, Caramel	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。 One drop of oil on a cotton ball; place in a plastic or glass cup and cover.	" Scentone "T100
焦糖糖浆 Caramel syrup	倒入玻璃或塑料杯中并盖上。 Place in a glass or plastic cup and cover.	Monin 、 Torani 、 DaVinci Gourmet

酸 (酸 / 发酵) SOUR (Sour/Fermented)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
白醋 White Vinegar	将白醋或 5%醋酸 溶液倒入塑料或玻璃杯中并盖上。 Place white vinegar or a 5% acetic acid solution in a glass or plastic cup and cover.	亨氏蒸馏白醋 Heinz Distilled White Vinegar

发酵 (酸 / 发酵) FERMENTED (Sour/Fermented)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
啤酒 Beer	倒入玻璃或塑料杯中并盖上。 Place in a glass or plastic cup and cover.	健力士，或类似的无啤酒花香气啤酒 Guinness, or a stout or similar beer without hop aroma
发酵草 Fermented grass	取 2 盎司 的玻璃罐，装入半罐草，紧闭盖子，在密封容器中发酵两周，并在罐中呈现。 Fill 2-ounce glass jars half full with grass and seal tightly with screw-on lids. Leave in airtight container for 2 weeks to ferment. Serve in jar.	

绿色 / 植物 GREEN / VEGETATIVE

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
洋香菜水 Parsley water "Le Nez du Café" – Vial #3, 花园豌豆或 #4, 小黄瓜 Le Nez du Café – Vial #3, Garden Peas OR #4, Cucumber Scentone T100 – Vial #91, 小黄瓜 Scentone T100 – Vial #91, Cucumber	清洗并切碎 25 克新鲜洋香菜，加入 300 毫升的水，静置 15 分钟，过滤掉洋香菜，取一汤匙洋香菜水，放入玻璃或塑料杯中。 Rinse and chop 25 grams of fresh parsley. Add 300mL of water and let sit for 15 minutes. Filter out the parsley. Serve one tablespoon of the water in a glass or plastic cup. 将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café" "Scentone" T100

坚果 (坚果 / 可可) NUTTY (Nutty / Cocoa)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
切碎的杏仁与核桃 Almonds and Walnuts, chopped	分别将切碎的杏仁与核桃放入搅拌机中，打碎 45 秒，将切碎的杏仁与胡桃等量混合，将大约 30 克的混合坚果放入塑料或玻璃杯中并盖上。Chop the almonds and walnuts separately in blenders for 45 seconds. Combine equal amounts of the chopped nuts. Put approx. 30 g. in a plastic or glass cup, cover.	Diamond 切片杏仁、 Diamond 去壳核桃 Diamond sliced almonds, Diamond shelled walnuts
烘焙过的榛果 Roasted hazelnuts	将烘焙过的榛果放入塑料或玻璃杯中并盖上。Place roasted hazelnuts in a glass or plastic cup and cover.	
杏仁糖浆 Almond syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
"Le Nez du Café" – Vial # 29, 烘焙过的榛果 Le Nez du Café – Vial # 29 Roasted Hazelnut	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #40, 榛果 Scentone T100 – Vial #40, Hazelnut	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

可可 (坚果 / 可可) COCOA (Nutty / Cocoa)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
天然无糖可可粉	将 ¼ 茶匙可可粉与 100 毫升的水混合，放入玻璃或塑料容器中并盖上。	Hershey's 可可粉
"Le Nez du Café" – Vial # 26 · 黑巧克力 "Le Nez du Café" – Vial #26, Dark Chocolate	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #56 · 黑巧克力 Scentone T100 – Vial #56, Dark Chocolate	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

香料 SPICE

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
香料 Spices	将 0.25 克肉桂粉、0.25 克香料粉、0.25 克肉豆蔻粉与 0.06 克丁香粉混合，取 ¼ 茶匙混合物，放入玻璃或塑料杯中并盖上。 Mix 0.25 gr ground cinnamon + 0.25 gr ground allspice + 0.25 gr ground nutmeg + 0.06 gr ground clove. Serve ¼ teaspoon of mixture in a glass or plastic cup. Cover.	
南瓜香料糖浆 Pumpkin spice syrup	倒入玻璃或塑料杯中并盖上。Place in a glass or plastic cup and cover.	Monin、Torani、DaVinci Gourmet
"Le Nez du Vin" – Vial # 41 (肉桂) 或 #42 (丁香) "Le Nez du Vin" – Vial # 41 (cinnamon) or #42 (clove)	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Vin"
Scentone T100 – Vial #76 · 肉桂；或 #79 · 丁香 Scentone T100 – Vial #76, Cinnamon ; or #79, Clove	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

烘焙 ROASTED

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
深焙咖啡 (Agtron #35) Dark Roasted Coffee (Agtron #35)	将深焙咖啡粉放入塑料或玻璃杯中并盖上。 Place ground coffee in a plastic or glass cup and cover.	
"Le Nez du Café" – Vial # 34 · 烘焙咖啡 "Le Nez du Café" – Vial # 34, Roasted coffee	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"

Scentone T100 – Vial #50, 烘焙后咖啡熟豆 Scentone T100 – Vial #50, Roasted Coffee Bean	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100
--	---	-----------------

谷物 (烘焙) CEREAL (Roasted)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
混合的早餐谷物 Mix of breakfast cereals	混合等量的米香、玉米片与燕麦早餐谷物，放入搅拌机中，使用「脉冲」模式将其打碎成小颗粒，将 1 茶匙混合物放入中型酒杯中并盖上。Mix equal parts of puffed rice, corn flakes and oat breakfast cereals. Put in a blender and "pulse" blend into small particles. Place 1 tablespoon in a medium snifter. Cover.	General Mills、Kellogg's、雀巢 General Mills, Kellogg's, Nestlé
"Le Nez du Café" – Vial #22, 烤土司 "Le Nez du Café" – Vial # 22, Toast	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
"Le Nez du Café" – Vial #23, 麦芽 "Le Nez du Café" – Vial # 23, Malt	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #48, 麦芽 Scentone T100 – Vial #48, Malt	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

烧焦 (烘焙) BURNT (Roasted)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
烤焦的花生 Burnt peanuts	预热烤箱至 220°C，将生的去壳花生均匀地平铺在铺有烘焙纸的烤盘上，烤 20 分钟。Preheat oven to 220°C. Place raw, blanched peanuts in a single layer on a baking sheet lined with parchment paper. Roast for 20 minutes. 直至花生烤焦。将 1 茶匙花生放入中型酒杯中并盖上。Peanuts will be burnt. Place 1 tablespoon in a medium snifter. Cover.	
Scentone T100 – Vial #49, 烧焦的米 Vial #49, Burnt rice	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

烟草 / 烟斗烟草 (烘焙) TOBACCO/PIPE TOBACCO (Roasted)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
香烟 Cigarettes	撕开香烟，将 0.1 克 烟草放入中型酒杯中并盖上。Break cigarette and place 0.1 grams tobacco in a medium snifter. Cover.	骆驼牌 (土耳其与国产混合)、万宝路、宝马 Camel (Turkish and Domestic blends), Marlboro, Pall Mall
"Le Nez du Café" – Vial # 33 · 烟斗烟草 "Le Nez du Café" – Vial # 33, Pipe tobacco	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"

化学 (其他) CHEMICAL (Other)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
OK 绷 Adhesive bandage	将一个塑料创可贴 OK 绷 放入有盖的玻璃或塑料杯中。Place one plastic Band Aid adhesive bandage in a covered glass or plastic cup.	创可贴 Band Aid
碘酒 Iodine	将 $\frac{1}{4}$ 杯碘酒放入一个有盖的玻璃或塑料杯中。Place $\frac{1}{4}$ cup iodine in a covered glass or plastic cup.	
"Le Nez du Café" – Vial # 35 - 药用 "Le Nez du Café" – Vial # 35 - medicinal	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"

陈腐霉味 / 泥土 (其他) MUSTY/EARTHY (Other)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
商业花卉土壤 Commercial potting soil	将 20 克 花卉土壤放入塑料或玻璃杯中并盖上。Put 20g potting soil in a plastic or glass cup, cover.	Miracle-gro 花卉土壤 Miracle-gro potting soil
"Le Nez du Café" – Vial # 1 - 泥土 "Le Nez du Café" – Vial # 1 - Earthy	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"
Scentone T100 – Vial #92 - 蘑菇 Scentone T100 – Vial #92 - Mushroom	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	"Scentone" T100

木质 (其他) WOODY (Other)

范例 Example	准备方法 How to Prepare	建议的品牌 Suggested Brands
棒冰棍 Popsicle sticks	将棒冰棍折断以符合样本杯的尺寸，盖上塑料盖，这可以预先准备。 Break popsicle sticks to fit in sample cups of any size. Cover with a plastic lid. This may be prepared in advance.	
"Le Nez du Café" – Vial # 6 - 雪松 "Le Nez du Café" – Vial # 6 - Cedar	将一滴精油滴在棉球上，将棉球放入塑料或玻璃杯中并盖上。 One drop of oil on a cotton ball, place in a plastic or glass cup and cover.	Jean Lenoir "Le Nez du Café"

附录 B: 建议用品与设置 Appendix B: Suggested Supplies and Setup

参考材料 References:

请参阅 **CVA** 嗅觉类别范例 (见附录 A)。依照每个参照物所建议的物品，制作香气参照物套件 (每四名学员至少需准备一套)。大多数物品或材料可在当地取得或简单替代，若无法取得某些物品或材料，可以使用糖浆来替代特定参考香气。 Review the CVA Olfactory Category Examples (See Appendix A). Using the items suggested for each reference, create aroma reference kits (a minimum of one kit for every four learners). Most items or ingredients will be available locally or be easily adapted. When items or ingredients are not available, syrups can be used to substitute some of the references.

将这些参照物放入小型塑料「酱料型」容器中 (如图所示)。将参照物放置在纱布或棉花之间，以防学员通过摇晃容器来辨识参照物。并用铝箔纸将每个容器完全覆盖，并在顶部戳几个小孔，让学员无法以视觉辨识内部物品，但仍能闻到香气。使用完毕后，请盖上容器盖子以保护内容物。 Prepare these references in small plastic "sauce type" containers (see image below). Place the items between gauze or cotton so that learners cannot shake the containers to identify the references. Cover each container entirely in aluminum foil and punch small holes in the top so learners cannot see the reference ingredients but can still smell them. Place lids on each container over the foil when the references are not in use.

为每个香气参照物准备一张索引卡：索引卡的一面写上代码 (例如字母或数字)，另一面则写上该参照物的主类别名称 (若有子类别，也请标注)，但不要标示具体的材料名称。请确保代码与工作表上的代码一致，若讲师使用不同的代码，工作表也应相应调整。 Prepare one notecard for each reference. On one side of the notecard, write a code (e.g., a letter or number). On the other side, write the name of the category (and, if applicable, the subcategory) of the reference (**not** the ingredient). Ensure the codes match the worksheet. If the trainer uses different codes, the worksheet should be adapted to reflect this.

参加在线课程的学员，可以参考 **CVA** 协议中的嗅觉类别范例，为每个主类别及子类别寻找合适的材料。如果学员无法取得特定材料，讲师可以推荐相似的替代品。 Learners completing the course online may use the CVA Olfactory Category Examples in the CVA Protocol to source an ingredient for each category and subcategory. If learners cannot access specific ingredients, the trainer may recommend similar alternatives.

强度练习活动 Intensity Activities

- 油漆样本或彩色纸 Paint samples or colored paper
- 食用级柠檬酸或柠檬汁 Food grade citric acid or lemon juice
- 食盐 Table salt
- 西红柿汁 Tomato juice
- **8-10 个大型 (2 公升) 玻璃或塑料壶**，用于混合溶液。 8–10 large (2L) pitchers (glass or plastic) for mixing solutions

1. 使用柠檬汁制作酸度强度的建议配方 Suggested Recipe for Sourness Intensity Using Lemon Juice

- 样本 **A**：每 1 公升水加入 5 毫升柠檬汁 Sample A: 5mL Juice Per 1L Water
- 样本 **B**：每 1 公升水加入 12 毫升柠檬汁 Sample B: 12mL Juice Per 1L Water

2. 咸度强度的建议配方 Suggested Recipe for Saltiness Intensity

- 样本 **A**：每 250 毫升水加入 0.8 克食盐 Sample A: 0.8g Salt Per 250mL Water
- 样本 **B**：每 250 毫升水加入 0.4 克食盐 Sample B: 0.4g Salt Per 250mL Water

3. 口感强度的建议配方 Suggested Recipe for Mouthfeel Intensity

- 样本 **A**：每 250 毫升 100% 西红柿汁 Sample A: 250mL 100% Tomato Juice
- 样本 **B**：250 毫升混合液 (50% 西红柿汁 · 50% 水) Sample B: 250mL 50% Tomato Juice, 50% Water

使用风味溶液进行 CATA 练习活动 CATA with Flavored Solutions Activity

使用糖浆 (如 **Monin**)、食用香料或常见原料 (如饮料粉)，准备至少六种水溶液，尽可能按照瓶上的说明调制 (通常是每公升水加入 **80-100 毫升** 糖浆)。Using syrups (e.g., Monin), food grade flavorings, or common ingredients (e.g., drink mixes), prepare at least six water-based solutions. When possible, follow instructions on the bottle (generally, 80–100mL of syrup per liter).

其中一半的溶液应只含一种成分，另一半则应包含两种或以上成分的组合。确保某些样本中包含来自相同 **CATA** 类别或次类别的风味。例如：一个样本可以是柠檬和草莓的组合，另一个样本则是柠檬和蓝莓的组合，学员会选择相同的 **CATA** 选项，但应要能够辨识出不同之处。

Half of the solutions should contain one ingredient only. The other half should contain combinations of two or more ingredients. Ensure that some samples include flavors from the same CATA category or sub-category. For example, one sample could be a combination of lemon and strawberry, and another sample could be a combination of lemon and blueberry. Learners would select the same CATA boxes but should be able to detect a difference.

讲师可使用以下建议组合，或自行设计其他组合。Trainers may use one of the suggested sets below or create their own.

选择 1 一般组合 Option 1 – General	选择 2 特定组合 Option 2 – Specific	选择 3 特定组合 Option 3 – Specific
1 – 任何柑橘类 Any citrus	1 – 黑莓+柠檬 Blackberry + Lemon	1 – 杏仁+肉桂 Almond + Cinnamon
2 – 任何甜味+香草 Any sweet + vanilla	2 – 焦糖 Caramel	2 – 蓝莓+柠檬 Blueberry + Lemon
3 – 莓果+柑橘 Berry + citrus	3 – 杏仁 Almond	3 – 柑橘 Tangerine
4 – 任何甜味+香料 Any sweet + spicy	4 – 香草+焦糖+香料 Vanilla + Caramel + Spice	4 – 覆盆莓 Raspberry
5 – 莓果 Berry	5 – 蓝莓 Blueberry	5 – 蓝莓+杏仁 Blueberry + Almond
6 – 果香+甜味 Fruity + sweet	6 – 香草+柳橙 Vanilla + Orange	6 – 杏仁 Almond

为每个溶液编码。Code the solutions.

9 分制感官评估量表练习活动介绍 Introduction to the Nine-Point Affective Scale Activity

选择两到三种较具争议性的点心或食物（有些学员可能喜欢，而另一些则不喜欢），将点心分装在小型免洗杯或迷你杯子蛋糕纸模中，供学员品尝。Select two to three different snacks or food items that tend to be controversial (some learners may love them, while others may hate them). Serve snacks to learners in small disposable cups or mini cupcake liners.

在在线课程中，讲师可以要求学员购买特定的食物，确保每位学员品尝相同的产品。请指定所有学员都能轻松取得的食物（例如：可口可乐与百事可乐，或 Lindt 与 Ferrero 巧克力等）。When facilitating the course online, the trainer may ask learners to procure specific items so that learners can all taste the same products. Use items that are readily available to all learners (e.g., Coca Cola and Pepsi Cola, or Lindt and Ferrero chocolate).

如果学员有食物过敏或饮食限制，无法食用这些点心，仍可进行香气的评估。Learners with food allergies or dietary restrictions that prevent them from eating the snacks may still evaluate the aroma.

建议使用的咖啡（面授课程） Suggested Coffees (In-Person Course)

描述性评估#1 Descriptive Assessment #1:

- 一款具有强烈果香气咖啡，可以选择日晒法的咖啡，例如：埃塞俄比亚古吉或类似的咖啡。One coffee should present strong fruity notes. Consider a natural-processed (fruit-dried) coffee, an Ethiopia Guji, or similar.
- 一款风味较为平淡的咖啡，带有木质调性，可以选择陈年咖啡。One coffee should present a flatter cup profile and woody notes. Consider an aged coffee.
- 一款具有高强度酸质的咖啡，可以选择肯尼亚咖啡或其他类似咖啡。One coffee should present a high-intensity acidity. Consider a coffee from Kenya or similar.
- 一款带有黄糖风味的咖啡，可以选择哥伦比亚咖啡或其他类似咖啡。One coffee should present brown sugar notes. Consider a Colombian coffee or similar.
- 一款带有土味或坚果风味的咖啡，可以考虑印度尼西亚或苏门答腊咖啡来呈现土味，或选择巴西咖啡来呈现坚果香气。One coffee should present earthy or nutty notes. Consider a Sumatran or Indonesian coffee for earthy notes, or a Brazilian coffee for nutty notes.

情感性杯测评估 Affective Cupping Session:

使用描述性评估 **#1** 中所提到的咖啡。◦ Use the coffees featured in Descriptive Assessment #1.

描述性评估#2 Descriptive Assessment #2:

- 一款具有高强度口感的咖啡，可考虑选择干净（无瑕疵）的罗布斯塔咖啡。◦ One coffee should present a high mouthfeel intensity. Consider a clean (no defects) Robusta coffee.
- 一款具有明确可识别风味的咖啡，可选择任何处理法或特殊处理的风味咖啡。◦ One coffee should display clearly identifiable flavors. Consider any process or infused coffee.
- 一款干净（无瑕疵）的水洗咖啡。◦ One coffee should be a clean (no defects), washed coffee.
- 一款来自巴西的咖啡，但其风味特征偏离传统的甜味和坚果风味。如果课程在生产国举行，可以使用当地咖啡。◦ One coffee should be a Brazilian coffee with a flavor profile that deviates from the traditional sweet and nutty profile. Or, if holding the course in a producing country, use a local coffee.
- 一款咖啡带有情感性评估表所列的三种瑕疵之一。◦ One coffee should present one of the three defects identified on the Affective Form.

综合杯测评估 Combined Cupping Session:

使用描述性评估 **#2** 中的其中三款或四款咖啡，并变换呈现顺序和代码。◦ Use three or four of the coffees featured in Descriptive Assessment #2, varying the order of presentation and coding.

建议使用的咖啡（在线课程） Suggested Coffees (Online Course)

学员应使用具有多种不同感官特征的咖啡，并为在线课程准备六款咖啡（咖啡 **A、B、C、D、E、F**）。尽管面授课程能让学员接触更多的咖啡，一份精准简化的供应清单能降低在线课程学员设置活动的复杂性。◦ Learners should use coffees that display a wide range of sensory attributes. Learners need to source a total of six coffees (Coffee A, B, C, D, E, F) for the online course. While delivering the course in person exposes learners to more coffees, a more concise supply list reduces complexity for online learners setting up their own activities.

讲师应提供指导，说明应该选择哪些类型的咖啡，并可提供品牌或具体产品的建议。◦ Trainers should provide guidance on what types of coffees to source and may provide suggestions on brands or specific products.

建议设备和杯测用品 Suggested Equipment and Cupping Supplies

- 批量冲煮咖啡机、法式滤压壶、保温壶 Batch Brewer, French Presses, Airpots
 - 这些用于描述性评估的准备。参加在线课程的学员若没有保温壶来维持咖啡样本的温度，可以改为设置杯测（每个样本五杯）进行描述性评估。These are used for descriptive assessment preparation. Learners taking the online course may alternatively set up a cupping (five cups per sample) for descriptive assessment if they do not have airpots to keep the coffee samples warm.
- 磨豆机 Burr Grinder
- 热水机、水壶或大锅+炉子 Hot Water Tower, Kettle, or Large Pot + Stove
 - 用于加热冲泡或杯测所需的水。These are used for heating water for brewing or cupping.
- 钢杯 Pitchers
- 电子秤（精确至 0.1 克）Scales (0.1g Accuracy)
- 托盘 Trays
- 杯测碗 Cupping Bowls
 - 面授课程：每桌至少 **48** 个。In Person Course: At Least 48 Per Table
 - 在线课程：每位学员至少 **18** 个。Online Course: At Least 18 Per Learner
- 杯测桌 Cupping Tables
 - 面授课程：每六位学员一张桌子。In Person Course: One Table Per Six Learners
- 杯测匙 Cupping Spoons
 - 如有需要，可使用汤勺代替。Soup spoons can be used if necessary.
- 夹板 Clipboards
- 围裙 Aprons

建议打印清单 Suggested Printing List

- CVA 协议（此文件也可以以数字形式提供）CVA Protocol (This can alternatively be provided digitally).
- 描述性评估表 Descriptive Form
- 情感性评估表 Affective Form
- 综合性评估表 Combined Form
- 外在评估表 Extrinsic Form
- CVA 杯测师课程工作表 CVA for Cuppers Course Worksheets

建议准备额外的复印件，以防学员出错需要新的复印件。Extra copies may be helpful in case a learner makes a mistake and needs a new copy.

附录 C: 讲师评分表和评分标准

Appendix C: Trainer Scoresheet and Grading Criteria

本篇附录提供讲师有关每个实作测验的评分指导。讲师可以使用〈CVA 课程实作测验讲师评分纪录表〉来追踪并记录学员在各个项目中的表现，并在「备注」字段记录学员表现的整体观察结果，以便学员在课后联系讲师要求反馈时，讲师可使用「备注」字段的信息来回答学员的问题。

This appendix provides guidance for grading each practical exam component. Trainers may use the CVA Course Practical Exam Trainer Scoresheet to track learner performance across all components. Use the NOTES column to summarize observations of learner performance. If a learner reaches out for feedback after the course is complete, the trainer can use the NOTES column to respond to their questions.

要通过本课程，学员必须完成所有实作测验项目，总分至少达到 30 分中的 24 分 (80%或以上)，并且必须通过强度量表、CATA 表使用及情感性评估项目才能算是通过课程。

To pass the course, learners must score at least 24 out of 30 possible points (80% or above) after completing all practical exam components. Learners must pass the intensity scales, CATA usage, and affective components to pass the course.

香气分类

Aroma Categorization

每位学员最多可以获得 6 分，每正确识别一行（包括类别与子类别都需正确）可获得 0.5 分。虽然学员如果通过所有其他评估测验，仍可在未完成此项目的情况下通过课程。但建议学员若在第一尝试中得分低于 3 分，应再次考试以加强训练。

Learners may score up to six points. Learners receive a half point for each correctly identified row (both the category and subcategory must be correct). While learners can technically pass the course without completing this practical exam component (if they pass all other assessments), it is recommended that learners who score under 3 on Attempt #1 retake the exam for additional practice.

测验答案

Answer Key Exam #1

香气 Aroma	主类别 Category	子类别 Subcategory
肉桂 Cinnamon	香料 Spice	无 N/A
香烟 Cigarette	烘焙 Roasted	烟草 Tobacco
苹果酱 Applesauce	果香 Fruity	无 N/A
罐头豌豆 Canned Peas	绿色/植物 Green/Vegetative	无 N/A
黑巧克力 Dark Chocolate	坚果/可可 Nutty/Cocoa	可可 Cocoa
棒冰木棍 Popsicle Sticks	其他 Other	木质 Woody
花生酱 Peanut Butter	坚果/可可 Nutty/Cocoa	坚果 Nutty
红茶 Black Tea	花香 Floral	无 N/A
西梅干 Prunes	果香 Fruity	果干 Dried Fruit
醋 Vinegar	酸 / 发酵 Sour/Fermented	酸 Sour
柠檬糖浆 Lemon Syrup	果香 Fruity	柑橘类水果 Citrus Fruit
黄糖 Brown Sugar	甜 Sweet	黄糖 Brown Sugar

测验答案 Answer Key Exam #2

香气 Aroma	主类别 Category	子类别 Subcategory
蓝莓果酱 Blueberry Jam	果香 Fruity	莓果 Berry
干燥香草植物 Dried Herbs	绿色/植物 Green/Vegetative	无 N/A
香草精 Vanilla Extract	甜 Sweet	香草/香草醛 Vanilla, Vanillin
盆栽土 Potting Soil	其他 Other	陈腐霉味/泥土 Musty/Earthy
茉莉花茶 Jasmine Tea	花香 Floral	无 N/A
OK 绷 Adhesive Bandages	其他 Other	化学 Chemical
青柠 Lime	果香 Fruity	柑橘类水果 Citrus Fruit
啤酒 Beer	酸 / 发酵 Sour/Fermented	发酵 Fermented
葡萄干 Raisins	果香 Fruity	果干 Dried Fruit
燕麦麦片 Oat-Based Cereal	烘焙 Roasted	谷物 Cereal
烟熏 Smoke	烘焙 Roasted	烧焦 Burnt
柳橙汁 Orange Juice	果香 Fruity	柑橘类水果 Citrus Fruit

强度量表 (描述性评估) Intensity Scales (Descriptive)

学员可获得 **7** 分 (若学员展示了正确使用量表的能力) 或 **0** 分 (若学员未展示该能力)。

Learners receive either a 7 (if they demonstrated the ability to use the scales correctly) or 0 (if the learner did **not** demonstrate that ability).

若要获得 **7** 分，学员必须在大部分或全部的量表上进行标记，并使用多种强度评分。To receive a score of 7 for intensity scales, learners must mark most or all the scales and use a variety of intensity ratings.

- 若只有一个量表遗漏未填写，属于轻微疏忽，学员仍可获得 **7** 分，但若有多多个量表未填写，则该学员将获得 **0** 分。If one intensity scale is left blank, it's considered a minor oversight. The learner would still receive a 7. If multiple scales are left blank, the learner receives a 0.
- 若某学员对所有咖啡的强度评分都相同，或只使用量表中间的强度采取「安全」评分，则该学员将获得 **0** 分。If the learner uses the same intensity rating for all coffees or always uses a "safe" rating in the middle of the scale, the learner receives a 0.

CATA 表使用 (描述性评估) CATA Usage (Descriptive)

学员可获得 **7** 分 (若学员展示了正确使用 **CATA** 表的能力) 或 **0** 分 (若学员未展示该能力)。Learners receive either a 7 (if they demonstrated the ability to use the CATA boxes correctly) or 0 (if the learner did not demonstrate that ability).

若要获得 **7** 分，学员必须在表单中勾选适量的描述词，并通过勾选多样化的描述词来展现辨别咖啡风味差异的能力。感官特性较简单的咖啡可以使用少量描述词来表达，而感官特性较复杂的咖啡则可能需要五个或更多的描述词来完整描述。虽然未强制规定应勾选的描述词数量，但学员应避免对所有咖啡勾选过多的描述词。此外，在描述性评估表上的书面评论应具有描述性。To receive a score of 7 for CATA boxes, learners must differentiate among coffees by using a variety of descriptors. Coffees with simple sensory profiles could be well described with just a couple of descriptors, while complex coffees could be well described with five or more descriptors. While adhering to a specific number of descriptors is not required, learners should avoid selecting an excessive number of descriptors for all coffees. Any written comments on the Descriptive Forms should be descriptive in nature.

情感性评估表 Affective Form

情感性评估字段的评分为 **7** 分或 **0** 分，取决于学员是否展示正确使用情感性评估表的能力。The Affective column receives a score of either 7 (if the learner demonstrated the ability to use the Affective Form correctly) or 0 (if the learner did not demonstrate that ability).

若要获得 **7** 分，学员必须为每个评项给予评分，且所有书面评论需具有情感性。To receive a score of 7 for the Affective Form, learners must give a score for each section. Any written comments on the Affective Form should be affective in nature.

- 若只有一个评项遗漏未填写，属于轻微疏忽，学员仍可获得 **7** 分，但若多个评项未填写，则该学员将获得 **0** 分。If one section is left unscored, it's considered a minor oversight. The learner would still receive a 7. If multiple sections are left unscored, the learner receives a 0.
- 书面评论应表达对质量印象或咖啡属性与市场偏好的关联，而非仅是描述性评论。例如：若学员写下「水果风味」、「甜度高」或「口感粗糙」这类描述性笔记，将获得 **0** 分；但若学员写下「水果风味过重，不符合我的市场需求」这类与市场偏好相关的评论，则可获得 **7** 分。Any written comments should communicate an impression of quality or how a coffee's attributes relate to a market preference. They should not be descriptive comments. For example, if a learner writes notes like "fruity," "high-intensity sweetness," or "rough mouthfeel," consistently, they receive a 0. If they write comments like "too fruity for my market," they receive a 7 because this comment relates to market preference.

外在评估 Extrinsic Assessment

外在评估字段的评分为 **3** 分或 **0** 分，取决于学员是否展示正确使用外在评估表的能力。若要在外在评估获得 **3** 分，学员必须同时勾选 **CATA** 表并写下评论以记录具体细节。The Extrinsic column receives a score of either 3 (if the learner demonstrated the ability to use the Extrinsic Form) or 0 (if the learner did not demonstrate that ability). To receive a score of 3 for the Extrinsic Form, learners must select CATA boxes and write in comments to document specific details.

若学员仅勾选 **CATA** 表，则评分为 **0** 分；若学员仅写下评论，则评分亦为 **0** 分；若学员能一致地勾选 **CATA** 表并写下评论，则评分为 **3** 分。虽然学员在未完成此实作测验的情况下仍可通过本课程（前提是其他项目必须全部合格），但仍建议未通过第一次测验的学员进行重考，

以获得更多练习机会。 If a learner only selects CATA boxes, they receive a 0. If they only write in comments, they receive a 0. If they select CATA boxes and write in comments consistently, they receive a 3. While learners can technically pass the course without completing this practical exam component (if they pass all other assessments), it is recommended that learners who fail Attempt #1 retake the exam for additional practice.

附录 D 进行交互式在线课程 Appendix D: Facilitating an Interactive Online Course

为何要提供交互式在线课程？ Why Deliver an Interactive Online Course?

除了教授面对面的课程外，CVA 讲师也可以在实时（同步）在线环境中讲授 CVA for Cuppers 课程，本附录将概述如何为在线授课方式调整课程内容，进行在线课程有助于讲师接触更广泛的受众，并在课程安排上获得更多的灵活性。 In addition to teaching the in-person version of the course, CVA trainers may deliver the CVA for Cuppers Course in a live (synchronous) online environment. This appendix outlines how to adapt course content for this delivery method. Facilitating an online course allows trainers to reach a wider audience and gain more flexibility in course scheduling.

在线授课注意事项 Important Considerations for Online Delivery

讲师需打造一个有助于学员达成课程目标的在线环境，讲师可以选择使用任何视频会议工具（例如：ZOOM、Microsoft Teams 等），该工具必须能够实时对话，且学员应该能够在课程中看到讲师。讲师应尽量减少背景的干扰，并确保学员能够清楚听见讲师的声音，建议使用耳机或耳麦。 It is up to the trainer to facilitate an online environment that helps learners meet course objectives. Trainers may use a video conferencing tool of their choice (e.g., Zoom, Microsoft Teams, etc.). The tool must permit live conversation, and learners should be able to see the trainer during the session. Trainers should minimize distractions in the background and ensure that learners can hear them properly. The use of headphones or headsets is recommended.

所有参与者必须具备稳定、高速的网络联机，并处于没有过多环境噪音的安静空间，所有参与者必须能够在必要时将个人的麦克风静音，或者，讲师所使用的平台可允许讲师将参与者的麦克风静音与解除静音。讲师可以要求学员开启他们的网络摄像头，但这将取决于当下所使用的平台、学员是否具备该设备，以及讲师属意的上课方式。 All participants must have access to a reliable, high-speed internet connection and a quiet space without excessive ambient noise. All participants must be able to mute their microphones when necessary. Alternatively, trainers may use a platform that allows them to mute and unmute participants' microphones. Trainers may request that learners enable their webcams; this will depend on the platform used, learner access to technology, and how the trainer wishes to conduct the course.

讲师应该在每次课程前、后各提供十五分钟的时间，协助学员排解技术问题并回答任何问题。 Trainers should be available for at least fifteen minutes before and after each session to greet learners as they arrive, assist with technical troubleshooting, and address any questions.

在整个课程过程中，学员需要拍摄他们的作品（例如评估表）并将这些照片提交给讲师，以完成实作测验的考核。照片可以通过电子邮件、通讯软件或其他方式提交给讲师。 Throughout the course, learners are required to photograph their work (e.g., their assessment forms) and submit these images to the trainer to complete the practical exam components. Photos can be submitted to trainers by email, messaging application, or something else.

在线教授 **CVA for Cuppers** 课程时，讲师应将课程内容分为六个模块进行，这些模块的时间长度不同，且必须依序呈现，建议每天只呈现一种模块。讲师**不应**将单一模块拆分成多个课程。讲师应注意时区差异，并确保学员清楚了解直播课程进行的具体时间。When delivering the CVA for Cuppers Course online, trainers should present the course content in six modules. These modules vary in duration and must be presented in order. Presenting only one module per day is recommended. Trainers should not split any one module over multiple sessions. Trainers should be mindful of time zone differences when scheduling courses and ensure that learners have a clear sense of when live sessions will be conducted.

下表概述了每个模块的长度与内容（包含活动与实作测验部分）表中也描述了学员的「课后作业」：学员在直播课程之间需自行完成的活动或实作测验。The following table outlines each module, its length, and its contents (including activities and practical exam components). It also describes learner "homework": activities or practical exam components that learners complete on their own in between the live sessions.

模块 MODULE	描述 DESCRIPTION
模块 1 Module 1 <i>约 2 小时 (直播) About 2 Hours Live</i> <i>活动：无 Activities: N/A</i> <i>实作测验：无 Practical Exam: N/A</i>	CVA 与课程介绍 Introduction to the Course and CVA <i>讲师先带领学员进行自我介绍，然后介绍课程与 CVA。</i> <i>Trainers facilitate class introductions and then introduce the course and CVA.</i> 学员课后作业：无课后作业，但讲师可以建议学员复习 CVA 标准规范或 CVA 相关资源。Learner Homework: No required homework, but trainers may recommend that learners review the CVA Protocol or other CVA-related resources.
模块 2 Module 2 <i>约 2 小时 (直播) About 2 Hours Live</i> <i>活动：颜色强度、味觉与口感强度、感官参照物练习 (课后作业) Activities: Color Intensity, Taste and Mouthfeel Intensity, Sensory Reference Practice (Homework)</i> <i>实作测验：感官香气类考试 #1 (课后作业) Practical Exam: Aroma Categorization Attempt #1 (Homework)</i>	15 分强度量表与感官参照物 15-Point Intensity Scales and Sensory References <i>讲师介绍 15 分强度量表并引导强度量表活动，接着，讲师介绍感官参照物的相关内容，并示范如何利用参照物练习与辨别主类别 / 子类别，然后说明课后作业的内容。</i> <i>Trainers introduce the 15-point intensity scale and facilitate intensity scale activities. Then, trainers introduce content related to the sensory references, demonstrate how to practice using the references and identify categories/subcategories, and explain the homework assignment.</i> 学员课后作业：学员进行感官参照物分类实作活动，学员接着完成感官香气类实作测验部分，并提交给讲师进行评分。Learner Homework: Learners conduct the sensory reference practice activity. Learners then complete the Aroma Categorization practical exam component and submit their work for grading.
模块 3 Module 3 <i>约 2.5 小时 (直播) About 2.5 Hours Live</i> <i>活动：CATA 与调味溶液 Activities: CATA with Flavored Solutions</i>	CATA (勾选所有适用的选项) 列表与描述性评估 CATA (Check All That Apply) Lists and Descriptive Assessment <i>讲师介绍 CATA 表的功能与背景，然后带领实作练习，接着，讲师介绍描述性评估的相关内容，并择一样本示范描述性评估，并说明课后作业的内容。</i> <i>Trainers introduce the function and background of CATA lists and lead a practice exercise. Then, trainers introduce content related to descriptive assessment,</i>

实作测验：描述性评估（课后作业、强度与 CATA 练习 #1） <i>Practical Exam: Descriptive Assessment (Homework, Attempt #1 for Intensity and CATA)</i>	<i>demonstrate descriptive assessment of one sample, and explain the homework assignment.</i> 学员课后作业：学员进行描述性评估并填写描述性评估表，学员提交作业以供讲师评分。Learner Homework: Learners conduct a descriptive assessment and fill out Descriptive Forms. Learners submit their work for grading.
模块 4 Module 4 约 2.5 小时（直播）About 2.5 Hours Live 活动：食物的情感性评分 <i>Activities: Affective Rating of Food Items</i> 实作测验：情感性评估（课后作业、情感性评估练习 #1） <i>Practical Exam: Affective Assessment (Homework, Attempt #1 for Affective Use)</i>	9 分情感性量表与情感性评估 Nine-Point Affective Scales and Affective Assessment 讲师带领课后作业的反思讨论。接着，讲师带领活动介绍 9 分情感性量表。活动结束后，讲师介绍情感性评估的内容，并择一样本示范情感性评估，并说明课后作业的内容。 <i>Trainers lead a reflective discussion on the homework. Then, trainers facilitate an activity to introduce nine-point affective scales. After the activity, trainers present content on affective assessment, demonstrate affective assessment of one sample, and explain the homework assignment.</i> 学员课后作业：学员进行情感性评估并填写情感性评估表，学员提交作业以供讲师评分。Learner Homework: Learners conduct an affective assessment and fill out Affective Forms. Learners submit their work for grading.
模块 5 Module 5 约 2 小时（直播）About 2 Hours Live 活动：无 <i>Activities: N/A</i> 实作测验：外在故事（课后作业、外在尝试 #1）；描述性评估（课后作业、强度与 CATA 练习 #2） <i>Practical Exam: Extrinsic Stories (Homework, Extrinsic Attempt #1); Descriptive Assessment (Homework, Attempt #2 for Intensity and CATA)</i>	外在评估 Extrinsic Assessment 讲师带领课后作业的反思讨论。接着，讲师介绍外在评估的内容，并择一样本示范外在评估，并说明课后作业的内容。 <i>Trainers lead a reflective discussion on the homework. Then, trainers present content on extrinsic assessment, demonstrate extrinsic assessment of one sample, and explain the homework assignment.</i> 学员课后作业：学员进行外在评估并填写外在评估表，学员提交作业以供讲师评分。学员也进行他们第二次描述性评估，并提交作业以供讲师评分。Learner Homework: Learners conduct an extrinsic assessment and fill out an Extrinsic Form. Learners submit their work for grading. Learners also conduct their second descriptive assessment and submit their work for grading.
模块 6 Module 6 约 2 小时（直播）About 2 Hours Live 活动：无 <i>Activities: N/A</i> 实作测验：综合评估表（课后作业、情感性评估练习 #2）；外在评估（课后作业、练习	综合评估表与课程总结 Combined Form and Course Wrap-Up 讲师带领课后作业反思讨论。接着，讲师介绍综合评估表的内容，并择一样本示范综合评估，然后指导如何完成重考。讲师回答最后问题并总结课程。 <i>Trainers lead a reflective discussion on the homework. Then, trainers present content on the combined form, demonstrate form use by assessing one sample, and provide instructions for completing retakes. Trainers address final questions and wrap up the course.</i>

#2); 感官香气类 (课后作业、尝试 #2) <i>Practical Exam: Combined Form (Homework, Attempt #2 for Affective Use); Extrinsic Assessment (Homework, Attempt #2); Aroma Categorization (Homework, Attempt #2)</i>	学员课后作业：学员使用综合评估表同时进行描述性与情感性评估，学员提交作业以供讲师评分。学员未通过外在评估练习 #1 或感官香气类考试 #1 的分数低于 3 分，可以进行第二次尝试并提交作业以供讲师评分。Learner Homework: Learners conduct a combined descriptive and affective assessment using the Combined Form. Learners submit their work for grading. Learners who failed Extrinsic Attempt #1 or scored below 3 on Aroma Categorization Attempt #1 may complete a second attempt and submit their work for grading.
---	---

在线课程学员应准备事项 Preparing Learners to Take the Online Course

学员应自行购买课程所需的材料及书面数据，学员也应于直播课程之前设置好模块活动，讲师应确保学员在报名课程时，了解这些材料与设置要求。Learners must procure their own supplies and printed materials for the course. Learners must also set up module activities in advance of the live sessions. Trainers should ensure that learners are aware of these supply and setup needs when they register for the course.

讲师应在每次直播课程之前，提前发送设置说明给学员。建议在学员报名后尽快将课程材料清单发送给学员。材料清单应包括（1）学员应准备的咖啡，（2）模块活动与实作测验所需的材料，（3）打印清单，以及（4）课程所需的基本设备及材料。请参见附录 B，了解更多关于材料与设备的详细信息。Trainers should send setup instructions to learners in advance of each live session.

Sending the course supply list to learners as soon as possible after the learner registers is recommended. The supply list should include (1) the coffees learners should procure for the course, (2) the supplies required for module activities and practical exam components, (3) a printing list, and (4) general equipment and supply needs for the course. See Appendix B for more details on supplies and equipment.

如果部分学员的住处或工作地点相距不远，讲师可以建议这些学员共享材料与设备。If some learners live or work near one another, the trainer may suggest that these learners collaborate to share supplies and equipment.

进行在线课程模块 Facilitating the Online Modules

1. 介绍课程与 CVA Introduction to the Course and CVA

在线教学无具体指导方针，请参阅主题 **1.1** 及 **1.2**。° No specific guidance for online instruction. See Topic 1.1 and 1.2.

2. 15 分强度量表与感官参照物 15-Point Intensity Scales and Sensory References

课程开始前，学员需要：Before the session begins, learners need to:

- 准备味觉与口感强度溶液（讲师提供指定食材与说明）。° Prepare the taste and mouthfeel intensity solutions. (Trainer provides specific ingredients and instructions).
- 如情况允许，学员应要求同侪、家庭成员或朋友为溶液编码并准备答题卷，让学员可以在完成每次活动后查看。° If possible, learners should ask a colleague, family member, or friend to code the solutions and prepare an answer key that the learner can review once each activity is complete.
- 打印 15 分强度量表练习工作表。° Print the 15-Point Intensity Scale Practice worksheet.

说明 15 分强度量表的功能与背景，按照课程指南主题 **1.3** 进行的**颜色强度活动**，以投影片展示色块或其他视觉辅助工具，而不是要求学员检视油漆样本。带领讨论，展示如何进行小组校正或达成共识。° Explain the function and background of the 15-point intensity scale. Conduct the Color Intensity Activity as described in Guidebook Topic 1.3, but instead of asking learners to examine paint samples, show colored squares or other visual aids on a PowerPoint slide. Lead a discussion to demonstrate how to calibrate or reach consensus as a group.

接着，进行课程指南主题 **1.3** 的味觉与口感强度活动，带领讨论，展示如何进行小组校正或达成共识。请注意：强度的差异可能源自于未遵循准备指示或所用的产品有差异。° Next, facilitate the taste and mouthfeel intensity activities as described in Guidebook Topic 1.3. Lead a discussion to demonstrate how to calibrate or reach consensus as a group. Note: Inconsistencies in intensities may result from a failure to follow preparation instructions or variations in the products used to prepare the solutions.

解释课程指南主题 **1.4** 中概述的核心概念。° Explain the core concepts as outlined in Guidebook Topic 1.4.

在结束模块 **2** 的直播课程之前，讲师应示范如何使用感官参照物分类练习工作表进行实作并做笔记。° Before concluding the Module 2 live session, trainers should demonstrate how to practice and take notes using the Sensory Category Examples Practice worksheets.

学员课后作业：LEARNER HOMEWORK:

感官参照物练习：在模块 2 的直播课程中，说明学员应如何使用他们为课后作业准备的材料

设置感官参照物。° Sensory Reference Practice: During the Module 2 live session, describe how learners will set up their own sensory references using the ingredients they procured for part of their homework assignment.

要求学员在练习过程中填写感官参照物分类练习第 1 部分与第 2 部分的工作表，尽管学员可以在不嗅闻的情况下识别主类别与子类别，但讲师仍应强调将实际感官感知与他们的个人印象及 **CATA** 描述词匹配的重要性（因为学员将通过这种方式识别咖啡中的描述词）。° Ask learners to fill out the Sensory Category Examples Practice Part 1 and Part 2 worksheets as they practice. While it is possible for learners to identify the categories and subcategories without smelling, trainers should emphasize the importance of practicing matching real sensory perceptions to their personal impressions and to CATA descriptors (as that is how learners will identify descriptors in coffee).

香气类（评分 – 实作测验）：将感官香气类考试#1 的试卷发送给学员，要求学员为左侧栏中列出的每种原料识别最合适的类别（以及最合适的子类别，如适用）。每位学员应于完成考试后拍照或制作复本，并于下次直播课程前提交给讲师。° Aroma Categorization (Graded – Practical Exam): Send learners a copy of the Sensory References Categorization Exam #1. Ask learners to identify the best category (and, if applicable, the best subcategory) to describe each ingredient listed in the lefthand column. Each learner should submit a photo or a copy of their completed exam to the trainer before the next live session.

在下一堂课前，讲师应对感官香气类考试进行评分并对每位学员提出反馈意见，可以通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并发回给学员等。° Before the next session, trainers should grade the aroma categorization exam and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

3. CATA (勾选所有适用的选项) 表与描述性评估 CATA (Check All That Apply) Lists and Descriptive Assessment

课程开始前，学员需要：Before the session begins, learners need to:

- 准备风味溶液 (讲师提供指定食材与说明)。Prepare the flavored solutions. (Trainer provides specific ingredients and instructions).
- 如情况允许，学员应要求同侪、家庭成员或朋友为溶液编码并准备答题卷，这样学员可以在每次活动完成后查看。If possible, learners should ask a colleague, family member, or friend to code the solutions and prepare an answer key that the learner can review once the activity is complete.
- 打印 CATA 表使用练习工作表 Print the CATA List Usage Practice worksheet.

解释核心概念并按照课程指南主题 1.5 进行 CATA 与风味溶液活动。然后，介绍与描述性评估相关的内容，这些内容在指南主题 1.5 中有说明。Explain core concepts and facilitate the CATA with Flavored Solutions activity as outlined in Guidebook Topic 1.5. Then, introduce content related to descriptive assessment as outlined in Guidebook Topic 1.5.

在现场授课课程中，通过对某款冲煮咖啡的样本进行描述性评估，示范如何填写描述性评估表。逐步解释如何完成评估表的每个评项，并回答学员的问题。Demonstrate how to fill out a Descriptive Form by conducting a descriptive assessment of a brewed coffee sample during the live session. Explain step-by-step how to complete each section of the form and respond to learner questions.

学员课后作业：LEARNER HOMEWORK:

描述性评估尝试 #1 Descriptive Assessment Attempt #1

- 打印 2 至 3 份描述性评估表，Print 2–3 copies of the Descriptive Form.
- 使用杯测法准备咖啡 **A**、**B** 和 **C** (每个样本各五杯)，如果学员有保温壶或其他保持咖啡温热的方法，也可以选择使用滴滤式咖啡机或法式滤压壶来准备样本。有关描述性评估的详细冲煮指导，学员应该查看 **CVA** 标准规范中关于称重和研磨的相关细节。为每款咖啡研磨少量样本并标注 (用于干香气评估)。
Prepare Coffee A, B, and C using a cupping approach (five cups per sample). Learners may alternatively use a batch brewer or a French Press to prepare the samples if they have airpots or another method of keeping the coffees warm. For detailed brewing guidance, learners should review the details about weighing and grinding for descriptive assessment in the CVA Protocol. Grind a small sample of each coffee and label them (for fragrance evaluation).
- 如情况允许，学员应要求同侪、家庭成员或朋友为咖啡编码并准备答题卷，让学员可以在每次活动完成后查看。
If possible, learners should ask a colleague, family member, or friend to code the coffees and prepare an answer key that the learner can review once the activity is complete.
- 对咖啡 **A**、**B** 和 **C** 进行描述性评估，并针对每款咖啡填写描述性评估表。
Conduct descriptive assessments of Coffee A, B, and C and fill out a Descriptive Form for each coffee.
- 拍摄所有描述性评估表的照片，并提交给讲师进行评分。
Take photos of all Descriptive Forms and submit the images to the trainer for grading.

在下一堂课，讲师应对描述性评估进行评分并提出反馈意见。可以通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并发回给学员等。
Before the next session, trainers should grade the descriptive assessment and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

4. 9 分情感性量表与情感性评估 Nine-Point Affective Scales and the Affective Assessment

课程开始前，学员需要：Before the session begins, learners need to:

- 按照讲师的要求购买两到三种不同的点心或食物。Procure two to three different snacks or food items as specified by the trainer.

在介绍情感性量表与评估前，先针对课后作业进行反思讨论。请学员分享自认成功之处、挑战及问题。讨论任何出现在学员评估表中的共同主题，并适时向小组提出反馈意见。Before introducing the affective scale and assessment, lead a reflective discussion on the homework. Ask learners to share their successes, challenges, and questions. Discuss any common themes that emerged in the forms that were submitted and share feedback with the group as appropriate.

根据指南主题 1.7 中描述的方式继续进行活动。为了进一步强调偏好存在差异的观点，讲师可以描述并展示来自过去面授课程中的活动结果。Move forward with the activity as described in Guidebook Topic 1.7. To further emphasize the idea that preferences differ, trainers may describe and show activity results from a past in-person training session.

活动结束后，解释指南主题 1.7 中描述的 9 分情感性量表与情感性评估的核心概念。在直播课程中对五杯咖啡样本进行情感性评估，并示范如何填写情感性评估表。逐步说明如何完成评估表的每个评项，并回答学员的问题。After the activity, explain the core concepts of the nine-point affective scale and affective assessment as described in Topic 1.7. Demonstrate how to fill out an Affective Form by conducting an affective assessment of one five-cup coffee sample during the live session. Explain step-by-step how to complete each section of the form and respond to learner questions.

学员课后作业：LEARNER HOMEWORK:

情感性评估尝试 #1 Affective Assessment Attempt #1

- 打印 2 至 3 份情感性评估表。Print 2–3 copies of the Affective Form.
- 为杯测准备咖啡 D、E 和 F。每个样本各五杯。有关详细的指导，学员应该查看 CVA 标准中关于准备情感性评估的章节。Prepare Coffee D, E, and F for a cupping. There should be five cups of each sample. For detailed guidance, learners should review the sections on preparing an affective assessment in the CVA Protocol.
- 如情况允许，学员应要求同侪、家庭成员或朋友为咖啡编码并准备答题卷，让学员可以在每次活动结束后查看。If possible, learners should ask a colleague, family member, or friend to code the coffees and prepare an answer key that the learner can review once the activity is complete.
- 对咖啡 D、E 和 F 进行情感性评估，并针对每款咖啡填写情感性评估表。If possible, learners should ask a colleague, family member, or friend to code the coffees and prepare an answer key that the learner can review once the activity is complete.
- 拍摄所有情感性评估表的照片，并提交给讲师进行评分。Conduct affective assessments of Coffee D, E, and F and fill out an Affective Form for each coffee.

在下一堂课，讲师应对情感性评估进行评分并提出反馈意见。方式包括通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并寄回给学员等。

Before the next session, trainers should grade the affective assessment and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

5. 外在评估 Extrinsic Assessment

在介绍外在评估评估前，先针对课后作业进行反思讨论。请学员分享自认成功之处、挑战及问题。讨论任何出现在学员评估表中的共同主题，并适时向小组提出反馈意见。Before introducing the extrinsic assessment, lead a reflective discussion on the homework. Ask learners to share their successes, challenges, and questions. Discuss any common themes that emerged in the forms that were submitted and share feedback with the group as appropriate.

解释指南主题 2.3 中描述的外在评估核心概念。检视一款在线咖啡产品的描述，并示范如何根据描述中的信息填写外在评估表。回答学员的问题。Explain the core concepts of the extrinsic assessment as described in Topic 2.3. Examine a product description of a coffee online and demonstrate how to fill out an Extrinsic Form with the information available in the description. Respond to learner questions.

学员课后作业：LEARNER HOMEWORK:

外在评估尝试 #1 Extrinsic Assessment Attempt #1

- 打印 2 至 3 份外在评估表，Print one copy of the Extrinsic Form.
- 阅读讲师提供的两个外在「故事」，并针对每款咖啡填写外在评估表。Read the two extrinsic "stories" provided by the trainer and fill out an Extrinsic Form for each coffee.
- 拍摄所有外在评估表的照片，并提交给讲师进行评分。Take photos of all Extrinsic Forms and submit the images to the trainer for grading.

在下一堂课课前，讲师应对外在评估进行评分并提供反馈。方式包括通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并寄回给学员等。Before the next session, trainers should grade the extrinsic assessment and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

描述性评估尝试 #2 Descriptive Assessment Attempt #2

- 打印 2 至 3 份描述性评估表。Print 2-3 copies of the Descriptive Form.
- 比照描述性评估尝试 #1 的方式准备咖啡 D、E 和 F。Prepare Coffee D, E, and F in the same manner as Descriptive Assessment Attempt #1.
- 对咖啡 D、E 和 F 进行描述性评估，并针对每款咖啡填写描述性评估表。Conduct descriptive assessments of Coffee D, E, and F and fill out a Descriptive Form for each coffee.
- 拍摄所有描述性评估表的照片，并提交给讲师进行评分。Take photos of all Descriptive Forms and submit the images to the trainer for grading.

在下一堂课课前，讲师应对描述性评估进行评分并提供反馈。方式包括通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并寄回给学员等。Before the next session, trainers should grade the descriptive assessment and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

6. 综合性杯测与课程总结 Combined Cupping Session and Course Wrap-Up

在介绍综合评估表前，先针对课后作业进行反思讨论。请学员分享自认成功之处、挑战及问题。讨论任何出现在学员评估表中的共同主题，并适时向小组提出反馈意见。Before introducing the Combined Form, lead a reflective discussion on the homework. Ask learners to share their successes, challenges, and questions. Discuss any common themes that emerged in the forms that were submitted and share feedback with the group as appropriate.

考虑下列问题，并针对描述性评估进行反思：Consider the following questions for reflecting on the descriptive assessment:

- 在进行第二次描述性评估后，您现在有什么感觉？How are you feeling now, after conducting a second descriptive assessment?
- 您在第一次描述性评估之后，是否学到任何可在第二次评估中融会贯通的内容？Was there anything you learned after the first descriptive assessment that you were able to integrate during the second assessment?

考虑下列问题，并针对外在评估进行反思：Consider the following questions for reflecting on the extrinsic assessment:

- 仅根据外在故事，哪一款咖啡是您的最爱？Based on the extrinsic stories alone, which coffee was your favorite?
- 您最重视哪些外在属性？What extrinsic attributes do you value most?
- 如果另一款咖啡（不是最爱的那款）展现出您真正喜欢的感官属性，您会怎么办？这会让您改变您最喜欢的咖啡吗？What if the other coffee (not the favorite) displayed sensory attributes that you really enjoy? Would that change which coffee is your favorite?

接着，解释指南主题 2.7 中描述的综合评估表核心概念。在直播课程中对五杯咖啡样本进行描述性与情感性评估，并示范如何填写综合评估表。逐步说明如何完成评估表的每个评项，并回答学员的问题。Next, explain the core concepts of the Combined Form as described in Guidebook Topic 2.7. Demonstrate how to fill out a Combined Form by conducting a descriptive and affective assessment of one five-cup coffee sample during the live session. Explain step-by-step how to complete each section of the form and respond to learner questions.

讲师回答最后问题并总结课程。Address final questions and conclude the course.

学员课后作业：LEARNER HOMEWORK:

综合评估表 (情感性评估尝试 #2) Combined Form (Affective Assessment Attempt #2)

- 打印 3 份综合评估表。Print 3 copies of the Combined Form.
- 为杯测准备咖啡 A、B 和 C。每个样本各五杯。Prepare Coffee A, B, and C for a cupping. There should be five cups of each sample.
- 如情况允许，学员应要求同僚、家庭成员或朋友为咖啡编码并准备答题卷，让学员可以在每次活动结束后查看。If possible, learners should ask a colleague, family member, or friend to code the coffees and prepare an answer key that the learner can review once the activity is complete.
- 对咖啡 A、B 和 C 进行评估，并针对每款咖啡填写综合评估表 Conduct assessments of Coffee A, B, and C and fill out a Combined Form for each coffee.
- 拍摄所有综合评估表的照片，并提交给讲师进行评分。Take photos of all Combined Forms and submit the images to the trainer for grading.

讲师应对综合评估表进行评分，并对每个学员提供反馈意见。方式包括通过电子邮件向每位学员发送反馈意见，或是在每位学员提交的图片上加注后，附上反馈意见并寄回给学员等。

Trainers should grade the Combined Forms and provide feedback to each learner. This could be accomplished by sending feedback to each learner via email, by annotating the images submitted by each learner and sending them back with notes, etc.

外在评估尝试 #2 (如有需要) Extrinsic Assessment Attempt #2 (If Needed)

针对需要第二次尝试的学员，提供他们在第一次尝试中未使用的外在故事。由学员根据故事中的信息填写外在评估表，并提交给讲师进行评分。Provide learners who need a second attempt with the extrinsic story that they didn't use on the first attempt. Learners fill out an Extrinsic Form based on the information in the story and submit the form for grading.

香气类尝试 #2 (如有需要) Aroma Categorization Attempt #2 (If Needed)

针对需要第二次尝试的学员，提供他们在第一次尝试中未使用的测验工作表版本。学员应于完成考试后拍照或制作复本，以供讲师评分。Provide learners who need a second attempt with the version of the exam worksheet that they didn't use on the first attempt. Learners submit a photo or a copy of their completed exam to the trainer for grading.
