致谢 :

过去十多年来，无数咖啡专业人士以及优秀教育工作者贡献了宝贵的时间与专业知识，致力推动精品咖啡协会 (SCA) 认证教育计划。以下专业人士贡献并验证此感官品鉴课程教材 2.0 版的教材：Ian Picco、Edouard Thomas、Brandon Bir、Drew Billups，以及 Gloria Pedrosa。

Acknowledgements: For more than a decade, countless coffee professionals and gifted educators have contributed their time and expertise to the evolution of the Specialty Coffee Association's certificate education programs. The following professionals contributed to and validated Version 2.0 of course materials for Sensory Skills: Ian Picco, Edouard Thomas, Brandon Bir, Drew Billups, and Gloria Pedrosa.

我们也要感谢担任 AST 高级读者并为此 3.0 版本提供反馈意见的专业人士：Cadence Sim、Joost Leopold，以及 Ludovic Maillard。

We would also like to thank the professionals who served as AST advance readers and provided feedback on Version 3.0: Cadence Sim, Joost Leopold, and Ludovic Maillard.

请注意：本课程指南替代了先前的课程文件，仅供已获得感官品鉴课程认证的讲师使用，请勿将此文件分享给其他的 AST 讲师或学员。

Note: This guidebook replaces previous curriculum documents. This guidebook is only available to authorized trainers licensed in Sensory Skills. Please do not share this document with other ASTs or learners.

1. 一般信息 General Information

课程信息 Course Information

课程长度：最少 7 小时。 Course Length: Minimum 7 hours

先修课程：无；建议可先参加咖啡导论课程。 Prerequisites: None; Introduction to Coffee recommended

授课方式 Course Delivery

本课程可采面对面授课、远距教学或结合两者的方式进行。

This course can be delivered in-person, by distance learning, or as a combination of both.

- **远距教学的课程要求 Distance Learning Course Requirements**

- 远距教学课程一律由 AST 透过在线平台直播授课。

All distance learning courses must be delivered by an AST through live instruction via an online platform.

- 远距教学建议采分次授课，每堂课不得超过 3 小时。

Distance learning instruction is recommended to be delivered in sessions/blocks. Each session time should be no longer than 3 hours.

- 班级总人数应限制在学员与 AST 可有效互动的规模。

Class size should be limited to a size that allows for valuable learner/AST interaction.

- AST 必须观察（以在线视讯或面对面方式）附录 B 所列活动的学员表现。

ASTs must observe (virtually or in-person) performance of the activities listed in Appendix B.

笔试信息 Written Exam Information

在线笔试总题数：25 题（每题一分） Total Number of Questions on Online Written Exam: 25 (worth one point each)

在线笔试时间总长：27 分钟 Total Time Allowed for Online Written Exam: 27 minutes

及格分数（在线笔试）：60% Passing Score (Online Written Exam): 60%

实作目标以及活动 Practical Objectives and Activities:

- 本初级课程不包括实作测验，但仍设有实作学习目标。

This Foundation course does not include a practical exam. However, there are practical learning objectives.

- 本课程指南内附有实作活动指南，详见附录。

This Guidebook includes a practical activity guide found in the Appendices.

- 该指南所建议的活动，旨在协助学员达成课程中的特定学习目标。

The activities listed in the guide are suggested ways to address particular learning objectives within the curriculum.

- 这些活动的指导内容灵活有弹性，可与 AST 的课程设计以及学员可使用的设备搭配应用。

These activities have flexible instructions to accommodate AST design and the learner's access to equipment.

- 只要有助于学员达成课程相关目标，AST 可以调整或修改活动内容。

The AST may modify or improve upon these activities as long as it helps the learner achieve the relevant objectives.

- 进行相关活动时，AST 将评估学员对实作目标的理解，以完成 CSP 课程技能报告。

While conducting these activities, the AST will evaluate the learner's comprehension of the practical objectives in order to complete the CSP Course Skills Report.

CSP 课程技能报告 CSP Course Skills Report

AST 将针对每位学员制作一份 CSP 课程技能报告，以反映学员在特定实作目标的能力水平，为中级课程做准备。AST 完成报告后应提供一份副本并与学员讨论。此课程技能报告档案请至 AST Portal 的初级课程文件夹下载。

ASTs complete a CSP Course Skills Report for each learner, reporting the level of competency in specific practical objectives in preparation for the Intermediate level course. The completed report should be discussed with the learner and the learner should receive a copy of the report. This report is contained in the module pack downloaded from the AST Portal.

2. 课程说明与更新 Course Description and Updates

说明 Description

感官品鉴初级课程以实作和互动方式，探索感官评估时不可或缺的要素。本课程探讨我们感知品味的方式，以及在评估咖啡的特性时如何运用此知识，学员将获得实际辨识各种感官属性的经验，以及使用 SCA 描述性与情感性两种杯测评估方式。

The Sensory Skills Foundation course explores the essentials of sensory assessment in a practical and interactive manner. It investigates the way we perceive what we taste and how to apply this knowledge when evaluating a coffee's characteristics. Learners will gain practical experience identifying a variety of sensory attributes and cupping coffees using both the SCA Descriptive and Affective Assessments.

旧版课程指南更新 Guidebook Updates from Previous Version

旧版课程指南为 2.0 版，本课程指南为 3.0 版。

The previous Guidebook is referred to as Version 2.0. This Guidebook is referred to as Version 3.0.

在 3.0 版中，目标、内容、活动均已依咖啡价值评估（CVA）的标准规范和用具予以调整。尽管整体目标维持不变，本课程如今纳入了更多感官科学的关键概念，并确保学员使用 CVA 标准规范以及 SCA 描述性与情感性表格体验杯测。部分章节已重新排序或改写，以充分诠释并易于理解，给予 AST 的注释也已扩充。

In Version 3.0, the objectives, content, and activities have been adjusted to reflect Coffee Value Assessment protocols and tools. While the overarching goals of the module remain the same, the course now includes more key concepts from sensory science and ensures that learners experience cupping using the CVA Protocol and the SCA Descriptive and Affective Forms. Some sections have been reordered or reworded to improve clarity. AST Notes have been expanded.

更新后的课程教材以及实作测验试卷，请至 [AST Portal > My AST Downloads](#) 下载。

Curricula and exam updates are available in the AST Portal under My Downloads.

3. 笔试题目分布（按主题） Written Exam Question Distribution by Topic

有关在线测验试题的重要信息详如下表。The chart below outlines key information regarding the online exam questions.

题库：每个主题会用于学员在线测验的试题数量。

Question Pool: This is the number of questions per topic that is available to present to the learner during the online exam.

考题数量：每个主题实际列入在线考试（随机选出）的试题数量，该数量由课程建立者决定，目的是确保各章节和主题所占的比例获适当分配。

Number of Questions Presented: This is the number of questions a learner will randomly receive per topic during the online exam. This number was determined by the course authors to ensure that each section and topic is weighted appropriately.

章节比重：每个章节名称右侧，列有该章节在整份测验中的占比。

Section Weighting: Next to each section title is the percentage of the total exam represented by the questions in that section.

部分主题/目标没有列入笔试中，由于这些信息将在未来课程中派上用场，讲师仍应讲授相关内容。

There are some topics/objectives that are not tested on the written exam. The trainer should still address these topics/objectives as the information will be useful in future courses.

考试章节与主题 Exam Sections & Topics	题库数 Question Pool	在线笔试考题数 Questions Presented
1.01 章节 感官评估概述 16% 1.01 Section SENSORY ASSESSMENT OVERVIEW 16%		
主题 1：定义感官评估 1 Topic: Defining Sensory Assessment	4	2
主题 2：三种感官方法 2 Topic: Three Sensory Methods	4	2
	活动 Activity

	活动 Activity	
总题数 Total Number of Questions	50	25

4. 课程大纲与相关在线笔试考题 Course Curriculum with Corresponding Online Written Exam Questions

课程大纲兹列如下，分为章节、主题与目标。

The course curriculum is outlined below and is divided into Sections, Topics, and Objectives.

所有在线笔试题目均为评测学员是否达成特定目标而拟定。这些题目一律按主题分类，并组成所谓的「题库」，学员受测内容为随机选自题库之中。

由于测验采随机抽题方式，因此当某个主题的目标不只一项时，可能不会悉数列入学员受测内容。

All online written exam questions were developed as an assessment for a specific objective. These questions have been grouped according to topic. All questions within a topic are considered the topic “pool.” From this pool, a certain number of questions will be randomly selected and presented to the learner. If a particular topic has more than one objective, it is possible that the learner will not be tested on all objectives in the topic. This is due to the randomization of the questions from that topic.

1.01 | 章节 | 感官评估概述

2 个主题

1.01 | Section | SENSORY ASSESSMENT OVERVIEW

2 Topics

主题 Topic	目标 Objectives	AST 注释 AST Notes	在线笔试题目 Online Written Exam Questions	参考文献 References
1.01.01 定义感官评估 Defining Sensory Assessment	1.定义感官评估 Define sensory assessment	感官评估（评价）是一种科学方法，用于唤起、测量、分析及诠释对产品的反应，这些反应是通过人类的视觉、嗅觉、触觉、味觉和听觉这五种感官所感知。 Sensory assessment (evaluation) is a scientific method used to provoke, measure, analyze, and interpret responses to products as perceived through the five human senses of sight, smell, touch, taste, and hearing.	题目编号 100011691564 下列何者最能描述感官评估过程？ <u>测量以及诠释人类对产品的反应</u> 辨别并列出一项产品的化学成分 生成一种产品类别的定价策略 记录品鉴者的偏好 Question ID: 100011691564 Which of the following BEST describes the process of sensory assessment? <u>Measuring and interpreting human responses to products</u> Identifying and listing a product's chemical components Generating a pricing strategy for a category of products Documenting a taster's biases	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 20-22. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 20-22.
	2.定义人体五种感官 Identify the five human senses 3.说明为何感官评估对于有效评价咖啡有其必要 Explain why sensory assessment is necessary to effectively evaluate coffee 4.列出咖啡专业人士使用风味评估做为决策工具的情形 List situations in which coffee professionals use flavor assessment as a decision-making tool		题目编号 100011691565 下列何者并非人类五感之一？ <u>分析</u> 触觉 嗅觉 味觉 Question ID: 100011691565 Which of the following is NOT one of the five human senses?	

		necessary to effectively evaluate coffee because flavor is currently difficult or impossible to predict from instrumental measures. Tasting also conveys the concept of a coffee's flavor more effectively than knowledge about that coffee's chemical composition. 咖啡专业人士在各种情况下使用风味评估做为决策工具，包含选择在特定农场种植咖啡的位置、种植哪种咖啡品种、适用哪种后制处理方法、使用哪种烘焙曲线，以及选择何种冲煮方式或萃取方案。 Coffee professionals use flavor assessment as a decision-making tool in a variety of situations, including where to plant coffee on a particular farm, which variety of coffee plant to grow, which processing method to apply, which roast curve to use, and	<u>Analysis</u> Touch Smell Taste	
			题目编号 100011691566 为何感官评估对于有效评估咖啡有其必要性？（请选择所有适用选项） <u>目前光靠仪器测量难以或不可能预测风味</u> <u>相较于了解咖啡的化学成分，实际品尝可更有效传达咖啡风味的概念。</u> 科学家无法判断一杯咖啡的化学成分 其他评估方法无法在一个受控的环境下进行 Question ID: 100011691566 Why is sensory assessment necessary to effectively evaluate coffee? (Select all that apply.) <u>Flavor is currently difficult or impossible to predict from instrumental measures.</u> <u>Tasting conveys the concept of a coffee's flavor more effectively than knowledge about that coffee's chemical composition.</u> Scientists cannot determine the chemical composition of a cup of coffee. Other methods of assessment cannot be conducted in a controlled environment.	

		which brewing method or extraction protocol to use.	题目编号 100011691567 下列何种情形下，咖啡专业人士将风味评估做为决策工具？（请选择所有适用选项） <u>选择种植咖啡品种</u> <u>挑选后制处理方法</u> <u>决定如何烘焙咖啡</u> <u>优化咖啡冲煮方法</u> Question ID: 100011691567 In which of the following situations do coffee professionals use flavor assessment as a decision-making tool? (Select all that apply.) <u>Choosing a variety of coffee to grow</u> <u>Selecting a processing method</u> <u>Deciding how to roast a coffee</u> <u>Refining a brewing recipe</u>	
1.01.02 三种感官方法 Three Sensory Methods	1.定义并区别三种感官测试方法 Identify and differentiate between the three sensory test methods 2.认识描述性评估被视为客观作法，情感性评估则具主观性质。 Recognize that descriptive assessments are	传统上，感官测试方法分为三种类别：差别测试、情感性测试，以及描述性测试。 Traditionally, sensory test methods are grouped into three categories: difference tests, affective tests, and descriptive tests. 差别（区别性）测试可用于评估两个或多个产品是否明显不同，并且判断差异大小。三角杯测是在咖啡产业	题目编号 100011691572 下列何者并非三种感官测试方法之一？ <u>适应性</u> 差别性 描述性 情感性 Question ID: 100011691572 Which of the following is NOT one of the three sensory test methods? <u>Adaptive</u> Difference Descriptive Affective	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 16-19, 70-91. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 16-19, 70-91.

	considered objective, and affective assessments are considered subjective	最广为人知的感官差别测试。 Difference (discriminative) tests can be used to assess whether two or more products are perceptibly different, and to determine the magnitude of that difference. The triangulation test is the most widely known sensory difference test in the coffee industry. 情感性测试最常应用于消费者，藉此发掘某产品较其他产品更受喜爱或偏好。这是一种主观的方法，除非一位专业人士试图与特定消费族群或市场喜好一致。 Affective tests are used mostly when working with consumers, to discover how much a product is liked or preferred against other products. This is a subjective approach, unless a professional seeks to align with the preferences of a certain consumer group or market. 描述性测试用于识别、描述和量化产品的特定感官特征	题目编号 100011691573 下列感官测试方法中，何者可用于评估两个或多个产品是否明显不同？ <u>差别性</u> 情感性 描述性 决定性 Question ID: 100011691573 Which of the following sensory test methods is used to assess whether two or more products are perceptibly different? <u>Difference</u> Affective Descriptive Conclusive 题目编号 100011691574 下列感官测试方法中，何者一般会被用于消费者测试？ <u>情感性</u> 描述性 差别性 适应性 Question ID: 100011691574 Which of the following sensory test methods is typically used for consumer testing? <u>Affective</u> Descriptive Difference Adaptive	
--	--	--	---	--

		与属性。这是一种客观的方法，通常会邀请受过培训与校正的描述性评审小组参加。 Descriptive tests are used to identify, describe, and quantify specific sensory characteristics and attributes of a product. This is an objective approach and sometimes uses a trained and calibrated descriptive panel.	题目编号 100011691575 下列感官测试方法中，何者会使用受过培训与校正的小组？ <u>描述性</u> 情感性 差别性 决定性 Question ID: 100011691575 Which of the following sensory test methods sometimes uses a trained and calibrated panel? <u>Descriptive</u> Affective Difference Conclusive	
	4.回顾精品咖啡的属性定义 Recall the attributes definition of specialty coffee 5.认识精品 / 商品之间的关系是一个连续体。 5. Recognize the specialty/commodity relationship as a continuum	在本活动中，学员将透过品尝探索精品咖啡的属性定义。 In this activity, learners explore the attributes definition of specialty coffee through tasting.	活动 1.01.02 参见附录 B 指示：活动准备指南 Activity 1.01.02 See instructions in Appendix B: Activity Preparation Guide	<i>Towards a Definition of Specialty Coffee: Building an Understanding Based on Attributes. (Specialty Coffee Association, 2021) 8-10.</i> <i>Towards a Definition of Specialty Coffee: Building an Understanding Based on Attributes. (Specialty Coffee Association, 2021) 8-10.</i>

1.02 | 章节 | 生理学与感官属性

2 个主题

1.02 | Section | PHYSIOLOGY AND SENSORY ATTRIBUTES

2 Topics

主题 Topic	目标 Objectives	AST 注释 AST Notes	在线笔试题目 Online Written Exam Questions	参考文献 References
1.02.01 人类生理学与感官 Human Physiology and the Senses	1.认识刺激与感知的差异 Recognize the difference between stimulus and perception	在本活动中，学员将使用非咖啡类物品体验刺激与感知的差异。 In this activity, the learner experiences the difference between stimulus and perception using non-coffee items.	活动 1.02.01A 参见附录 B 指示：活动准备指南 Activity 1.02.01A See instructions in Appendix B: Activity Preparation Guide	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 22. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 22.
	2.找出三个最有助于感知风味的人类感官 Identify the three human senses that contribute most to the perception of flavor 3.说出并指出嗅觉、味觉和触觉感知的主要人类感官器官 Name and locate the primary human sensory	嗅觉、味觉，以及触觉（或口感）为感知风味的中心，故在咖啡感官评估中扮演着重要角色。 Smell, taste, and touch (or “mouth-sense”) are central to the perception of flavor and therefore play an important role in the sensory assessment of coffee.	题目编号 100011691583 风味融合了哪三种感官的体验？ <u>味觉 / 嗅觉 / 触觉</u> 嗅觉 / 味觉 / 视觉 味觉 / 触觉 / 视觉 味觉 / 嗅觉 / 听觉 Question ID: 100011691583 Flavor is a multi-modal experience integrating which three senses? <u>Taste/Smell/Touch</u> Smell/Taste/Sight	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 16-19, 70-91. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 23-24, 38-55.

	organs used in olfaction, gustation, and tactile sensation 4.区分鼻前嗅觉与鼻后嗅觉 Distinguish between orthonasal and retronasal olfaction	鼻腔内的嗅觉上皮用于嗅觉，软颚上的味蕾用于味觉，口腔肌肉上的触觉受体用于触觉感知。 The olfactory epithelium in the nasal cavity is used in olfaction. The taste buds on the soft palate are used in gustation. The tactile receptors on muscles in the mouth are used for tactile sensation. 「鼻前嗅觉」的通路是透过鼻子，当我们吸气时，从环境中嗅到气味。「鼻后嗅觉」的通路则是透过口腔后段，当我们呼气时，感知风味中嗅觉成分的方式。 The “orthonasal” pathway is through the nose, is utilized when we breathe in, and allows us to pick up odors from our environment. The “retronasal” pathway is from the back of the mouth cavity, as we breathe out, and is how we pick up the olfactory component of flavor.	Taste/Touch/Sight Taste/Smell/Sound 题目编号 100011691584 下列何种感知器官用于嗅觉？ <u>嗅觉上皮</u> 触觉受体 味蕾 温度 Question ID: 100011691584 Which of the following sensory organs is used to smell? <u>Olfactory Epithelium</u> Tactile Receptors Taste Buds Temperature 题目编号 100011691585 下列何种感知器官用于味觉？ <u>味蕾</u> 嗅觉上皮 触觉受体 温度 Question ID: 100011691585 Which of the following sensory organs is used in gustation? <u>Taste Buds</u> Olfactory Epithelium Tactile Receptors Temperature	
--	---	---	--	--

		风味是一种融合多模态的体验，包括味道、通过口腔后段感知的嗅觉成分，以及口感的感受，如温度和辛辣感。风味感知有很大一部分来自嗅觉。 Flavor is a multi-modal experience encompassing taste, plus the olfactory component of flavor perceived retronasally, and the mouth-sense sensations such as temperature and spiciness. A large part of flavor perception comes from the sense of smell.	题目编号 100011691586 将各项感官与其对应的感知器官进行配对（每个选项仅能使用一次） 1.嗅觉 2.味觉 3.触觉 A = 嗅觉上皮 B = 味蕾 C = 触觉受体 1=A / 2=B / 3=C Question ID: 100011691586 Match each sense with its corresponding sensory organ. Each choice will be used only once. 1. Smell 2. Taste 3. Touch A = Olfactory Epithelium B = Taste Buds C = Tactile Receptors 1=A / 2=B / 3=C	
			题目编号 100011691587 下列叙述是否正确？我们使用鼻前嗅觉通路来感知风味的嗅觉成分。 正确 <u>错误</u> Question ID: 100011691587 Is the following statement true or false? We use the orthonasal pathway to pick up the olfactory component of flavor. True <u>False</u>	

			题目编号 100011691588 哪一种嗅觉类型有助于人类感知风味？ 鼻后嗅觉 鼻前嗅觉 触觉 味觉 Question ID: 100011691588 Which type of olfaction contributes to the perception of flavor? Retronasal Orthonasal Tactile Gustatory 题目编号 100011691589 下列叙述是否正确？风味的感知有很大一部分来自嗅觉。 正确 错误 Question ID: 100011691589 Is the following statement true or false? A large part of flavor perception comes from the sense of smell. True False 题目编号 100011691590 下列何者最适合填入以下句子？_____ 通路是透过鼻子，而 _____ 通路则是透过口腔后部。 鼻前嗅觉、鼻后嗅觉 鼻后嗅觉、鼻前嗅觉 温度、鼻后嗅觉 口感、鼻前嗅觉
--	--	--	---

			Question ID: 100011691590 Which of the following terms BEST complete this statement? The _____ pathway is through the nose, while the _____ pathway is through the back of the mouth cavity. <u>Orthonasal, retronasal</u> Retronasal, orthonasal Temperature, retronasal Mouth-sense, orthonasal	
	4.认识嗅觉和味觉都对风味感知有所贡献 Recognize that smell and taste both contribute to flavor perception	透过此活动，学员将体验味觉与嗅觉的差别，以及它们在风味感知中扮演的角色。 In this activity, learners experience the difference between taste and smell, and their role in flavor perception.	活动 1.02.01B 参见附录 B 指示：活动准备指南 Activity 1.02.01B See instructions in Appendix B: Activity Preparation Guide	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 20-22. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 38-42.
1.02.02 基本味道 Basic Tastes	1.列出五种基本味道 List the five basic tastes 2.识别两种对咖啡风味影响最大的基本味道 Identify the two basic tastes that have the greatest impact on a coffee's flavor	五种基本味道为：酸（酸质）、苦、甜、咸、鲜。 There are five basic tastes: sour (acidic), bitter, sweet, salty, and umami. 酸与苦是咖啡里面最强烈的基本味道。 Sourness and bitterness are	题目编号 100011691593 下列何者并非基本味道？ <u>麦芽味</u> 甜 酸 咸 Question ID: 100011691593 Which of the following is NOT a basic taste? <u>Malty</u>	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 20-22. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i>

	3.认识跨感官感知如何有助于我们感受咖啡中的甜味。 Recognize that crossmodal perception may be contributing to our perception of sweetness in coffee	the most intense basic tastes in coffee. 我们之所以能够感受到咖啡中的甜味，最接近的理论应为跨感官感知。例如，我们察觉到会令人想起甜食的芳香物质，因此感知到甜味。 The most likely theory to explain our perception of sweetness in coffee is crossmodal perception (we detect aromatics that remind us of sweet foods, and therefore perceive a sweet taste). 我们也可在咖啡中感知到较小程度的咸味与鲜味。 To a lesser degree, saltiness and umami can also be perceived in coffee.	Sweet Sour Salty 题目编号 100011691594 在下列关于咖啡的叙述语中，何者为基本味道？（请选择所有适用选项） <u>甜</u> <u>咸</u> <u>苦</u> 果味 Question ID: 100011691594 Which of the following coffee descriptors are basic tastes? (Select all that apply.) <u>Sweet</u> <u>Salty</u> <u>Bitter</u> Fruity 题目编号 100011691595 哪两种基本味道在咖啡风味中最为强烈？ <u>苦</u> <u>酸</u> 甜 咸 Question ID: 100011691595 Which two basic tastes have the greatest impact on a coffee's flavor? <u>Bitter</u> <u>Sour</u>	(London: Specialty Coffee Association, September 2021), 46-51. <i>Sensory Lexicon Unabridged Definition and References, Second Edition.</i> (PDF, Portland: World Coffee Research, 2017), s.v. "Taste Basics" <i>Sensory Lexicon Unabridged Definition and References, Second Edition.</i> (PDF, Portland: World Coffee Research, 2017), s.v. "Taste Basics"
--	---	--	---	---

			Sweet Salty	
			题目编号 100011691596 下列叙述是否正确？我们之所以在咖啡中感知到甜味，是因为成品中含有大量的碳水化合物。 正确 <u>错误</u> Question ID: 100011691596 Is the following statement true or false? We detect sweetness in coffee because there are high quantities of carbohydrates in the finished brew. True <u>False</u>	
			题目编号 100011691597 下列叙述是否正确？咖啡中无法感受到咸味与鲜味。 正确 <u>错误</u> Question ID: 100011691597 Is the following statement true or false? Saltiness and umami CANNOT be perceived in coffee. True <u>False</u>	
			题目编号 100011691598 下列何者最适合填入这个句子？当我们在咖啡中品尝到甜味时，我们可能正在体验 _____。 <u>跨感官感知</u> 情感性测试 偏好	

			商业咖啡 Question ID: 100011691598 Which of the following terms BEST completes this sentence? When we taste sweetness in coffee, we are likely experiencing _____. <u>crossmodal perception</u> affective testing bias commodity coffee	
	3.了解当两种或更多的味道混合时，哪些感知可能会影响到彼此的认知或强度。 Recognize that when there is a mixture of two or more tastes, those sensations may influence the recognition or intensity of one another 4.认识个体之间的感知有所差异。 Recognize that perception varies between individuals 5.使用客观的方式来描述味觉感受。 Use objective descriptions of taste sensations	在本活动中，学员将练习对代表五种基本味道的溶液进行盲测。 In this activity, learners practice the blind identification of solutions representing the five basic tastes.	活动 1.02.02 参见附录 B 指示：活动准备指南 Activity 1.02.02 See instructions in Appendix B: Activity Preparation Guide	<i>8586:2012 Sensory analysis — General guidelines for the selection, training and monitoring of selected assessors and expert sensory assessors</i> International Organization for Standardization. Geneva, 2012 <i>8586:2012 Sensory analysis — General guidelines for the selection, training and monitoring of selected assessors and expert sensory assessors</i> International Organization for Standardization. Geneva, 2012

1.03.01 咖啡中的酸、苦 以及口感 Acidity, Bitterness, and Mouthfeel in Coffee	1.认识到咖啡是一种复杂的产品，具有多种不同的味道、香气和触觉感受。 Recognize that coffee is a complex product that has many different tastes, aromas, and tactile sensations 2.定义口感 Define mouthfeel	在咖啡中，基本味道与香气总是密不可分。 In coffee, basic tastes and aromas do not exist in isolation. 不同的咖啡意味着不同的味道与口感。 Different coffees will have different perceived tastes and mouthfeel. 咖啡的口感形成萃取的触感，包括其厚重感、质地以及其他触感，例如涩味。口感的范围从低强度（轻盈）到高强度（厚重）。 The mouthfeel of the coffee describes the tactile feel of the brew, comprising its heaviness, texture, and other tactile sensations like astringency. The mouthfeel ranges from low intensity	题目编号 100011691603 下列叙述是否正确？在咖啡中，基本味道与香气可以区分开来。 正确 错误 Question ID: 100011691603 Is the following statement true or false? In coffee, basic tastes and aromas exist in isolation. True False	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 48, 53. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 48, 53. <i>A New System to Assess Coffee Value: Introducing the Beta Version of the Specialty Coffee Association's Coffee Value Assessment (April 2023)</i> , (PDF, London: SCA, 2023), 20-21. A New System to Assess Coffee Value: <i>Introducing the Beta Version of the</i>
			题目编号 100011691604 下列描述词何者并非用于形容口感？ 果香 滑顺 油滑感 干涩 Question ID: 100011691604 Which of the following descriptors does NOT describe mouthfeel? Fruity Smooth	

		(light) to high intensity (heavy). 用来形容口感质地的描述词包括粗糙、油滑、滑顺 (绒滑、丝滑、糖浆) 、干涩与金属等。 Some textural descriptors for mouthfeel include rough, oily, smooth (velvety, silky, syrupy), mouth-drying, and metallic.	Oily Mouth-Drying 题目编号 100011691605 下列何者最适合定义口感？ <u>咖啡的触感，包含重量、质地以及其它触感</u> 咖啡粉的干香气 咖啡中甜味的味觉或鼻后感知 建构在咖啡酸度的味觉感知 Question ID: 100011691605 Which of the following statements BEST defines mouthfeel? <u>The tactile feel of the brew, comprising its heaviness, texture, and other tactile sensations.</u> The smell of the ground coffee when dry. The gustative or retronasal perception of sweetness in the brew. The gustative perceptions structured around the brew's sourness. 题目编号 100011691606 以下哪些元素会影响咖啡的口感？(请选择所有适用选项) <u>厚重</u> <u>质地</u> <u>涩感</u> 咸味 Question ID: 100011691606 Which of the following elements of the brew contribute to its mouthfeel? (Select all that apply). <u>Heaviness</u> <u>Texture</u> <u>Astringency</u> Saltiness	<i>Specialty Coffee Association's Coffee Value Assessment (April 2023), (PDF, London: SCA, 2023), 20-21.</i>
--	--	--	--	---

	3.区别咖啡中的酸质、苦味与口感的主要特点 Distinguish the key attributes of acidity, bitterness, and mouthfeel in coffee	在本活动中，学员将两两比较各个咖啡的酸质、苦味与口感的强度。 In this activity, the learner compares the intensities of acidity, bitterness, and mouthfeel in pairs of brewed coffee.	活动 1.03.01 参见附录 B 指示：活动准备指南 Activity 1.03.01 See instructions in Appendix B: Activity Preparation Guide	
1.03.02 咖啡风味轮以及 WCR 感官辞典 Coffee Taster's Flavor Wheel and WCR Lexicon	1.叙述风味轮内圈的九种主要风味类别 State the nine main categories of flavor found on the inner ring of the Flavor Wheel 2.认识风味轮用语的参考工具 – 《世界咖啡研究感官辞典》（WCR Sensory Lexicon） Recognize the World Coffee Research Sensory Lexicon as a reference tool for the descriptors found on the Flavor Wheel 3.区别属性与参照物 Distinguish between an attribute and a reference	属性是描述性特征，参照物则是与每个属性相关的具体食物或化学产品。 Attributes are descriptive characteristics, whereas references are specific food items or chemical products that correlate with each attribute.	题目编号 100011691615 下列何者并非感官的参照物？ <u>绿色 / 蔬菜</u> 白醋 覆盆莓果冻 苹果酱 / 果泥 Question ID: 100011691615 Which of the following is NOT a sensory reference? <u>Green/vegetative</u> White vinegar Raspberry gelatin Apple sauce/puree	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 63-67, 127 Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 63-67, 127
			题目编号 100011691616 下列何者并非风味轮内圈的九种主要类别之一？ <u>麦芽味</u> 绿色 / 蔬菜 甜味 烘烤味 Question ID: 100011691616 Which of the following is NOT one of the nine main categories on the inner ring of the Flavor Wheel?	SCA/WCR/UC Davis Coffee Taster's Flavor Wheel, SCA (2016). SCA/WCR/UC Davis Coffee Taster's Flavor Wheel, SCA (2016). <i>Sensory Lexicon Unabridged Definition and References, Second Edition.</i>(PDF, Portland: World Coffee

			<u>Malt</u> Green/vegetative Sweet Roasted	Research, 2017), s.v. "Introduction" Sensory Lexicon Unabridged Definition and References, Second Edition. (PDF, Portland: World Coffee Research, 2017), s.v. "Introduction"
			题目编号 100011691617 下列叙述是否正确？在 WCR 辞典里，每种属性仅一种参照物。 正确 <u>错误</u> Question ID: 100011691617 Is the following statement true or false? There is only one reference for each attribute in the WCR Sensory Lexicon. True <u>False</u>	
			题目编号 100011691618 下列叙述是否正确？您可以在 WCR 辞典中找到风味轮上描述词的参照物。 <u>正确</u> 错误 Question ID: 100011691618 Is the following statement true or false? You can find the references for the descriptors on the Flavor Wheel in the WCR Sensory Lexicon. <u>True</u> False	

	3.使用咖啡风味轮与 WCR 辞典 Use the Coffee Taster's Flavor Wheel and WCR Sensory Lexicon 4.练习使用风味轮的九种主要风味类别的香气参照物 Practice using aroma references for the nine main categories of the Flavor Wheel	在本活动中，学员将使用闻香瓶探索风味轮的九种主要风味类别。 In this activity, the learner explores the nine main flavor categories of the Flavor Wheel using aroma vials.	活动 1.03.02 请参阅附录 B 指示：活动准备指南 Activity 1.03.02 See instructions in Appendix B: Activity Preparation Guide

What is the name of this form?

SCA Descriptive Form

SCA Affective Form

National Cupper's Form

Brazil Cup of Excellence

题目编号 100011696599

下列哪**两项**最能说明「杯测」的用途？

对咖啡进行感官评估的方法

对每个咖啡样本进行多次品尝的方法

测量咖啡中特定化学化合物的方法

撰写生豆合约的方法

Question ID: 100011696599

Which **two** of the following statements BEST describe cupping?

A method for the sensory assessment of coffee.

A method that involves tasting several cups per coffee sample.

A method for measuring the presence of certain chemical

			compounds in coffee. A method for writing green coffee contracts.	
			题目编号 100011696600 下列叙述是否正确？杯测仅可用于描述性评估。 正确 <u>错误</u> Question ID: 100011696600 Is the following statement true or false? Cupping can be used for descriptive assessment only. True <u>False</u>	
1.04.02 1.04.02 SCA 咖啡价值评估规范 SCA Coffee Value Assessment Protocol	1.定义 SCA 咖啡价值评估规范所使用的重 要术语 Define the key terms used in the SCA Coffee Value Assessment Protocol 2.列出杯测的前置作 业与执行步骤 List the steps to prepare and conduct a cupping 3.说明杯测样本的建 议烘焙时间、萃取时	重要术语 Key Terminology: 属性 Attributes: - 干香 Fragrance - 湿香 Aroma - 风味 Flavor - 余韵 Aftertaste - 酸质 Acidity - 甜味 Sweetness - 口感 Mouthfeel 步骤 Procedure: - 拨开咖啡浮渣（破渣） Breaking the crust (break) - 捞渣 Skimming - 啜吸 Liquoring	题目编号 100011696576 杯测中的「破渣」所指为何？ <u>以杯测匙轻轻推开漂浮于杯中上层的咖啡渣</u> 移除咖啡的浮渣、泡沫以及漂浮在表面的油脂 于咖啡变凉后品尝咖啡数次 等待咖啡变凉到适当品尝温度 Question ID: 100011696576 What does the 'break' refer to in cupping? <u>The act of gently pushing a cupping spoon through the crust that forms at the top of the cup.</u> The act of removing the floating grounds, foam, and oils that remain on the surface of the brew. The act of tasting the brew several times as it cools down. The act of waiting for coffees to cool to the appropriate tasting temperature.	<i>A New System to Assess Coffee Value: Introducing the Beta Version of the Specialty Coffee Association's Coffee Value Assessment (April 2023), (PDF, London: SCA, 2023), 20-21.</i> <i>A New System to Assess Coffee Value: Introducing the Beta Version of the Specialty Coffee Association's Coffee Value Assessment (April 2023), (PDF, London: SCA, 2023), 19-24.</i>
			题目编号 100011696577 下列叙述是否正确？进行杯测时，「干香」和「湿香」两	Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory</i>

	间以及萃取温度 3. State the recommended roast time, brew time, and brew temperature for cupping samples	相关定义请参阅附录 A 或咖啡价值评估规范 <i>Refer to Appendix A or the Coffee Value Assessment Protocol for definitions.</i>	者意思互通。 正确 错误 Question ID: 100011696577 Is the following statement true or false? When cupping, the terms ‘fragrance’ and ‘aroma’ are used interchangeably. True False 题目编号 100011696578 何者为杯测时分配（粉量）以及研磨咖啡豆的正确方式？ <u>以咖啡豆形式称重并分别放入杯测碗中，每个杯测碗中的咖啡豆单独进行研磨。</u> 以咖啡豆形式称重并放入一个大的容器杯中，同时研磨全部的咖啡豆。 研磨全部的咖啡豆，将适量的咖啡粉加入每个杯测碗内。 研磨全部的咖啡豆，将适重的咖啡粉加入每个杯测碗内。 Question ID: 100011696578 What is the correct way to portion (dose) and grind coffee for a cupping? <u>Weigh the coffee as whole beans and place into separate cupping bowls. Grind the beans for each cupping bowl separately.</u> Weigh the coffee as whole beans and place into one large container. Grind all the beans at the same time. Grind all the beans and then add the appropriate volume of coffee grounds to each cupping bowl. Grind all the beans and then add the appropriate weight of coffee grounds to each cupping bowl. 题目编号 100011696579 何者为杯测样本时的建议萃取时间？	<i>and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 104-109, 116. Mario Roberto Fernández-Alduenda and Peter Giuliano, <i>Coffee Sensory and Cupping Handbook</i> (London: Specialty Coffee Association, September 2021), 104-109, 116.

7. 附录 Appendices

附录 A：重要术语 Appendix A: Key Terminology

术语 Term	说明* Description*
酸质 Acidity	由咖啡唤起的酸味感知，在强度与特征上可能有所不同。 The perception of sour taste provoked by the brew, which may vary in intensity and character.
余韵 Aftertaste	在口中和喉咙残留的咖啡成分所引起的感知，包含味道与鼻后嗅觉。在咖啡被吐掉或吞咽之后，大脑将这些不同的感官输入结合，形成一种整体印象。 The perception coming from both the taste and the retronasal olfactory component caused by the remnants of the brew inside the mouth and throat, after the brew has been ejected or swallowed. It is perceived as a single impression, as the brain combines the different sensory inputs.
湿香 Aroma	在加入热水开始冲煮咖啡后，与破除咖啡浮渣时，进行评估的鼻前嗅觉感知（咖啡的香气）。 The orthonasal olfactory perception of the coffee brew, assessed right after brewing and while the crust is broken (the smell of the brew).
涩感 Astringent	余韵感受在口中持续的干涩感觉。 An aftertaste sensation consistent with a dry feeling in the mouth.
属性 Attribute	被视为咖啡特征或固有部分的质量或特性。用于感官评估时，属性是若干感官类别（湿香、干香、风味、余韵、酸质、甜感以及口感）中的描述词，会用于评估咖啡时进行分析和评分。 A quality or feature regarded as a characteristic or inherent part of a coffee. For the purpose of sensory assessment, an attribute is a descriptor within a number of defined categories (aroma, fragrance, flavor, aftertaste, acidity, sweetness, and mouthfeel) of sensation that are analyzed and rated when assessing a coffee.
基本味道 Basic Tastes	甜、酸、苦、咸及鲜等五种基本味道。 The five basic tastes of sweet, sour, bitter, salty and umami.

破渣 Break	搅拌咖啡液中「咖啡浮渣」或「圆顶」（通常在萃取过程中形成于杯子顶层）的行为，为准备啜吸之前的步骤之一。 The act of stirring the “crust” or “dome” of coffee slurry usually formed on the top of the cup during brewing, as one of the steps to ready the cup for liquoring.
咖啡浮渣 Crust	萃取后立即在咖啡表层形成的一层湿咖啡粉，破除后可评估咖啡的湿香。 The layer of wet coffee grounds that forms on the top of the brew surface immediately after brewing. This crust is broken to evaluate the coffee aroma.
杯测 Cupping	一种对咖啡进行感官评估的方法，每款咖啡样品会准备数杯，每杯咖啡豆独立研磨并冲泡，然后对每杯咖啡样本品尝数次。 A method for the sensory assessment of coffee, which involves tasting several cups per coffee sample, using a different set of coffee beans for each cup, which is ground and brewed independently.
杯测杯 / 碗 Cupping Glasses/Bowls	用于杯测咖啡的玻璃或陶瓷容器，容量在 200 毫升至 350 毫升之间。 Tempered glass or ceramic vessels between 200 mL and 350 mL used for cupping between 200 mL and 350 mL.
杯测研磨 Cupping Grind	较滤纸研磨度稍粗的研磨度，约有 70% 到 75% 的咖啡粉能通过 850μm 或美国 20 号筛网。 A grind that is coarser than a paper filter grind with 70% to 75% passing through a 850μm or US Size 20 sieve.
描述性测试 Descriptive Test	描述性测试是一种量化的感官测试，旨在对产品所有感知感官属性进行描述和分析。 A descriptive test is a quantitative sensory test that seeks to profile a product on all its perceived sensory attributes.
差别测试 Difference Test	差别（区别性）测试是一种感官测试，用于辨别样本之间是否存在差异。 A difference (discriminative) test is a sensory test that identifies whether there is a difference (or not) between samples.
风味 Flavor	来自于咖啡的味道和咖啡在口中时的鼻后嗅觉感知。脑部将不同的感官输入结合起来，被感知为一种单一「风味」印象。 The perception coming from both the taste of the brew and the brew’s retronasal olfactory component, while the brew is in the mouth. It is perceived as a single “flavor” impression, as the brain combines the different sensory inputs.
干香 Fragrance	在咖啡冲泡之前，对咖啡粉的鼻前嗅觉感知。 The orthonasal olfactory perception of the coffee grounds prior to brewing (the smell of the coffee grounds.)

味觉 Gustation	品尝味道的感知，就像「视觉」代表视力的感知，以及「嗅觉」代表气味的感知。味觉的主要生理结构是一组味蕾。 The sense of taste, just as “visual” refers to the sense of sight and “olfactory” to the sense of smell. The main physiological structure of the sense of taste is the set of tastebuds.
口感 Mouthfeel	当咖啡在口中时的触觉感知，不包含温度感知。口感包括：咖啡的重量感、黏稠度、质地，以及其它触觉特性，例如涩感（口腔干涩感）。 The tactile perception of the brew while it is in the mouth, excluding the temperature perception. It encompasses the brew’s weight and viscosity, its texture, and other tactile properties such as astringency (mouth-drying property).
嗅觉 Olfactory	与气味的感知有关。人类嗅觉系统由鼻子、鼻腔，以及大脑中的「嗅球」所组成，嗅球负责处理鼻腔内覆盖的嗅觉受体的讯息。 Relating to the sense of smell. The human olfactory system consists of the nose, the nasal cavities, and the “olfactory bulb” in the brain, which processes information from the olfactory receptors lining the nasal cavities.
感官小组 Sensory Panel	感官小组是受过培训、校正的团体，能够客观地描述样本之间的差异性。 A sensory panel is a trained, calibrated group that can objectively describe differences between samples.
三角杯测 Triangulation Test	三角杯测是一种区别性的测试方法，品鉴者必须在三个一组的样本中，辨别出那个不同或最明显不同的样品。 A triangulation (or triangle) test is a discriminative test method in which the taster identifies the odd/most significantly different sample in a set of three samples.

*这些术语的参考数据已列入课程内容。

*References for these terms are listed within the context of the curriculum.

附录 B：活动准备指南 Appendix B: Activity Preparation Guide

- 以下所列活动旨在协助学员达成课程内的特定学习目标。
The activities listed here address particular learning objectives within the curriculum.
- 这些活动的指导内容灵活有弹性，可与 AST 设计以及学员可用的设备搭配使用。
These activities have flexible instructions to accommodate AST design and the learner's access to equipment.
- 只要有助于学员达成相关目标，AST 可调整或修改活动内容。
The AST may modify or improve upon these activities if it helps the learner achieve the relevant objectives.
- 进行相关活动时，AST 将评估学员对实作目标的理解，以完成 CSP 课程技能报告。
While conducting these activities, the AST evaluates the learner's comprehension of the practical objectives to complete the CSP Course Skills Report.

活动 Activity	指示说明 Instructions
1.01.02 使用属性辨别不同的咖啡 Identifying Differing Coffees Using Attributes	在本活动中，学员将接触精品咖啡的属性定义。 In this activity, learners are exposed to the attributes definition of specialty coffee. 精品咖啡是一种因其独特属性而受认可的咖啡或咖啡体验，也因为这些属性，在市场上具有重要的附加价值。商业咖啡与精品咖啡之间的关系最好被视为一个连续体，随着越来越多的独特属性被发掘，咖啡也变得更加精品化。一款咖啡在精品 / 商业咖啡连续体上的位置，取决于个人偏好以及哪种属性对该个体而言最具意义。 Specialty coffee is a coffee or coffee experience recognized for its distinctive attributes, and because of these attributes, has significant extra value in the marketplace. The relationship between commodity and specialty coffee is best viewed as a continuum, with coffees becoming more specialty in nature as more distinctive attributes are detected. Where a coffee falls on the specialty/commodity continuum depends on personal preference and which attributes are most meaningful to the individual. 咖啡的内在特点（例如咖啡的描述性特征、烘焙颜色、大小 / 等级等）和外在特点（有关咖啡产地的信息、认证、农场名称、品牌等），皆可增加咖啡在市场上的价值。 Both intrinsic attributes (like the coffee's descriptive profile, roast color, size/grade, etc.) and extrinsic attributes (information about the coffee's origin, certification, name of farm, brand) can add to that coffee's value in the marketplace. 结束本练习时，应强调我们未必能断言何者为精品咖啡、何者又是商业咖啡。我们只能说，具有更多独特、迷人属性的咖啡，往往较其它咖啡更精品。 When concluding the exercise, emphasize that we can't necessarily say that one coffee is specialty and one is commodity. We can only say that the coffee with more distinctive, desirable attributes is more specialty than the other.

	使用批量冲泡式的滴滤式咖啡机或手冲工具来冲泡两款咖啡： Brew two coffees using a batch brewer or manual device. • 其中一杯咖啡应该呈现明显较少的独特感官属性（感官复杂性 / 强度较低）。 - One coffee should display noticeably fewer distinct sensory attributes (less sensory complexity/intensity) • 另一杯咖啡则应该呈现明显较多的独特感官属性（感官复杂性 / 强度较高）。 - One coffee should display noticeably more distinct sensory attributes (more sensory complexity/intensity) 请注意：两款咖啡之间的差异应能让初学者感到明显不同。 Note: The difference between the two coffees should be noticeable to a beginner. <u>远距教学</u>：For distance learning: • AST 应确认学员具有必要设备，以顺利完成 AST 所设计的活动。AST 可以遵循咖啡杯测活动指南介绍的指示，或确认学员使用熟悉的设备，以确保冲煮成品的一致性。 - The AST should confirm that the learner has the necessary equipment to complete the activities as designed by the AST. The AST can follow instructions in Introduction to Coffee Cupping Activities Guidelines DistLearn.doc or confirm consistent brewing using preferred devices. • AST 会将预先分配并编号的咖啡寄送给学员，或指定咖啡类型由学员在当地购买。AST 可寄送研磨好的咖啡粉，或确认学员是否拥有一台能与 AST 进行校准的可调式刀盘磨豆机。 - The AST sends pre-portioned, coded coffees to the learner OR prescribes the type of coffee that should be acquired by the learner locally. The AST can send ground coffee or confirm that the learner has an adjustable, burr-style coffee grinder and is capable of calibrating with the AST. • AST 还必须规定活动中的用水，并确保所有活动皆使用同一款水。AST 可建议使用当地出产的瓶装水或经过再矿化的蒸馏水。 - The AST must also prescribe the water to be used in the activity and ensure that it is consistent across all activities. ASTs can suggest utilizing locally sourced bottled water or products that remineralize distilled water.
1.02.01A 刺激 vs 感知 Stimulus vs Perception	在本活动中，学员将使用非咖啡类物品体验刺激与感知的不同。 In this activity, learners experience the difference between stimulus and perception using non-coffee items. 刺激（一些存在于我们的环境中）由感知器官以及感知器官传送到大脑所发出的神经讯号所认知。接着，大脑根据先前的经验、环境及意向，理解、组织并整合传入的感知讯号成为感知。最终，根据那些感知发送一个响应。 The stimulus (something in our environment) is recognized by the sense organ and a nerve signal from the sense organ is sent to the brain. Next, the brain interprets, organizes, and integrates the incoming sensation signal into perceptions, based on previous experience, context, and intention. Finally, a response is emitted based on those perceptions.

	准备练习项目，内容是让学员盲触织品样本并猜出原料。使用不同质地与柔韧性的织品（例如，皮革、丹宁 / 帆布、羊毛感、钢丝绒）。可利用眼罩、不透明的袋子，或外侧有翻盖遮住剪裁孔的纸盒。这些素材可在大多数手工艺或五金店取得。 Prepare exercises where learners blindly touch fabric samples and guess the material. Use fabrics with different textures and pliability (e.g., leather, denim/canvas, wool felt, steel wool). Methods might include blindfolds, opaque sacks, or boxes with a paper flap covering a hole cut out on the side. These materials can be obtained at most craft or hardware stores. AST 可透过错视（视错觉）的手法，进一步示范感知的面向。 The AST can use optical illusions to further demonstrate aspects of perception. 远距教学：AST 可以寄发一包经过编号、不透明包装的素材以提供盲触体验，或寄发附上指示的材料清单。 For distance learning: The AST can conduct this activity by sending a packet of materials in coded, opaque packaging to accommodate a blind experience, or by sending a materials list with instructions.
1.02.01B 味觉与嗅觉在风味感知中的角色 The Role of Taste and Smell in Flavor Perception	透过此活动，学员将体验味觉与嗅觉的差别，以及它们在风味感知中扮演的角色。 In this activity, learners experience the difference between taste and smell, and their role in flavor perception. 味觉存在于口腔，嗅觉则是透过鼻腔内的嗅球测得。 Taste exists in the oral cavity and smell is detected by the olfactory bulb in the nasal cavity. 进行一个捏住鼻子的测试。在盲测练习中使用可嚼食的调味糖果。要求学员在鼻子被捏住时描述该口味，接着打开鼻道后再描述一次。 Conduct a pinch-the-nose test. Use flavored, chewable candies in a blind exercise. Ask learners to describe the flavor while the nose is pinched and then again once they have opened their nasal passage. 使用各种产品，包括明显水果味、明显浓郁以及明显辛辣者。 Use a variety of products, including one that is notably fruity, one that is notably savory, and one that is notably spicy. 远距教学：AST 寄发有编号、不透明包装的材料包，以进行无法看到内容物的盲测体验，或寄发一份附带指示的材料清单来进行这项活动。 For distance learning: The trainer can conduct this activity by sending a packet of materials in coded, opaque packaging to accommodate a blind experience, or by sending a materials list with instructions.

1.02.02

基本味道 Basic Tastes

在本活动中，学员将练习对代表五种基本味道的溶液进行盲测。

In this activity, learners practice the blind identification of solutions representing the five basic tastes.

味道 Taste	溶液 Solution
酸 (酸质) Sour (Acidic)	0.5 克的柠檬酸颗粒 + 1,000 毫升的水 0.5 g citric acid granules + 1000 mL water
甜 Sweet	10 克的蔗糖 / 白砂糖 + 1,000 毫升的水 10 g sucrose/table sugar + 1000 mL water
苦 Bitter	0.5 克的咖啡因粉* + 1,000 毫升的水 0.5 g caffeine powder* + 1000 mL water
鲜 Umami	0.6 克的味精 (MSG) 粉 + 1,000 毫升的水 0.6 g monosodium glutamate (MSG) powder + 1000 mL water
咸 Salty	1.6 克氯化钠 (食盐) + 1,000 毫升的水 1.6 g NaCl/table salt + 1000 mL water
使用干净安全、适宜饮用的过滤水。 Use clean, filtered, potable drinking water.	

*请注意：在调制咖啡因时应注意（高剂量咖啡因具毒性）。尽管这些材料大多可在超市、杂货店或在线购得，AST 可能还是需要透过学校 / 实验室名义，向供货商登记以取得咖啡因。

*Note: Use caution when dosing caffeine (it is toxic in high quantities). While most of these materials can be obtained at a supermarket, grocery store, or online, the AST may need to register with a laboratory supplier as a school/laboratory to obtain caffeine.

应强调这是描述性活动，目标是保持客观，而非判断质量的印象。

Emphasize that this is a descriptive activity. The goal is to be objective, not to determine impression of quality.

远距教学：For distance learning:

- AST 应确认学员具有必要设备，以顺利完成 AST 所设计的活动。
The AST should confirm that the learner has the necessary equipment to complete the activities as designed by the AST.

	• AST 寄送预先分配、编号的各溶液原料包，学员仅需加水混合。AST 也可以提供学员这些原料的清单，或可由学员合理获取的代替物。避免学员可能摄入过多咖啡因或味精的情形。 The AST sends pre-portioned, coded packets of ingredients for each solution so that learners only have to mix them with water. The AST may also provide the learner with a list of these ingredients or substitutions that can be reasonably sourced by the learner. Avoid situations where the learner might ingest too much caffeine or MSG. • AST 还必须规定活动中的用水，并确保所有活动使用同一款水。 The AST must also prescribe the water to be used in the activity and ensure that it is consistent across all activities.
1.03.01 咖啡中的酸、苦以及口感 Acidity, Bitterness, and Mouthfeel in Coffee	在本活动中，学员将两两比较各萃取咖啡的酸质、苦味与口感。 In this activity, learners compare the intensities of acidity, bitterness, and mouthfeel in pairs of brewed coffee. 咖啡中的酸质、苦以及口感，可能因咖啡农场、后制处理、烘焙以及萃取等多种因素而异。 Acidity, bitterness, and mouthfeel of coffees can vary due to multiple factors associated with coffee farming, processing, roasting, and brewing. 准备一张桌子与两两一对的滴滤咖啡。清楚标示待评估的每对咖啡属性，并且在每杯咖啡以随机三位数号码编码。 Set a table with pairs of batch brew coffee. Clearly label the attribute to be evaluated for each pair and code each coffee with a random three-digit number. 学员接着为下列属性比较强度（最低 / 最高）：酸质、苦、口感。 Learners then compare intensities (lowest/highest) for the following attributes: Acidity, Bitterness, Mouthfeel. 请注意：每组咖啡应在该评估的属性上呈现明显不同的强度。 Note: The coffee pairings should display noticeably different intensities for the attribute being evaluated. 配对范例：Example Pairings: • 酸质：巴西 vs. 肯尼亚 Acidity: Brazil vs. Kenya • 苦：罗布斯塔 vs. 阿拉比卡 Bitterness: Robusta vs. Arabica • 口感：中美洲低海拔 vs. 高海拔，或水洗 vs. 日晒 Mouthfeel: Low elevation vs. high elevation Central America, or washed vs. natural

	远距教学：For distance learning: - AST 应确认学员具有必要设备，以顺利完成 AST 所设计的活动。AST 可以遵循咖啡杯测活动指南介绍的指示，或确认学员使用熟悉的设备，以确保冲煮成品的一致性。 The AST should confirm that the learner has the necessary equipment to complete the activities as designed by the AST. The AST can follow instructions in Introduction to Coffee Cupping Activities Guidelines DistLearn.doc or confirm consistent brewing using preferred devices. - AST 会将预先分配并编号的咖啡寄送给学员，或指定咖啡类型由学员在当地购买。AST 可寄送研磨好的咖啡粉，或确认学员是否拥有一台能与 AST 进行校准的可调式刀盘磨豆机。 The AST sends pre-portioned, coded coffees to the learner OR prescribes the type of coffee that should be acquired by the learner locally. The AST can send ground coffee or confirm that the learner has an adjustable, burr-style coffee grinder and is capable of calibrating with the AST. - AST 还必须规定活动中的用水，并确保所有活动使用同一款水。AST 可建议使用当地出产的瓶装水或经过再矿化的蒸馏水。 The AST must also prescribe the water to be used in the activity and ensure that it is consistent across all activities. ASTs can suggest utilizing locally sourced bottled water or products that remineralize distilled water.
1.03.02 咖啡风味轮以及 WCR 感官辞典 Coffee Taster’s Flavor Wheel and WCR Lexicon	在本活动中，学员使用闻香瓶或咖啡价值评估规范中建议的物品，探索咖啡风味轮的九大风味类别。以团体方式探索每个类别。 In this activity, learners explore the nine main flavor categories of the Coffee Taster’s Flavor Wheel using aroma vials or grocery references from the Coffee Value Assessment Protocol. Explore each category as a group. 每种类别使用下列闻香瓶，以进行 Le Nez 嗅觉训练： For Le Nez, use the following vials for each category: 绿色 / 蔬菜：#3 碗豆 Green/Vegetative: #3 Garden Pea 酸 / 发酵味：#13 咖啡浆果 Sour/Fermented: #13 Coffee Pulp 水果味：#15 柠檬 Fruity: #15 Lemon 花香：#12 咖啡花 Floral: #12 Coffee Blossom 甜味：#25 焦糖 Sweet: #25 Caramel 坚果 / 可可：#26 黑巧克力 Nutty/Cocoa: #26 Dark Chocolate 香料味：#7 丁香 Spices: #7 Clove-like

烘烤味：#32 烟熏

Roasted: #32 Smoke

其他：#35 药味

Other: #35 Medicinal

每种类别使用下列闻香瓶，以进行 Scentone (T100 / T144) 训练：

For Scentone (T100 / T144), use the following vials for each category:

绿色 / 蔬菜：#91 / #111 小黄瓜

Green/Vegetative: #91 / #111 Cucumber

酸 / 发酵味：#88 / #125 美乃滋

Sour/Fermented: #88 / #125 Mayonnaise

水果味：#26 / #23 柠檬

Fruity: #26 / #23 Lemon

花香：#68 / #4 茉莉花

Floral: #68 / #4 Jasmine

甜味：#51 / #81 焦糖

Sweet: #51 / #81 Caramel

坚果 / 可可：#56 / #88 黑巧克力

Nutty/Cocoa: #56 / #88 Dark Chocolate

香料味：#79 / #98 丁香

Spices: #79 / #98 Clove

烘烤味：#99 / #128 烟熏

Roasted: #99 / #128 Smoke

其他：#100 / #129 烤牛肉

Other: #100 / #129 Savory Beef

如需物品准备指南，请参阅咖啡价值评估规范中的嗅觉指南。

For guidelines on preparing grocery references, review the olfactory reference guide in the Coffee Value Assessment Protocol.

远距教学：For distance learning:

- AST 应确认学员具有必要设备，以顺利完成 AST 所设计的活动。若学员没有建议设备可用，AST 应提供学员物品参照清单以及准备说明，并确认能否取得。

The AST should confirm that the learner has the necessary equipment to complete the activities as designed by the AST. If the learner does

	not have the recommended equipment, the AST should provide the learner with a list of grocery references, along with preparation instructions, and confirm availability.			
1.04.02A SCA 描述性评估 SCA Descriptive Assessment	在本活动中，学员将练习使用咖啡价值评估规范以及 SCA 描述性表格，设置杯测桌并进行描述性评估。活动进行期间，复习在杯测过程中使用的重要术语。 In this activity, learners practice setting a cupping table and conducting a descriptive assessment, using the Coffee Value Assessment Protocol and the SCA Descriptive Form. During the activity, review the key terms used in a cupping session. 学员应依据咖啡价值评估，协助准备有五个样本的杯测桌。开始评估时，学员应使用 SCA 描述性表格以记录他们对样本感官属性的印象。 Learners should help prepare the cupping tables with five-cup sample sets according to the Coffee Value Assessment Protocol. Once the assessment begins, learners should use the SCA Descriptive Form to document their impressions of the samples’ sensory attributes. 优先帮助学员掌握杯测法与品鉴技巧。学员对于强度量表感到不知所措时，适时鼓励他们专注于 SCA 描述性表格上的「选择所有适用选项」（CATA）方框。 Prioritize helping learners master the cupping method and tasting technique. Encourage learners to focus on the check all that apply (CATA) boxes on the SCA Descriptive Form if they feel overwhelmed by the intensity scales. 完成杯测后，与学员讨论 CATA 与强度评分。 Discuss the CATA and intensity ratings with learners after the cupping is complete. 使用三种足以展现明显不同强度与风味轮廓的各式咖啡。咖啡应该没有任何瑕疵。范例： Use three diverse coffees that display noticeably different intensities and flavor profiles. The coffees should be free of defects. Examples: • 三种来自不同国家或地区的水洗咖啡。 Washed coffees from three different countries or regions. • 来自相同地区、以三种不同方式后制处理的咖啡。 Coffees from the same origin processed three different ways. 遵循下列步骤设置杯测桌。 Follow the steps below to set a cupping table. <table><tr><td>杯测桌设置 Table Placement</td></tr><tr><td>每组有五（5）碗/杯装有适当重量的咖啡豆，然后独立研磨。 Each set has five (5) bowls/glasses that were each filled with the appropriate weight of whole bean coffee and then ground separately.</td></tr><tr><td>每个碗/杯的目标咖啡重量误差值在 +/- 0.1 克内。 Each bowl/glass is within +/- 0.1g of the target weight of coffee.</td></tr></table>	杯测桌设置 Table Placement	每组有五（5）碗/杯装有适当重量的咖啡豆，然后独立研磨。 Each set has five (5) bowls/glasses that were each filled with the appropriate weight of whole bean coffee and then ground separately.	每个碗/杯的目标咖啡重量误差值在 +/- 0.1 克内。 Each bowl/glass is within +/- 0.1g of the target weight of coffee.
杯测桌设置 Table Placement				
每组有五（5）碗/杯装有适当重量的咖啡豆，然后独立研磨。 Each set has five (5) bowls/glasses that were each filled with the appropriate weight of whole bean coffee and then ground separately.				
每个碗/杯的目标咖啡重量误差值在 +/- 0.1 克内。 Each bowl/glass is within +/- 0.1g of the target weight of coffee.				

每杯咖啡有 ID 编码。

Each coffee has an ID code.

将干净的碗 / 杯注满水，并在杯测碗边放置汤匙。

Rinsing bowl/glass is filled with water and spoons are set out next to cupping sets.

不得在杯测碗旁放置烘焙熟豆或生豆。

No roasted or green coffee is sitting next to the cupping bowls.

杯测标准规范步骤 Steps of Cupping Protocol

咖啡豆称重后放在独立杯中。

Weigh coffee in individual cups as whole beans.

研磨样本，在每个样本间清洁磨豆机。

Grind samples, purging grinder in between samples.

在研磨后 15 分钟内完成评估干香。

Evaluate dry fragrance within 15 minutes of grinding.

注入符合 SCA 标准、温度介于摄氏 90 至 96 度之间（华氏 195 至 205 度）的水。

Pour water calibrated to SCA Standard between 90 and 96°C (195-205°F).

浸泡 3 至 5 分钟；保持每次冲泡的一致性。

Steep 3-5 minutes; be CONSISTENT flight to flight.

破渣（不撒出咖啡渣）。搅拌三次（评估湿香）。

Break (without spilling grounds). Stir three times (evaluate aroma).

捞除表面的泡泡与浮渣。

Skim the surface bubbles and surface grounds.

浸泡。放凉到摄氏 70 度（大约华氏 160 度），约 8 至 10 分钟。

Steep. Let cool to 70°C (about 160°F), about 8-10 minutes.

吸入香气并品尝；漱口、吐掉、记录，然后重复。

Aspirate and taste; rinse, spit, document, and repeat.

远距教学：For distance learning:

- AST 可以在本活动中纳入现场或预录的示范，透过影像链接进行现场互动。
The AST can convert this activity to include a live or recorded demonstration followed by a live, interactive activity via video link.

	• AST 应全程观察学员如何使用实际设备或事先指定的代替品设置 SCA 杯测。 The AST should observe the learner demonstrating the process of setting up a SCA cupping using actual equipment or substitutes that have been identified in advance. • AST 应全程观察学员如何进行杯测法，包括使用 SCA 描述性表格。 The AST should observe the learner demonstrating the cupping method, including using the SCA Descriptive Form. • AST 会将预先分配并编号的咖啡寄送给学员，或指定咖啡类型由学员在当地购买。AST 可寄送研磨好的咖啡粉，或确认学员是否拥有一台能与 AST 进行校准的可调式刀盘磨豆机。 The AST sends pre-portioned, coded coffees to the learner OR prescribes the type of coffee that should be acquired by the learner locally. The AST can send ground coffee or confirm that the learner has an adjustable, burr-style coffee grinder and is capable of calibrating with the AST. • AST 还必须规定活动中的用水，并确保所有活动使用同一款水。AST 可以建议使用当地来源的瓶装水或再矿化的蒸馏水产品。 The AST must also prescribe the water to be used in the activity and ensure that it is consistent across all activities. ASTs can suggest utilizing locally sourced bottled water or products that remineralize distilled water.
1.04.03 SCA 情感性评估 SCA Affective Assessment	在本活动中，学员将练习使用咖啡价值评估规范以及 SCA 情感性表格，准备与进行情感性评估。活动进行期间，复习在杯测过程中使用的重要术语。 In this activity, learners practice setting and conducting an affective assessment, using the Coffee Value Assessment Protocol and the SCA Affective Form. During the activity, review the key terms used in a cupping session. 学员应依据咖啡价值评估规范，协助准备有五个样本的杯测桌。开始评估时，学员应使用 SCA 情感性表格记录他们对样本感官属性的印象。 Learners should help prepare the cupping tables with five-cup sample sets according to the Coffee Value Assessment Protocol. Once the assessment begins, learners should use the SCA Affective Form to document their impressions of quality for the samples' attributes. 优先协助学员掌握杯测法与品鉴技巧。学员对于表格下方的一致性和瑕疵方框感到不知所措时，适时鼓励他们专注于 SCA 情感性表格的九级量表。 Prioritize helping learners master the cupping method and tasting technique. Encourage learners to focus on the nine-point scales on the SCA Affective Form if they feel overwhelmed by the uniformity and defect boxes at the bottom of the form. 完成杯测后，与学员讨论他们对质量评分的印象。请记住，情感性评估的目标并非校正，不同的印象都是可以接受的。 Discuss the learners' impression of quality ratings after the cupping is complete. Remember that calibration is NOT the goal of affective assessment and different impressions are acceptable. 使用三种足以展现明显不同强度与风味轮廓的各式咖啡。咖啡应该一致且无瑕疵。范例： Use three diverse coffees that display noticeably different intensities and flavor profiles. The coffees should be uniform and free of defects. Examples: • 三种来自不同国家或地区的水洗咖啡。 Washed coffees from three different countries or regions.

- 来自相同地区、以三种不同方式后制处理的咖啡。
Coffees from the same origin processed three different ways.

远距教学：For distance learning:

- AST 可以在本活动中纳入现场或预录的示范，透过影像链接进行现场互动。
The AST can convert this activity to include a live or recorded demonstration followed by a live, interactive activity via video link.
- AST 应全程观察学员如何使用实际设备或事先指定的代替品设置 SCA 杯测。
The AST should observe the learner demonstrating the process of setting up a SCA cupping using actual equipment or substitutes that have been identified in advance.
- AST 应全程观察学员如何进行杯测，包括使用 SCA 情感性表格。
The AST should observe the learner demonstrating the cupping method, including using the SCA Affective Form.
- AST 会将预先分配并编号的咖啡寄送给学员，或指定咖啡类型由学员在当地购买。AST 可寄送研磨好的咖啡粉，或确认学员是否拥有一台能与 AST 进行校准的可调式刀盘磨豆机。
The AST sends pre-portioned, coded coffees to the learner OR prescribes the type of coffee that should be acquired by the learner locally.
The AST can send ground coffee or confirm that the learner has an adjustable, burr-style coffee grinder and is capable of calibrating with the AST.
- AST 还必须规定活动中的用水，并确保所有活动使用同一款水。AST 可以建议使用当地来源的瓶装水或再矿化的蒸馏水产品。
The AST must also prescribe the water to be used in the activity and ensure that it is consistent across all activities. ASTs can suggest utilizing locally sourced bottled water or products that remineralize distilled water.
